

New HPE0-S59 Test Book | HPE0-S59 Online Tests

What's more, part of that TestsDumps HPE0-S59 dumps now are free: https://drive.google.com/open?id=1U_fRtbBykCrijsz_i99ValAPTGkWR68Z

The HPE Compute Solutions HPE0-S59 practice test is available in three compatible and user-friendly formats. These formats are HPE0-S59 desktop practice test software, HPE Compute Solutions HPE0-S59 web-based practice exam, and HP HPE0-S59 PDF dumps file. All three formats of HPE0-S59 study material contain actual and verified HPE Compute Solutions HPE0-S59 Exam Dumps that will help you boost your exam preparation. The HP desktop practice test software and web-based HPE0-S59 practice test both simulate the actual exam environment and identify your mistakes.

HPE Apollo systems are high-performance computing solutions that are optimized for big data, analytics, and artificial intelligence workloads. The HPE0-S59 exam covers topics such as HPE Apollo architecture, management, and deployment. HPE SimpliVity solutions provide hyperconverged infrastructure that combines compute, storage, and networking in a single solution. HPE0-S59 exam covers topics such as HPE SimpliVity architecture, management, and deployment. Overall, the HP HPE0-S59 (HPE Compute Solutions) Exam is an important certification for IT professionals who work with HPE compute solutions.

HP HPE0-S59 (HPE Compute Solutions) Exam is a certification exam that is designed to test the skills and knowledge of IT professionals in the area of HPE compute solutions. HPE0-S59 exam is intended for individuals who are interested in proving their proficiency in the design, deployment, and management of HPE compute solutions, including HPE ProLiant, BladeSystem, and Synergy server solutions.

HP HPE0-S59 Exam | New HPE0-S59 Test Book - Offer you Valid HPE0-S59 Online Tests

The efficiency of our HPE0-S59 exam braindumps has far beyond your expectation. On one hand, our HPE0-S59 study materials are all the latest and valid exam questions and answers that will bring you the pass guarantee. on the other side, we offer this after-sales service to all our customers to ensure that they have plenty of opportunities to successfully pass their actual exam and finally get their desired certification of HPE0-S59 Learning Materials.

HP HPE0-S59 (HPE Compute Solutions) certification exam is a challenging and valuable credential for IT professionals working in

the field of HPE compute solutions. HPE0-S59 exam covers a range of topics related to server architecture, storage solutions, virtualization, and cloud computing and is designed to test the candidate's ability to design, deploy, and manage HPE compute solutions in a variety of environments. Candidates should be prepared to spend several months preparing for the exam and using study resources to help them succeed.

HPE Compute Solutions Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which statement about manual orchestration during the firmware update is true?

- A. It provides an ability to select and update one side of the Interconnect topology at a time
- B. It is supported only for logical enclosures with at least three frames
- C. It allows all the interconnect modules to be activated manually at the same time.
- D. It provides the ability to install an older firmware version than currently installed in the interconnect

Answer: A

NEW QUESTION # 63

After HPE Superdome Flex deployment and nPar setup, you need to verify health status of HPE Superdome Flex components. Put the steps on the left into the correct order on the right to perform this task.

Answer:

Explanation:

- * Open SSH client: Begin by opening an SSH client on your computer. This client will be used to establish a secure connection to the Rack Management Controller (RMC).
- * Open session to RMC: Use the SSH client to open a session to the RMC. The RMC is the central management component for the HPE Superdome Flex system.
- * Enter show health command: Once connected to the RMC, enter the show health command. This command will provide detailed information about the health status of various components within the Superdome Flex system.
- * Confirm health status: Review the output of the show health command to confirm the health status of the Superdome Flex components. This step ensures that all components are functioning correctly and identifies any potential issues.

NEW QUESTION # 64

In the past, a customer experienced a networking issue where network ports went down and came back up in quick succession. Which HPE Virtual Connect SE 100 Gb F32 Module for HPE Synergy feature can be configured to disable such ports?

- A. Port flap protection
- B. sFlow
- C. Storm control
- D. Pause flood protection

Answer: A

Explanation:

The phenomenon where a physical network port (uplink, downlink, or stacking port) transitions between "up" and "down" states repeatedly in a short period is known as port flapping. This behavior can cause significant instability in a network fabric, as it forces the switch to constantly update its MAC address tables and can trigger spanning tree recomputations.

- * Port Flap Protection: HPE OneView (managing the HPE Virtual Connect SE 100 Gb F32 and 40 Gb F8 modules) includes a feature specifically called Port flap protection (sometimes referred to as link fault monitoring).

- * Configurable Thresholds: Administrators can configure this feature within the Logical Interconnect Group (LIG) or Logical Interconnect (LI) settings. You can define a threshold (e.g., a certain number of flaps within a specific interval).

- * Action on Detection: When the threshold is exceeded, the feature can be set to "Detect and disable ports." Once a port is disabled by this protection mechanism, it remains in a disabled state until an administrator manually resets it, preventing the "flapping" port from further disrupting the network.

- * Comparison to other options:

- * sFlow (B): A monitoring protocol used to sample network traffic for analysis; it does not take corrective action like disabling ports.

* Pause flood protection (C): This feature protects against a " storm " of Ethernet PAUSE frames (flow control), which can exhaust switch buffers. While it can also disable ports, the trigger is traffic-based (PAUSE frames), not the physical link-state toggling described in the prompt.

* Storm control (D): This limits the amount of broadcast, multicast, or unknown unicast traffic allowed on a port to prevent a broadcast storm; it does not monitor link-up/link-down transitions.

NEW QUESTION # 65

Which statement about HPE OneView milestone releases is true?

- A. A milestone release is available for selected partners that give access to HPE OneView features which are not officially announced.
- **B. A milestone release is a release which must be installed on HPE Composer to support current version of the Service Pack for Synergy**
- C. A milestone release is a release that is published when HPE releases new hardware components to immediately support new systems
- D. A milestone release is a release with an enhanced update architecture that is a prerequisite prior to updating to a subsequent release.

Answer: B

NEW QUESTION # 66

Your customer plans to add four HPE Synergy frames to an existing management ring. All installed frames are equipped with two 2-port FLM modules, while new frames will be equipped with 4-port FLM modules.

Which statement about mixing different FLM modules is true?

- **A. A management ring with mixed FLM modules cannot have more than 12 frames**
- B. Mixing different FLM modules is allowed if all of them have the same firmware version
- C. Existing 2-port FLM modules must be replaced with 4-port FLM modules
- D. A management ring can contain mixed frame link module configurations

Answer: A

NEW QUESTION # 67
