

Exam SC-300 Reference | Free SC-300 Download Pdf

P.S. Free & New SC-300 dumps are available on Google Drive shared by TorrentVCE: https://drive.google.com/open?id=17xCX8mk-JNqs_vVlefmqxpZTuHDFpatt

Our SC-300 quiz torrent can provide you with a free trial version, thus helping you have a deeper understanding about our SC-300 test prep and estimating whether this kind of study material is suitable to you or not before purchasing. With the help of our trial version, you will have a closer understanding about our SC-300 Exam Torrent from different aspects, ranging from choice of three different versions available on our test platform to our after-sales service. In a word, you can communicate with us about SC-300 test prep without doubt, and we will always be there to help you with enthusiasm.

Microsoft SC-300 is an exam that is designed to test the skills and knowledge of individuals who are interested in becoming Microsoft Identity and Access Administrators. SC-300 exam is intended for individuals who have experience working with Microsoft Azure Active Directory, Microsoft 365 Identity and Services, and hybrid identity. SC-300 exam is designed to test the candidate's ability to manage identity and access, implement identity solutions, and secure identities.

Microsoft Identity and Access Administrator certification exam, also known as SC-300, is a certification exam aimed at validating the skills of IT professionals in managing user identities and access in cloud-based environments. SC-300 Exam is designed for individuals who work with Azure Active Directory (AAD) and Microsoft 365 products, and who are responsible for managing user access and security in their organizations.

Free Microsoft SC-300 Download Pdf - SC-300 Test Discount

The TorrentVCE is a reliable and trusted platform for quick and complete Microsoft SC-300 exam preparation. At this platform, you can easily download real and verified Microsoft Identity and Access Administrator (SC-300) exam practice questions. These Microsoft Identity and Access Administrator (SC-300) exam questions are ideal and recommended study material for quick and complete Microsoft SC-300 exam preparation.

Microsoft Identity and Access Administrator Sample Questions (Q23-Q28):

NEW QUESTION # 23

You need to create the LWGroup1 group to meet the management requirements.

How should you complete the dynamic membership rule? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

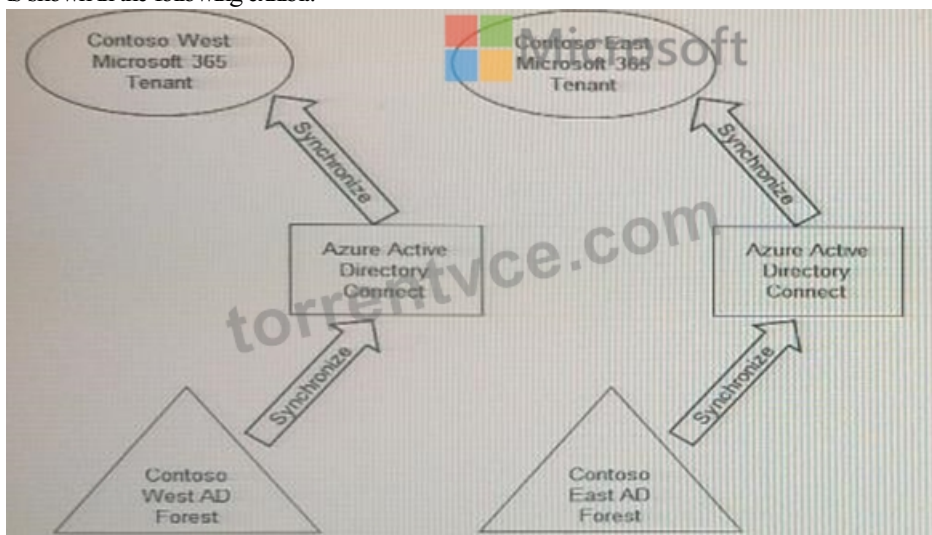

Explanation:

Null

"Member"

NEW QUESTION # 24

Your company has two divisions named Contoso East and Contoso West. The Microsoft 365 identity architecture for both divisions is shown in the following exhibit.

You need to assign users from the Contoso East division access to Microsoft SharePoint Online sites in the Contoso West tenant. The solution must not require additional Microsoft 365 licenses.

What should you do?

- A. Configure Azure AD Application Proxy in the Contoso West tenant.
- **B. Create guest accounts for all the Contoso East users in the West tenant.**
- C. Configure The exiting Azure AD Connect server in Contoso East to sync the Contoso East Active Directory forest to the Contoso West tenant.
- D. Deploy a second Azure AD Connect server to Contoso East and configure the server to sync the Contoso East Active Directory forest to the Contoso West tenant.

Answer: B

NEW QUESTION # 25

Your company has a Microsoft 365 tenant.

All users have computers that run Windows 10 and are joined to the Azure Active Directory (Azure AD) tenant.

The company subscribes to a third-party cloud service named Service1. Service1 supports Azure AD authentication and authorization based on OAuth. Service1 is published to the Azure AD gallery.

You need to recommend a solution to ensure that the users can connect to Service1 without being prompted for authentication. The

solution must ensure that the users can access Service1 only from Azure AD-joined computers. The solution must minimize administrative effort.

What should you recommend for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Ensure that the users can connect to Service1 without being prompted for authentication:

- An app registration in Azure AD
- Azure AD Application Proxy
- An enterprise application in Azure AD
- A managed identity in Azure AD

Ensure that the users can access Service1 only from the Azure AD-joined computers:

- Azure AD Application Proxy
- A compliance policy
- A conditional access policy
- An OAuth policy

Answer:

Explanation:

Ensure that the users can connect to Service1 without being prompted for authentication:

- An app registration in Azure AD
- Azure AD Application Proxy
- An enterprise application in Azure AD
- A managed identity in Azure AD

Ensure that the users can access Service1 only from the Azure AD-joined computers:

- Azure AD Application Proxy
- A compliance policy
- A conditional access policy
- An OAuth policy

Explanation:

According to the Microsoft Identity and Access Administrator (SC-300) Study Guide and Microsoft Learn modules on "Implement access management for apps" and "Implement Conditional Access policies", Azure AD provides centralized identity and access management for integrated SaaS applications (such as Service1) that support Azure AD authentication and OAuth.

* Ensure that users connect to Service1 without being prompted for authentication: When a third-party application is published in the Azure AD gallery, it supports federated single sign-on (SSO) using SAML, OAuth, or OpenID Connect. Registering the application as an enterprise application (rather than creating a new app registration) enables Azure AD to manage SSO automatically. The Microsoft documentation states:

"Enterprise applications from the Azure AD gallery can be configured for single sign-on so that users can access the app using their Azure AD credentials without being prompted to reauthenticate." Therefore, to achieve seamless sign-on with minimal administrative overhead, the correct option is An enterprise application in Azure AD.

* Ensure that users can access Service1 only from Azure AD-joined computers: To restrict access based on device compliance or join status, Azure AD uses Conditional Access policies. Conditional Access allows enforcement of conditions such as "Require device to be marked as compliant" or

"Require hybrid Azure AD-joined or Azure AD-joined device." The official Microsoft guidance under

"Plan and implement Conditional Access policies" confirms:

"You can enforce that users only access cloud resources from devices that are Azure AD-joined or compliant by applying Conditional Access device filters." Thus, to ensure that only Azure AD-joined devices can access Service1, you implement a Conditional Access policy.

NEW QUESTION # 26

You have an Azure subscription that is linked to a Microsoft Entra tenant named contoso.com. The subscription contains a group named Group1 and a virtual machine named VM1.

You need to meet the following requirements:

- * Enable a system-assigned managed identity for VM1.
- * Add VM1 to Group1.

How should you complete the PowerShell script? To answer, drag the appropriate cmdlets to the correct targets. Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Cmdlets

- Get-AzADGroup
- Get-AzADServicePrincipal
- Get-AzVM
- Update-AzADServicePrincipal
- Update-AzVM

Answer Area

```
$vm = [ ] -ResourceGroupName myResourceGroup -Name vm1
Update-AzVM -ResourceGroupName myResourceGroup -VM $vm -IdentityType SystemAssigned
$displayname = [ ] -displayname "vm1"
$group = Get-AzADGroup -searchstring "group1"
Add-AzureADGroupMember -ObjectId $group.id -RefObjectId $displayname.id
```

Answer:

Explanation:

Cmdlets

- Get-AzADGroup
- Get-AzADServicePrincipal
- Get-AzVM
- Update-AzADServicePrincipal
- Update-AzVM

Answer Area

```
$vm = Get-AzVM -ResourceGroupName myResourceGroup -Name vm1
Update-AzVM -ResourceGroupName myResourceGroup -VM $vm -IdentityType SystemAssigned
$displayname = Get-AzADServicePrincipal -displayname "vm1"
$group = Get-AzADGroup -searchstring "group1"
Add-AzureADGroupMember -ObjectId $group.id -RefObjectId $displayname.id
```

Explanation:

Cmdlets

- Get-AzADGroup
- Get-AzADServicePrincipal
- Get-AzVM
- Update-AzADServicePrincipal
- Update-AzVM

Answer Area

```
$vm = Get-AzVM -ResourceGroupName myResourceGroup -Name vm1
Update-AzVM -ResourceGroupName myResourceGroup -VM $vm -IdentityType SystemAssigned
$displayname = Get-AzADServicePrincipal -displayname "vm1"
$group = Get-AzADGroup -searchstring "group1"
Add-AzureADGroupMember -ObjectId $group.id -RefObjectId $displayname.id
```

NEW QUESTION # 27

You need to implement password restrictions to meet the authentication requirements.

You install the Azure AD password Protection DC agent on DC1.

What should you do next? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Topic 3,

Overview

A Datum Environment

The on-premises network of A. Datum contains an Active Directory Domain Services (AD DS) forest named adatum.com.

The tenant contains the users shown in the following table.

Problem Statements

- * Multiple users in the sales department have up to five devices. The sales department users report that sometimes they must contact the support department to join their devices to the Azure AD tenant because they have reached their device limit.
- * A recent security incident reveals that several users leaked their credentials, a suspicious browser was used for a sign-in, and resources were accessed from an anonymous IP address,
- * When you attempt to assign the Device Administrators role To IT_Group1, the group does NOT appear in the selection list.
- * Anyone in the organization can invite guest users, including other guests and non-administrators.
- * The helpdesk spends too much time resetting user passwords.
- * Users currently use only passwords for authentication.

Requirements

A, Datum plans to implement the following changes;

- * Configure self-service password reset {SSPR}.
- * Configure multi-factor authentication (MFA) for all users.
- * Configure an access review for an access package named Package1.
- * Require admin approval for application access to organizational data.
- * Sync the AD DS users and groupsoftware.com with the Azure AD tenant.
- * Ensure that only users that are assigned specific admin roles can invite guest users.
- * Increase the maximum number of devices that can be joined or registered to Azure AD to 10.

Technical Requirements

- * Users assigned the User administrator role must be able to request permission to use the role when needed for up to one year.
- * Users must be prompted to register for MFA and provided with an option to bypass the registration for a grace period.
- * Users must provide one authentication method to reset their password by using SSPR. Available methods must include:
 - * Email
 - * Phone
 - * Security questions
 - * The Microsoft Authenticator app
- * Trust relationships must NOT be established between the adatum.com and litware.com AD DS domains.
- * The principle of least privilege must be used.

NEW QUESTION # 28

.....

There is no another great way to pass the Microsoft SC-300 exam in the first attempt only by doing a selective study with valid SC-300 braindumps. If you already have a job and you are searching for the best way to improve your current SC-300 test situation, then you should consider the SC-300 Exam Dumps. By using our updated SC-300 products, you will be able to get reliable and relative SC-300 exam prep questions, so you can pass the exam easily. You can get one-year free SC-300 exam updates from the date of purchase.
