If you use our products, I believe it will be very easy for you to successfully pass your 312-76 exam. Of course, if you unluckily fail to pass your exam, don't worry, because we have created a mechanism for economical compensation. You just need to give us your test documents and transcript, and then our 312-76 prep torrent will immediately provide you with a full refund, you will not lose money. More importantly, if you decide to buy our 312-76 exam torrent, we are willing to give you a discount, you will spend less money and time on preparing for your 312-76 exam.

Prerequisites for EC-Council 312-76 Exam

The target audience for the certification exam includes the IT risk consultants and managers as well as IT professionals within the system administration or BC/DR domain. It also includes the IT Directors, CISOs, and those who are looking to establish their skills in the IT business domain. The potential candidates for this qualifying test are required to have a working knowledge of different aspects of the organization and should also possess an understanding of the key resources and functional processes of the company. They also need a thorough insight of current planning technologies and techniques of disaster recovery as well as the techniques utilized in performing business impact analysis and risk analysis. The applicants should also have a working knowledge of voice communications & data, and data processing as well as possess excellent project management skills.

This software mimics the style of real test so that users find out pattern of the real test and kill the exam anxiety. DumpExam offline practice exam is customizable and users can change questions and duration of EC-Council Disaster Recovery Professional (EDRP) (312-76) mock tests. All the given practice questions in the desktop software are identical to the EC-Council Disaster Recovery Professional (EDRP) (312-76) actual test.

How much 312-76 Exam Cost

The price of the 312-76 Exam is $950 USD.

EC-COUNCIL EC-Council Disaster Recovery Professional (EDRP) Sample Questions (Q207-Q212):

NEW QUESTION # 207
Della works as a security manager for SoftTech Inc. She is training some of the newly recruited personnel in the field of security management. She is giving a tutorial on DRP.
She explains that the major goal of a disaster recovery plan is to provide an organized way to make decisions if a disruptive event occurs and asks for the other objectives of the DRP.
If you are among some of the newly recruited personnel in SoftTech Inc, what will be your answer for her question?
Each correct answer represents a part of the solution. Choose three.

- A. Protect an organization from major computer services failure.
- B. Guarantee the reliability of standby systems through testing and simulation.
- C. Maximize the decision-making required by personnel during a disaster.
- D. Minimize the risk to the organization from delays in providing services.

Answer: A,B,D

NEW QUESTION # 208
Fred identified that his organization was vulnerable to mainly two risks:
a. One was a sudden power outage that could damage critical data.
b. Second was the malicious attachment in an email. Since Fred's organization received many emails enquiring about the services from unknown sources.
To face these risks, Fred decided to take some cautionary measures. Despite his office being in a locality where power was seldom disrupted, there had been instances in the past when the authorities shut down power without warning owing to an oncoming storm. Hence, Fred had a backup generator installed. Then, Fred asked his IT team to install a malware and spam protection software at the mail server to scan all the emails coming to the organization. Additionally, he also had an eight-hour backup system installed in his organization's server room. This would give him enough time to properly power down the servers. These two steps by him greatly mitigated the two primary risks faced by his organization. Which process did Fred go through?

- A. Risk Management
- B. Risk Mitigation
- C. Risk Assessment
- D. Risk Identification

Answer: B

Explanation:
Risk Mitigation involves implementing measures (e.g., generator, malware protection) to reduce identified risks' impact or likelihood, as Fred did.
* Option A (Assessment):Evaluating risks, not acting.
* Option B (Management):Broader process including mitigation.
* Option C (Identification):Naming risks, not mitigating.
* "Risk Mitigation applies specific actions to lessen the impact or probability of identified risks, such as power or email threats" (Module: Risk Management, Section: Mitigation Strategies).

NEW QUESTION # 209

You are an Incident manager in Orangesect.Inc. You have been tasked to set up a new extension of your enterprise. The networking, to be done in the new extension, requires different types of cables and an appropriate policy that will be decided by you. Which of the following stages in the Incident handling process involves your decision making?

- A. Preparation
- B. Containment
- C. Identification
- D. Eradication

Answer: A

NEW QUESTION # 210

Which of the following terms refers to a storage system that consists of hard disk drives (HDDs) that look and act like a physical tape library?

- A. Snapshot
- B. Virtual Tape Library (VTL)
- C. Mirroring
- D. Disk-to-Disk (D2D)

Answer: B

Explanation:

A Virtual Tape Library (VTL) is a disk-based storage system designed to emulate traditional tape libraries, allowing organizations to use existing tape backup software with faster disk-based storage. It uses HDDs to mimic tape functionality, improving backup and recovery speed.
* Option B (Mirroring):Involves duplicating data across drives, not emulating tape.
* Option C (Disk-to-Disk):Refers to disk-based backups but not specifically tape emulation.
* Option D (Snapshot):A point-in-time copy of data, not a tape-like system.
* EDRP v3 covers VTL as a modern backup solution under storage technologies, noting its role in bridging tape and disk systems (Module: Data Backup and Recovery).

NEW QUESTION # 211

Alan wants to start backing up the news articles his team generates every day. Usually, his team churns out three or four articles daily. Since the time taken to back up the articles is essentially a downtime for the team, he does not want the backing up process to be too time-consuming. Which of the following backups would suit Alan's needs?

- A. Differential Backup
- B. Online Data Backup
- C. Incremental Backup
- D. Full System Backup

Answer: C

Explanation:

An Incremental Backup only backs up files changed or added since the last backup (full or incremental), making it faster and less disruptive, ideal for Alan's daily, small-volume needs.
* Option B (Differential Backup):Backs up all changes since the last full backup, growing larger and slower over time.
* Option C (Full System Backup):Copies everything, time-consuming and unnecessary here.
* Option D (Online Data Backup):A method, not a type; could be any backup, but not specific.
* "Incremental Backups minimize downtime by capturing only changes since the last backup, suitable for frequent, low-volume data updates" (Module: Data Backup and Recovery, Section: Backup Types).
