

[2026] Microsoft DP-420 Questions: Fosters Your Exam Passing Abilities

P.S. Free 2026 Microsoft DP-420 dumps are available on Google Drive shared by TestPassed: <https://drive.google.com/open?id=1a4BFp7uI5a3XphRstT1uy1HL0H8gaORr>

We are aware that taking the Microsoft DP-420 certification exam may be quite expensive. To save you money, we provide you with up to 1 year of free DP-420 exam questions updates. Moreover, you can check out the features of our TestPassed's DP-420 practice exam material by downloading a free demo. We provide you with a Free DP-420 Exam Questions demo to assist you in making a decision that is well-informed. We are sure that by preparing with updated our Microsoft DP-420 exam questions you can get success and save both time and money.

The DP-420 Certification Exam consists of multiple-choice questions that cover a range of topics related to designing and implementing cloud-native applications using Azure Cosmos DB. Candidates will be tested on their ability to design containers and partitions, implement data modeling best practices, optimize query performance, and configure and manage Azure Cosmos DB instances.

2026 New DP-420 Test Sims Pass Certify | Pass-Sure Latest Test DP-420 Simulations: Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB

Many candidates do not have actual combat experience, for the qualification examination is the first time to attend, so about how to get the test Microsoft certification didn't own a set of methods, and cost a lot of time to do something that has no value. With our DP-420 exam Practice, you will feel much relax for the advantages of high-efficiency and accurate positioning on the content and formats according to the candidates' interests and hobbies. Numerous grateful feedbacks from our loyal customers proved that we are the most popular vendor in this field to offer our DP-420 Preparation questions.

Microsoft Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Sample Questions (Q20-Q25):

NEW QUESTION # 20

You have a container in an Azure Cosmos DB Core (SQL) API account.

You need to use the Azure Cosmos DB SDK to replace a document by using optimistic concurrency.

What should you include in the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: ConsistencyLevel

The ItemRequestOptions Class ConsistencyLevel property gets or sets the consistency level required for the request in the Azure Cosmos DB service.

Azure Cosmos DB offers 5 different consistency levels. Strong, Bounded Staleness, Session, Consistent Prefix and Eventual - in order of strongest to weakest consistency.

Box 2: _etag

The ItemRequestOptions class helped us implement optimistic concurrency by specifying that we wanted the SDK to use the If-Match header to allow the server to decide whether a resource should be updated. The If-Match value is the ETag value to be checked against. If the ETag value matches the server ETag value, the resource is updated.

<https://cosmosdb.github.io/labs/dotnet/labs/10-concurrency-control.html>

NEW QUESTION # 21

You have the following query.

```
SELECT * FROM
WHERE c.sensor = "TEMP1"
AND c.value < 22
AND c.timestamp >= 1619146031231
```

You need to recommend a composite index strategy that will minimize the request units (RUs) consumed by the query.

What should you recommend?

- A. a composite index for (value ASC, sensor ASC) and a composite index for (timestamp ASC, sensor ASC)
- **B. a composite index for (sensor ASC, value ASC) and a composite index for (sensor ASC, timestamp ASC)**
- C. a composite index for (sensor ASC, value ASC, timestamp ASC) and a composite index for (sensor DESC, value DESC, timestamp DESC)
- D. a composite index for (sensor ASC, value ASC, timestamp ASC)

Answer: B

Explanation:

If a query has a filter with two or more properties, adding a composite index will improve performance.

Consider the following query:

```
SELECT * FROM c WHERE c.name = "Tim" and c.age > 18
```

In the absence of a composite index on (name ASC, and age ASC), we will utilize a range index for this query.

We can improve the efficiency of this query by creating a composite index for name and age.

Queries with multiple equality filters and a maximum of one range filter (such as > < <= >= !=) will utilize the composite index.

NEW QUESTION # 22

You need to select the capacity mode and scale configuration for account2 to support the planned changes and meet the business requirements. What should you select? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

Explanation:

□

NEW QUESTION # 23

You have an Azure Cosmos DB container named owners. Each item in owners represents an owner and their pets. The following is a sample of the JSON

□ You are writing a query that will retrieve the average age of each pet owned by each owner, if the pet is older than two years.

How should you complete the query? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes 01 scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

.....

NEW QUESTION # 24

You have an Azure Cosmos DB Core (SQL) API account named storage1 that uses provisioned throughput capacity mode. The storage1 account contains the databases shown in the following table.

The databases contain the containers shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

.....

Answer:

Explanation:

Explanation:

Box 1: No

Four containers with 1000 RU/s each.

Box 2: No

Max 8000 RU/s for db2. 8 containers, so 1000 RU/s for each container.

Box 3: Yes

Max 8000 RU/s for db2. 8 containers, so 1000 RU/s for each container. Can very well add an additional container.
