Slack-Admn-201 Pdf Files, Slack-Admn-201 Verified Answers

If you use our Slack-Admn-201 practice test software, you can prepare for the exam in an atmosphere that is quite similar to the Slack-Admn-201 real test, which will greatly aid in your preparation. The Salesforce Slack-Admn-201 desktop practice exam software keeps track of your previous tries. This feature will help you identify where you need the most improvement so you can focus your efforts and boost your score the next time you take the Salesforce Certified Slack Administrator (Slack-Admn-201) practice test.

Salesforce Certified Slack Administrator Sample Questions (Q163-Q168):

NEW QUESTION # 163

You're a Workspace Admin on the Slack Business+ plan. Your company, Hurricane Inc., recently acquired another company, Tidepool Ltd., that uses the Slack Pro plan. You need to consolidate Tidepool's Slack workspace into Hurricane's workspace. What is the best option for moving Tidepool's channels?
(Select the best answer.)

- A. Export all public channels from Tidepool's Pro workspace, then import them into Hurricane's Business workspace.
- B. Copy all of Tidepool's channels into Hurricane's workspace using Copy Channels on the Channel Management page.
- C. Use the Move Channels page in the admin dashboard to move channels to Hurricane's workspace.
- D. Create new channels in Hurricane's workspace to mirror the channels in Tidepool's workspace.

Answer: A

Explanation:

For consolidating workspaces across Slack plans (Pro to Business+), the official process is:

"Export the public channel history from the source workspace and import it into the target workspace." The "Move Channels" tool (B) only exists in Slack Enterprise Grid, not between standard workspaces. There's no Copy Channels feature (D). Manually recreating channels (A) would lose message history.

-

NEW QUESTION # 164

Your company wants to add outside consultants onto a project in Slack.

They are not allowed to set up their own Slack workspace, and your company is security-focused.

What is your best course of action?

- A. Invite the consultants as Multi-Channel Guests, and create a private channel for the consultants and the project team.
- B. Create a new channel for the project, and add the consultants to the project channel as Single-Channel Guests.
- C. Add the consultants to the project channel as Multi-Channel Guests with a six-month expiration date.
- D. Create a new workspace for external collaboration, and add the consultants as members.

Answer: B

Explanation:

Slack's recommendation for secure external collaboration is:

"Single-Channel Guests are ideal for providing external users with access to only one channel, maintaining strict control over permissions and access." Multi-Channel Guests (B, C) grant access to multiple channels, which is unnecessary and riskier. Creating a new workspace (A) adds administrative burden and is unnecessary for one project.

(Reference: Slack Administration Study Guide - Managing External Users via Guest Roles)

NEW QUESTION # 165

Brian, an Org Owner on Enterprise Grid, needs to ensure that all Slack data is archived and stored outside of Slack.

What does Brian need to do?

- A. Use a third-party eDiscovery app to retrieve and store data in a data warehouse.
- B. Enable DLP and quarantine all messages and files that need to be archived.
- C. Turn on Corporate exports to retrieve private data and store it elsewhere.
- D. Contact Slack to set message and file retention policies at the Organization level to "Keep all messages".

Answer: A

Explanation:

For ongoing external data archiving and retrieval:

"Slack recommends using a third-party eDiscovery or archiving app to pull Slack data and store it securely in a separate data warehouse or compliant system." Corporate exports (Option A) are manual and not continuous, retention policies (Option B) keep data inside Slack, and DLP (Option C) manages risk but not long-term archiving externally.

NEW QUESTION # 166

You've been working among a small group of experienced Slack admins.

Your company is beginning to grow exponentially, and admin responsibilities such as channel administration, legal holds, and user management are overwhelming your small team.

Your team decides to assign a few system roles to support the admin team.

Which role will be responsible for assigning admin responsibilities?

(Select the best answer.)

- A. Compliance Admin
- B. Channels Admin
- C. Users Admin
- **D. Roles Admin**

Answer: D

Explanation:

According to Slack's role management documentation:

"Roles Admins have the ability to assign and manage system roles for members across the Slack organization." Compliance Admins (A) manage legal holds and data exports. Channels Admins (C) manage channel structures. Users Admins (D) manage member profiles and deactivations. Only Roles Admins manage assignment of admin permissions.

(Reference: Slack Administration Study Guide - System Roles Overview)

NEW QUESTION # 167

You're an Org Owner on a Slack Enterprise Grid plan. Due to a legal issue, you need to export all messages and files from a Slack Connect channel.

What is the best way to do this?

(Select the best answer.)

- A. Use the Discovery API to export all messages and files from the channel.
- B. Use the Audit Logs API to monitor and report on all messages and files from the channel.
- C. Use Slack's Import/Export Data tool to export all messages from the channel, and then manually download the files.
- **D. Use the Discovery API to export messages and files from the channel that were sent by your company. Then ask the partners in the Slack Connect channel to do the same.**

Answer: D

Explanation:

According to the Slack Enterprise Grid documentation:

"Org Owners and Org Admins can use the Discovery API to export messages and files sent by their organization in Slack Connect channels. Messages and files sent by external partners must be requested from the respective organizations." Because Slack Connect involves multiple organizations, each organization retains ownership of its own data.

Thus, you can only export your company's messages/files via the Discovery API; partners must export their own data.
