Pass Guaranteed 2026 Efficient Microsoft SC-401: Administering Information Security in Microsoft 365 Reliable Braindumps Ppt

It would be really helpful to purchase Administering Information Security in Microsoft 365 (SC-401) exam dumps right away. If you buy this Microsoft Certification Exams product right now, we'll provide you with up to 1 year of free updates for Administering Information Security in Microsoft 365 (SC-401) authentic questions. You can prepare using these no-cost updates in accordance with the most recent test content changes provided by the Administering Information Security in Microsoft 365 (SC-401) exam dumps.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details

Topic 1	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 2	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 3	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 4	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q255-Q260):

NEW QUESTION # 255
You have a Microsoft 365 subscription that contains the devices shown in the following table.
From which devices can Microsoft Purview Insider Risk Management capture forensic evidence?

- A. Device1 and Device2 only
- B. Device1, Device2 and Device3
- C. Device2 and Device3 only
- D. Device only
- E. Device2 only

Answer: E

Explanation:
Forensic evidence in Microsoft Purview Insider Risk Management allows capturing screenshots/clips of user activity on endpoints.
Requirements for forensic evidence capture:
The device must be onboarded to Microsoft Purview (via Defender for Endpoint).
The Microsoft Purview client must be installed.
Supported platforms: Windows 10 and Windows 11 (macOS is not supported for forensic evidence).
Now check each device:
Device1 (Windows 11) # Client installed, but not onboarded # # Not eligible.
Device2 (Windows 10) # Onboarded and client installed # # Eligible.
Device3 (macOS) # Onboarded, but client not installed and macOS is not supported # # Not eligible.
Therefore, only Device2 qualifies.

NEW QUESTION # 256
Hotspot Question
You have a Microsoft 365 ES subscription that uses Microsoft Exchange Online and Teams.
You need to ensure that when a user sends a message containing a cloud attachment, a retention label is applied to the cloud attachment by using an auto-labeling policy.

How should you configure the retention label to start the retention period, and to which locations should you apply the auto-labeling policy? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Box 1: Labeled
Automatically apply a retention label to retain or delete content
Auto-apply labels to cloud attachments
You might need to use this option if you're required to capture and retain all copies of files in your tenant that are sent over communications by users, or files that are referenced in Copilot for Microsoft 365. You use this option in conjunction with retention policies for the communication services themselves; Exchange, Teams, Viva Engage, and Copilot for Microsoft 365.
Important
When you select a label to use for auto-applying retention labels for cloud attachments, ensure that the label retention setting Start the retention period based on is When items were labeled.
Box 2: Microsoft 365 Group mailboxes & sites only
When you select a label to use for auto-applying retention labels for cloud attachments, make sure the label retention setting Start the retention period based on is When items were labeled.
When you configure the locations for this option, you can select:
* SharePoint classic and communication sites for shared files stored in SharePoint communication sites, team sites that aren't connected by Microsoft 365 groups, and classic sites.
*-> Microsoft 365 Groups for shared files that are stored in team sites connected by Microsoft 365 groups.
* OneDrive accounts for shared files stored in users' OneDrive.

NEW QUESTION # 257
You have a Microsoft 365 subscription that contains two Microsoft SharePoint Online sites named Site1 and Site2. You plan to use policies to meet the following requirements:
* Add a watermark of Confidential to a document if the document contains the words Project1 or Project2.
* Retain a document for seven years if the document contains credit card information.
* Add a watermark of Internal Use Only to all the documents stored on Site2.
* Add a watermark of Confidential to all the documents stored on Site1.
You need to recommend the minimum number of sensitive info types required.
How many sensitive info types should you recommend?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 258
Hotspot Question
You have a Microsoft 365 E5 tenant that contains a trainable classifier named Classifier1.
You need to increase the accuracy of Classifier1. The solution must use the principle of least privilege.
Which feature should you use and to which role group should you be added? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Box 1: Content Explorer

Increase classifier accuracy

Classifiers, like sensitive information types (SIT) and trainable classifiers are used in various kinds of policies to identify sensitive information. Like most such models, sometimes they identify an item as being sensitive that isn't. Or, they may not identify an item as being sensitive when it actually is. These are called false positives and false negatives.

Box 2: Compliance data administrator

Permissions

In order to get access to the content explorer tab, an account must be assigned membership in any one of these roles or role groups.

Microsoft 365 role groups

Global administrator

Compliance administrator

Security administrator

*-> Compliance data administrator

NEW QUESTION # 259

You have a Microsoft 365 E5 subscription that uses Microsoft Purview.

You are evaluating the use of custom data assessment scans to identify the potential oversharing of data in the subscription.

What is the maximum number of items the data assessments can support per location?

- A. 50,000
- B. 200,000
- C. 500,000
- D. 100,000

Answer: B

Explanation:

Data risk assessments currently support a maximum of 200,000 items per location.
