Answer: A,B,C

NEW QUESTION # 36

Which of the following are the common deployment modes used by the CloudCampus Solution to Implement plug-and-play of devices?

- A. QR code scanning for deployment
- B. Registration query center deployment
- C. DHCP Option 148

Answer: A,B,C

Explanation:

Explanation

CloudCampus Solution is a cloud-based network management platform that provides plug-and-play of devices using three common deployment modes: QR code scanning for deployment, DHCP Option 148, and registration query center deployment . QR code scanning for deployment allows users to scan the QR code on the device label using a mobile app and automatically add the device to the cloud platform . DHCP Option 148 allows devices to obtain the cloud platform address from a DHCP server and automatically register with the cloud platform . Registration query center deployment allows devices to obtain the cloud platform address from a registration query center server and automatically register with the cloud platform . These deployment modes simplify the network configuration and management process and reduce the OPEX .

NEW QUESTION # 37

Why does NVMe provide better performance than SAS? (Multiple choice)

- A. The CPU can directly access devices through NVMe. There is no need for SAS protocol conversion
- B. The NVMe architecture supports increased I/O concurrency
- C. Interaction times of the NVMe protocols are only half that of the SAS protocols

- Answer: A,B,C**
