

# No Need for Software Installation for the Web-Based Archer Archer-Expert Practice Exam

The Archer-Expert exam materials are in the process of human memory, is found that the validity of the memory used by the memory method and using memory mode decision, therefore, the Archer-Expert training materials in the process of examination knowledge teaching and summarizing, use for outstanding education methods with emphasis, allow the user to create a chain of memory, the knowledge is more stronger in my mind for a long time by our Archer-Expert study engine.

The efficiency of our Archer-Expert exam braindumps has far beyond your expectation. On one hand, our Archer-Expert study materials are all the latest and valid exam questions and answers that will bring you the pass guarantee. on the other side, we offer this after-sales service to all our customers to ensure that they have plenty of opportunities to successfully pass their actual exam and finally get their desired certification of Archer-Expert Learning Materials.

## 100% Pass 2026 Archer-Expert: Fantastic Archer Certified Administrator-Expert Reliable Exam Cost

Sometimes a small step is possible to be a big step in life. Archer-Expert exam seems just a small exam, but to get the Archer-Expert certification exam is to be reckoned in your career. Such an international certification is recognition of your IT skills. In addition, except Archer-Expert, many other certification exams are also useful. The latest information of these tests can be found in our Actual4dump.

### Archer Certified Administrator-Expert Sample Questions (Q38-Q43):

#### NEW QUESTION # 38

Which statement best describes the advantages of using SSO in Archer?

- A. Improved Security
- B. Increased Productivity
- C. All these answers are correct
- D. Reduced Password Fatigue and Help Desk Costs

**Answer: C**

Explanation:

According to the Archer Administration and Security documentation, Single Sign-On (SSO) integration provides a multi-faceted advantage for both the end-user and the system administrator. Reduced Password Fatigue occurs because users no longer need to remember unique credentials for Archer, which directly leads to a decrease in Help Desk Costs associated with password reset requests. Increased Productivity is achieved through seamless access; users can move from their workstation or corporate portal directly into Archer without the interruption of a manual login prompt.

+1

Furthermore, Improved Security is a primary driver for SSO. By leveraging centralized authentication providers (like Active Directory via SAML 2.0 or Windows Integrated Authentication), Archer administrators ensure that corporate password policies (complexity, rotation, and MFA) are strictly enforced. When an employee leaves the organization and their account is disabled in the central directory, their access to Archer is revoked instantaneously. This eliminates the risk of "orphan accounts" existing within the Archer user database. Therefore, because SSO addresses administrative overhead, user experience, and enterprise-grade security protocols simultaneously, "All these answers are correct" is the verified professional standard.

#### NEW QUESTION # 39

Details such as installation history, applications, solutions, jobs, Top 10 field histories are viewed in:

- A. Installation Report
- **B. Instance Report**
- C. Access Control Report
- D. Application builder Report

**Answer: B**

Explanation:

The Instance Report is a comprehensive diagnostic document that provides a "snapshot" of an entire Archer instance. According to the Archer Administration II curriculum, this report is found within the Archer Control Panel (ACP) or can be generated from the Administration workspace.

It is specifically designed to aid in troubleshooting and system auditing. It contains metadata about the installation history, a list of all applications and solutions, and the status of background jobs. Most importantly, it includes performance-related data such as the Top 10 field histories (identifying which fields are growing the fastest in the database) and record counts. This report is often requested by Archer Support when investigating system-wide performance issues, as it aggregates critical architectural data into a single, readable view that is more holistic than an Access Control or Application Builder report.

#### NEW QUESTION # 40

Select the service which must always run for Archer to properly function.

- A. Queuing service
- B. LDAP Synchronization service
- **C. Configuration service**
- D. Job Engine service

**Answer: C**

Explanation:

As detailed in the Archer Installation and Troubleshooting guide, the Archer Configuration Service is the foundational "heartbeat" of the platform. While the Job Engine (Option D) and Queuing Service (Option B) are essential for processing background tasks, the system cannot initialize or connect to the instance database without the Configuration Service.

The Configuration Service is responsible for retrieving settings from the Archer Control Panel (ACP) and providing them to the web server and other services. If this service is stopped, the Archer web interface will fail to load, and administrators will be unable to make any changes to the instance through the ACP. LDAP Synchronization (Option C) is a scheduled task and does not need to be running constantly for the platform to remain operational. Therefore, from an architectural standpoint, the Configuration Service is the mandatory prerequisite for all other platform functions.

#### NEW QUESTION # 41

The main goal of using SSO in an Archer environment is to:

- A. Have end users insert their username and password each time they log into Archer
- **B. Facilitate the login experience to end users by using only one set of credentials across all their applications**
- C. Facilitate the login experience to Admin users only
- D. Bypass the default Archer Security Parameters for the user

**Answer: B**

Explanation:

The primary driver for Single Sign-On (SSO) in an Archer environment is user convenience and centralized identity management. As taught in Archer Administration II, the "goal" of SSO is to reduce the friction of accessing the platform. By allowing users to leverage their existing corporate credentials (via SAML, Windows Integrated, or LDAP), they can access Archer without needing to maintain a separate, "native" Archer password.

This strategy improves security by centralizing credential management in a single Identity Provider (IdP), where Multi-Factor Authentication (MFA) and account revocation policies can be strictly enforced. Option A is incorrect because SSO actually helps enforce enterprise security parameters rather than bypassing them.

Option B is false because SSO is intended for all users, not just admins. Option C describes the opposite of SSO. Ultimately, the successful implementation of SSO ensures that users have a seamless transition into Archer while the organization maintains a high standard of access control.

#### NEW QUESTION # 42

The default authentication mechanism in Archer is SSO.

- A. TRUE
- B. FALSE

**Answer: B**

Explanation:

This statement is FALSE. The default authentication mechanism for a fresh installation of Archer is Archer Native Authentication. As detailed in the Archer Installation and Troubleshooting guide, when an instance is first created, it relies on the internal Archer database to store usernames and encrypted passwords.

Single Sign-On (SSO), whether it be Windows Integrated, SAML, or LDAP-based, is an opt-in configuration that must be manually enabled and configured by a System Administrator within the Archer Control Panel (ACP). Native authentication remains the fallback method and is used for the initial "System Administrator" account setup. While most enterprise organizations quickly transition to SSO for security and convenience, the platform itself defaults to its own internal authentication engine to ensure the system is accessible immediately after installation without requiring a pre-existing connection to an Identity Provider (IdP).

#### NEW QUESTION # 43

.....

Actual4dump is famous for high-quality certification exam Archer-Expert guide materials in this field recent years. All buyers enjoy the privilege of 100% pass guaranteed by our excellent Archer-Expert exam questions; our Archer-Expert actual questions and answers find the best meaning in those who have struggled hard to pass Archer-Expert Certification exams with more than one attempt. We have special information channel which can make sure that our exam Archer-Expert study materials are valid and the latest based on the newest information.

**Reliable Archer-Expert Test Labs:** <https://www.actual4dump.com/Archer/Archer-Expert-actualtests-dumps.html>

Besides, we provide new updates of the Archer Archer-Expert exam study material lasting for one year after you place your order, which means you can master the new test points based on real test, Archer Archer-Expert Reliable Exam Cost The efforts you have made are proportional to the returns you have gained, Archer Archer-Expert Reliable Exam Cost On the other hands, we support multi-channel payment platform with credit card.

May the force and caffeine be with you, may you keep your back to Archer-Expert the wind and may the sun shine on your face, Many also reported consumers ordering fewer drinks and switching to cheaper drinks.

### **Archer-Expert Test Engine Preparation: Archer Certified Administrator-Expert - Archer-Expert Study Guide - Actual4dump**

Besides, we provide new updates of the Archer Archer-Expert Exam study material lasting for one year after you place your order, which means you can master the new test points based on real test.

The efforts you have made are proportional to the returns you have gained, On Archer-Expert Reliable Exam Cost the other hands, we support multi-channel payment platform with credit card, A technique to carry out that is by the use of the chief MBA software.

Once the candidate is a Archer certified, New Archer-Expert Exam Guide he gets multiple good career opportunities in the Archer sector.
