

Network-and-Security-Foundation완벽한공부자료 & Network-and-Security-Foundation인기자격증시험덤프 공부

참고: ITDumpsKR에서 Google Drive로 공유하는 무료, 최신 Network-and-Security-Foundation 시험 문제집이 있습니다:
<https://drive.google.com/open?id=1QDMhMn1Jl31PM5HktxEv3digQ-2ucQ7R>

ITDumpsKR의 WGU인증 Network-and-Security-Foundation덤프는 WGU인증 Network-and-Security-Foundation시험에 도전장을 던진 분들이 신뢰할 수 있는 든든한 길잡이입니다. WGU인증 Network-and-Security-Foundation시험대비 덤프 뿐만 아니라 다른 IT인증시험에 대비한 덤프자료도 적중율이 끝내줍니다. WGU인증 Network-and-Security-Foundation 시험이나 다른 IT인증자격증 시험이나 ITDumpsKR제품을 사용해 보세요. 투자한 덤프비용보다 훨씬 큰 이득을 보실 수 있을 것입니다.

ITDumpsKR의 WGU Network-and-Security-Foundation덤프를 구매하기 전 우선 pdf버전 덤프샘플을 다운받아 덤프문제를 공부해보시면 ITDumpsKR덤프품질에 신뢰가 느껴질 것입니다. ITDumpsKR의 WGU Network-and-Security-Foundation덤프가 고객님의 시험패스에 조금이나마 도움이 되신다면 행복으로 느끼겠습니다.

Network-and-Security-Foundation인기자격증 시험덤프공부 & Network-and-Security-Foundation높은 통과율 시험덤프자료

IT자격증을 많이 취득하여 IT업계에서 자신만의 단단한 자리를 보장하는것이 여러분들의 로망이 아닐까 싶습니다. ITDumpsKR의 완벽한 WGU인증 Network-and-Security-Foundation덤프는 IT전문가들이 자신만의 노하우와 경험으로 실제WGU인증 Network-and-Security-Foundation시험문제에 대비하여 연구제작한 완벽한 작품으로서 100%시험통과율을 보장합니다.

최신 Courses and Certificates Network-and-Security-Foundation 무료샘플 문제 (Q35-Q40):

질문 # 35

A company is specifically worried about rogue access points.
Which strategy should be used as a mitigation against this type of attack?

- A. Configure switch port tracing
- B. Decrease the wireless range
- C. Monitor normal traffic patterns
- D. Disable unnecessary services

정답: A

설명:

Configuring switch port tracing helps detect unauthorized devices, such as rogue access points, that are connected to the network. Network administrators can use port security and intrusion detection systems (IDS) to monitor and block unauthorized access points.

- * Decreasing wireless range may limit exposure but does not actively detect rogue APs.
- * Disabling unnecessary services improves security but does not prevent rogue APs.
- * Monitoring traffic patterns helps detect anomalies but does not directly stop rogue APs.

질문 # 36

When setting up a network, a technician needs a router that creates an access point.
Which router should be used?

- A. Wireless router
- B. Broadband router
- C. Inter-provider border router
- D. Core router

정답: A

설명:

A wireless router is designed to create an access point that allows wireless devices to connect to a network. It combines the functions of a traditional router with a wireless access point, enabling communication between wired and wireless devices. These routers use Wi-Fi standards (e.g., 802.11ac, 802.11ax) to transmit data wirelessly.

- * Broadband routers primarily provide internet connectivity but do not necessarily include Wi-Fi functionality unless specified.
- * Core routers handle large-scale data routing in the backbone of networks but are not designed for access point creation.
- * Inter-provider border routers function at an ISP level for routing traffic between different networks, not for providing user access.

질문 # 37

An organization has experienced a series of data breaches and needs to ensure that data remains protected even if intercepted.
Which security measure should be implemented?

- A. Patch management
- B. Role-based access control (RBAC)
- C. Data encryption
- D. Two-factor authentication (2FA)

정답: C

설명:

Data encryption protects sensitive information by encoding it into an unreadable format, ensuring that even if attackers intercept the data, they cannot decipher it without the proper decryption key. This is crucial for protecting stored and transmitted data.

- * RBACcontrols user access but does not secure data in transit.
- * 2FAstrengthens authentication but does not secure stored or transmitted data.
- * Patch managementfixes software vulnerabilities but does not directly protect intercepted data.

질문 # 38

A company wants to implement a cloud service to obtain access to virtual machines. The company wants to be able to choose the operating systems and configure each of the machines.

What is the type of cloud service model that fits the needs of this company?

- A. Software as a Service (SaaS)
- B. Function as a Service (FaaS)
- C. Infrastructure as a Service (IaaS)
- D. Platform as a Service (PaaS)

정답: C

설명:

Infrastructure as a Service (IaaS)provides virtualized computing resources over the cloud, including virtual machines where users can install and configure their own operating systems and applications. It offers flexibility and scalability without requiring hardware investment. Examples include AWS EC2 and Microsoft Azure Virtual Machines.

* FaaSexecutes small code functions without infrastructure management.

* PaaSprovides a managed platform but not full OS control.

* SaaSoffers ready-to-use applications without infrastructure control.

질문 # 39

A library has a network that allows patrons to use their mobile devices to connect to the internet.

Which type of network is described?

- A. SAN
- B. MAN
- C. PAN
- D. WLAN

정답: D

설명:

AWireless Local Area Network (WLAN)enables wireless connectivity within a defined geographic area, such as a library, office, or coffee shop. WLANs use Wi-Fi technology to allow users to access the internet without physical cables.

* Storage Area Networks (SANs)are used for data storage and do not provide internet connectivity to users.

* Metropolitan Area Networks (MANs)cover larger areas, such as cities, and are not used within a single building.

* Personal Area Networks (PANs)connect personal devices like smartphones and laptops over short distances, such as via Bluetooth, but do not support public internet access.

질문 # 40

.....

만약 아직도 WGU Network-and-Security-Foundation인증시험 위하여 많은 시간과 정력을 소모하며 열심히 공부하고 있습니까? 아직도 어떻게하면 WGU Network-and-Security-Foundation인증시험을 빠르게 취득할 수 있는 방법을 못하고 계십니까? 지금 ITDumpsKR에서 WGU Network-and-Security-Foundation인증시험을 안전하게 넘을 수 있도록 대책을 내드리겠습니다. 아주 신기한 효과가 있을 것입니다.

Network-and-Security-Foundation인기자격증 시험덤프공부 : <https://www.itdumpskr.com/Network-and-Security-Foundation-exam.html>

ITDumpsKR에서는 최신 Network-and-Security-Foundation덤프를 제공하여 여러분의 Network-and-Security-Foundation시험합격에 많은 도움이 될 것입니다, 저희 ITDumpsKR Network-and-Security-Foundation인기자격증 시험덤프공부의 덤프 업데이트시간은 업계에서 가장 빠르다고 많은 덤프구매자 분들께서 전해주셨습니다, IT업계의 선구자로서 저희의 목표는 Network-and-Security-Foundation 시험에 참가하는 여러분들께 조금이나마 도움이 되어드리는 것입니다,

그리고 ITDumpsKR Network-and-Security-Foundation 시험 문제집의 전체 버전을 클라우드 저장소에서 다운로드할 수
