DumpStillValid presents PL-600 exam questions in a convenient PDF format for effective preparation for the Microsoft Power Platform Solution Architect (PL-600) exam. Microsoft PL-600 exam questions PDF file is designed for easy comprehension, allowing you to download it onto various smart devices. Whether you possess a PC, laptop, Mac, tablet, or smartphone, accessing your PL-600 Practice Exam Questions PDF anytime and anywhere is effortless.

## Microsoft Power Platform Solution Architect Sample Questions (Q146-Q151):

**NEW QUESTION # 146**

A company plans to use Power BI.

The company plans to share reports indefinitely with a specific set of users.  
You need to recommend a solution.  
Which solution should you recommend?

- A. Embed code by using the website or portal option.
- **B. Share by using a link.**
- C. Embed code by using the Publish to web option.
- D. Share directly with the users.

**Answer: B**

#### NEW QUESTION # 147

You are designing a Power Platform solution.  
During quality assurance testing the API limits are reached.  
You need to identify and resolve the issue.  
Which two actions should you recommend? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Use the out-of-the-box User Summary report from the Reports section of the solution's model-driven app.
- B. In the Power Platform admin center, review the Usage section of the Power Apps analytics dashboard.
- **C. Allocate Microsoft Dataverse capacity add-on subscriptions.**
- **D. Review the Home tab Dataverse analytics dashboard.**
- E. In the Power Platform admin center, review the Runs section of the Power Automate analytics dashboard.

**Answer: C,D**

Explanation:

A: When users exceed their limits, administrators can see this in the admin center (see below). You can do either one of the following:

Adjust the app or flow to use fewer API requests

Purchase the Power Apps and Power Automate capacity add-on for your organization.

C: Home (default) Dashboard.

This is the default dashboard that provides information on the number of active Dataverse users, storage usage, the most active workflows, and more.

□ API Calls: API Calls Number of API calls that were made by the Dataverse environment for the selected time period.

#### NEW QUESTION # 148

You design a Power Platform solution for a customer. The solution uses Microsoft Dataverse as the data store.

You are managing the go-live process for the solution.

The customer reports the following performance issues:

Form load time is much slower than it was during testing.

Overall system performance has been significantly slower than it was during testing.

You need to recommend how to troubleshoot system performance.

Which actions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation

□ Box 1: Review the fields that are on the form

Keep the number of table columns (fields) to a minimum.

The more table columns (formerly referred to as fields) you have in a form, the more data that needs to be downloaded to view each record.

□ Box 2: Review one to many relationships to verify whether cascade settings are necessary.

### NEW QUESTION # 149

You are designing a Microsoft Power Platform solution to help a company manage sales leads.

The solution has the following requirements:

Ensure that users follow a predefined sales process regardless of the device that employees use to access the app.

Respond to sales events by using organization-defined best practices.

You need to recommend a component for the app.

What should you recommend?

- **A. Business process flow**
- B. Playbook
- C. Power Automate desktop flow
- D. Power Automate cloud flow

**Answer: A**

Explanation:

You can help ensure that people enter data consistently and follow the same steps every time they work with a customer by creating a business process flow. For example, you might want to create a business process flow to have everyone handle customer service requests the same way, or to require that people get approval for an invoice before submitting an order. Business process flows use the same underlying technology as other processes, but the capabilities that they provide are very different from other features that use processes.

<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview>

### NEW QUESTION # 150

You are designing a Microsoft Power Platform solution that will include multiple applications.

You have the following requirements:

- \* Support agents managing cases.
- \* Project managers reviewing and updating their projects.
- \* Stock managers managing warehouses.
- \* New site visitors self-registering.
- \* Employees tracking time entries.

Which three requirements can you meet by implementing role-based applications? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- **A. Project managers reviewing and updating their projects.**
- **B. Support agents managing cases.**
- C. Staff tracking time entries.
- **D. Stock managers managing warehouses.**
- E. New site visitors self-resisting.

**Answer: A,B,D**

### NEW QUESTION # 151

.....
