

Microsoft SC-100 Latest Dumps Free, SC-100 Clear Exam

2026 Latest Exams Torrent SC-100 PDF Dumps and SC-100 Exam Engine Free Share: <https://drive.google.com/open?id=1GmoMGihJ6BwSLaszHY9uzh6prHCRhoF>

The exam outline will be changed according to the new policy every year, and the SC-100 questions torrent and other teaching software, after the new exam outline, we will change according to the syllabus and the latest developments in theory and practice and revision of the corresponding changes, highly agree with outline. The SC-100 exam questions are the perfect form of a complete set of teaching material, teaching outline will outline all the knowledge points covered, comprehensive and no dead angle for the SC-100 candidates presents the proposition scope and trend of each year, truly enemy and know yourself, and fight. Only know the outline of the SC-100 exam, can better comprehensive review, in the encounter with the new and novel examination questions will not be confused, interrupt the thinking of users.

Microsoft SC-100 certification is a valuable credential for professionals who wish to advance their career in the cybersecurity field. It demonstrates to employers that the candidate has the skills and knowledge required to design and implement secure solutions that protect sensitive information and systems. Furthermore, the certification can lead to increased job opportunities, higher salaries, and greater job security.

What is the exam cost of the Microsoft SC-100 Certification Exam

The Microsoft SC-100 Certification Exam cost is 165 USD.

Learn The Microsoft SC-100 Real Exam Dumps - To Gain Brilliant Result

The learners' learning conditions are varied and many of them may have no access to the internet to learn our SC-100 study materials. If the learners leave home or their companies they can't link the internet to learn our SC-100 study materials. But you use our APP online version you can learn offline. If only you use the SC-100 study materials in the environment of being online for the first time you can use them offline later. So it will be very convenient for every learner because they won't worry about when they go out or go to the remote area that they can't link the internet to learn our SC-100 Study Materials, and they can use our APP online version to learn at any place or time. That's the great merit of our APP online version and the learners who have difficulties in linking the internet outside their homes or companies can utilize this advantage, they can learn our SC-100 study materials at any place.

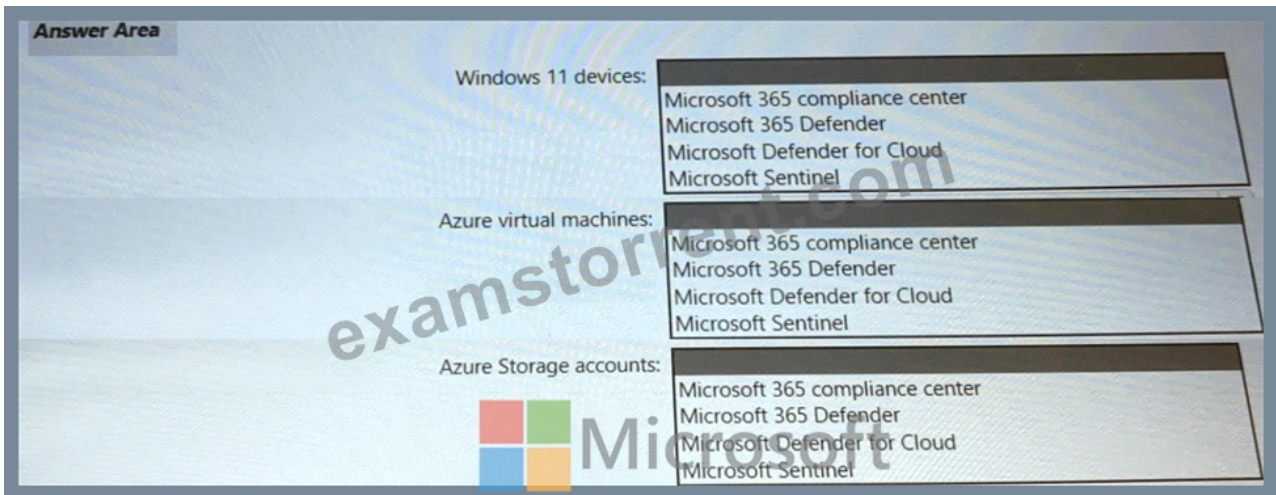

Microsoft Cybersecurity Architect Sample Questions (Q230-Q235):

NEW QUESTION # 230

You have a Microsoft 365 E5 subscription and an Azure subscripys You need to evaluate the existing environment to increase the overall security posture for the following components:

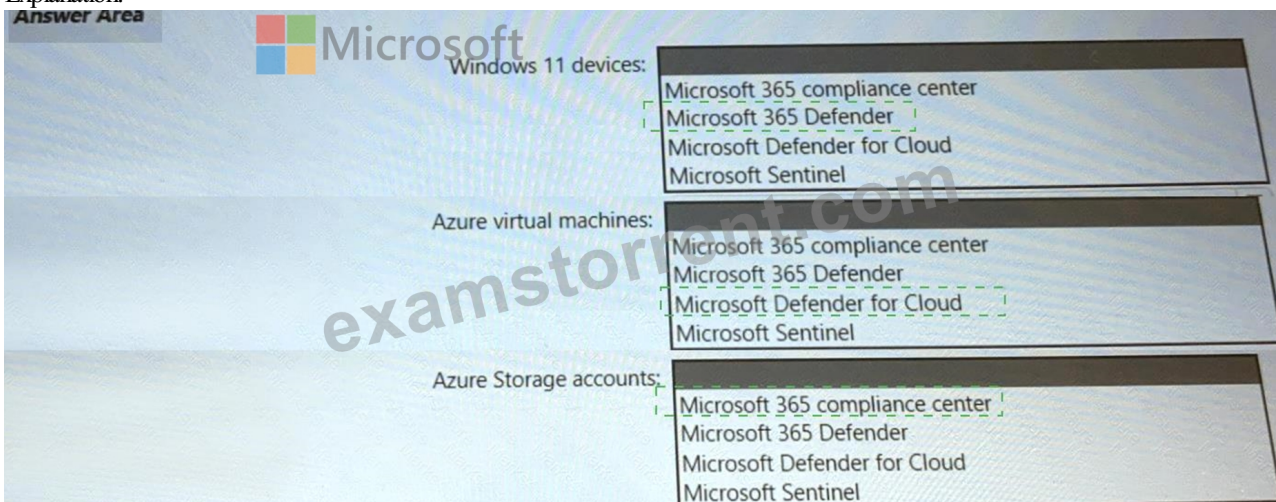

- * Windows 11 devices managed by Microsoft Intune
- * Azure Storage accounts
- * Azure virtual machines

What should you use to evaluate the components? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

Explanation

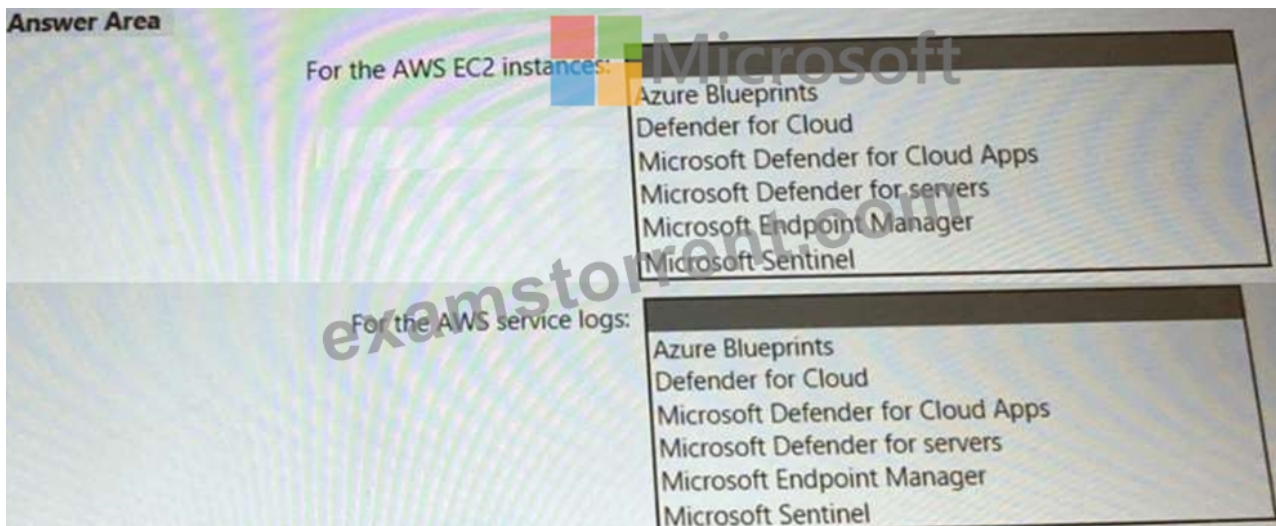

NEW QUESTION # 231

You need to recommend a solution to meet the AWS requirements.

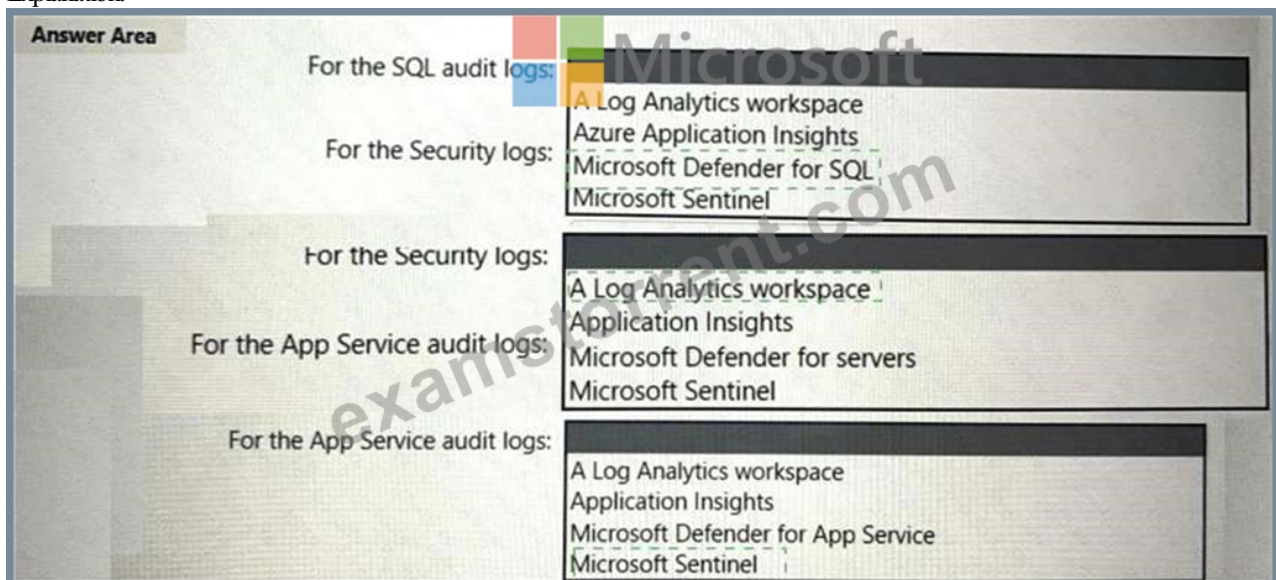

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Topic 1, Litware, inc. Case Study 2

Overview

Litware, inc. is a financial services company that has main offices in New York and San Francisco. Litware has 30 branch offices and remote employees across the United States. The remote employees connect to the main offices by using a VPN.

Litware has grown significantly during the last two years due to mergers and acquisitions. The acquisitions include several companies based in France.

Existing Environment

Litware has an Azure Active Directory (Azure AD) tenant that syncs with an Active Directory Domain Services (AD DS) forest named Utvare.com and is linked to 20 Azure subscriptions. Azure AD Connect is used to implement pass-through authentication. Password hash synchronization is disabled, and password writeback is enabled. All Litware users have Microsoft 365 E5 licenses. The environment also includes several AD DS forests, Azure AD tenants, and hundreds of Azure subscriptions that belong to the subsidiaries of Litware.

Planned Changes

Litware plans to implement the following changes:

- * Create a management group hierarchy for each Azure AD tenant.
- * Design a landing zone strategy to refactor the existing Azure environment of Litware and deploy all future Azure workloads.
- * Implement Azure AD Application Proxy to provide secure access to internal applications that are currently accessed by using the VPN.

Business Requirements

Litware identifies the following business requirements:

- * Minimize any additional on-premises infrastructure.
- * Minimize the operational costs associated with administrative overhead.

Hybrid Requirements

Litware identifies the following hybrid cloud requirements:

- * Enable the management of on-premises resources from Azure, including the following:
- * Use Azure Policy for enforcement and compliance evaluation.
- * Provide change tracking and asset inventory.
- * Implement patch management.
- * Provide centralized, cross-tenant subscription management without the overhead of maintaining guest accounts.

Microsoft Sentinel Requirements

Litware plans to leverage the security information and event management (SIEM) and security orchestration automated response (SOAR) capabilities of Microsoft Sentinel. The company wants to centralize Security Operations Center (SOC) by using Microsoft Sentinel.

Identity Requirements

Litware identifies the following identity requirements:

- * Detect brute force attacks that directly target AD DS user accounts.
- * Implement leaked credential detection in the Azure AD tenant of Litware.
- * Prevent AD DS user accounts from being locked out by brute force attacks that target Azure AD user accounts.
- * Implement delegated management of users and groups in the Azure AD tenant of Litware, including support for:
 - * The management of group properties, membership, and licensing
 - * The management of user properties, passwords, and licensing
 - * The delegation of user management based on business units.

Regulatory Compliance Requirements

Litware identifies the following regulatory compliance requirements:

- * Insure data residency compliance when collecting logs, telemetry, and data owned by each United States- and France-based subsidiary.
- * Leverage built-in Azure Policy definitions to evaluate regulatory compliance across the entire managed environment.
- * Use the principle of least privilege.

Azure Landing Zone Requirements

Litware identifies the following landing zone requirements:

- * Route all internet-bound traffic from landing zones through Azure Firewall in a dedicated Azure subscription.
- * Provide a secure score scoped to the landing zone.
- * Ensure that the Azure virtual machines in each landing zone communicate with Azure App Service web apps in the same zone over the Microsoft backbone network, rather than over public endpoints.
- * Minimize the possibility of data exfiltration.
- * Maximize network bandwidth.

The landing zone architecture will include the dedicated subscription, which will serve as the hub for internet and hybrid connectivity.

Each landing zone will have the following characteristics:

- * Be created in a dedicated subscription.
- * Use a DNS namespace of litware.com.

Application Security Requirements

Litware identifies the following application security requirements:

- * Identify internal applications that will support single sign-on (SSO) by using Azure AD Application Proxy.
- * Monitor and control access to Microsoft SharePoint Online and Exchange Online data in real time.

NEW QUESTION # 232

Hotspot Question

You are designing security for a runbook in an Azure Automation account. The runbook will copy data to Azure Data Lake Storage Gen2.

You need to recommend a solution to secure the components of the copy process.

What should you include in the recommendation for each component? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Data security:

Access keys stored in Azure Key Vault
Automation Contributor built-in role
Azure Private Link with network service tags
Azure Web Application Firewall rules with network service tags

Network access control:

Access keys stored in Azure Key Vault
Automation Contributor built-in role
Azure Private Link with network service tags
Azure Web Application Firewall rules with network service tags

Answer:

Explanation:

Answer Area

Data security:

Access keys stored in Azure Key Vault
Automation Contributor built-in role
Azure Private Link with network service tags
Azure Web Application Firewall rules with network service tags

Network access control:

Access keys stored in Azure Key Vault
Automation Contributor built-in role
Azure Private Link with network service tags
Azure Web Application Firewall rules with network service tags

Explanation:

Box 1: Access Keys stored in Azure Key Vault

Box 2: Azure Private Link with network service tags

NEW QUESTION # 233

You have a Microsoft Entra tenant. The tenant contains 500 Windows devices that have the Global Secure Access client deployed.

You have a third-party software as a service (SaaS) app named App1.

You plan to implement Global Secure Access to manage access to App1.

You need to recommend a solution to manage connections to App1. The solution must ensure that users authenticate by using their Microsoft Entra credentials before they can connect to App1.

What should you include the recommendation?

- A. a Global Secure Access app
- B. a Quick Access app
- C. an internet access traffic forwarding profile
- D. a private access traffic forwarding profile

Answer: A

Explanation:

Global Secure Access app is the best solution to manage access to a third-party SaaS application, such as App1. By configuring this app within A Microsoft Entra, you can enforce authentication policies that require users to log in with their Microsoft Entra credentials before accessing the SaaS application. This setup provides centralized access management, secure access controls, and ensures consistent user authentication for App1.

NEW QUESTION # 234

You have an Azure subscription that contains an Azure Synapse Analytics workspace named workspace1. workspace1 contains a built-in serverless SQL pool and a dedicated SQL pool named Pool1.

You need to recommend a second layer of data encryption for workspace1.

What should you include in the recommendation for each pool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
