## SC-200考試內容 & SC-200新版題庫上線

人生有太多的變數和未知的誘惑，所以我們趁年輕時要為自己打下堅實的基礎，你準備好了嗎？KaoGuTi Microsoft的SC-200考試培訓資料將是最好的培訓資料，它的效果將是你終生的伴侶，作為IT行業的你，你體會到緊迫感了嗎？選擇KaoGuTi，你將打開你的成功之門，裏面有最閃耀的光芒等得你去揮灑，加油！

SC-200 考試涵蓋廣泛的主題，包括事件應對、威脅情報、安全運營管理和數據分析。考試衡量候選人分析和解讀安全數據、識別漏洞和威脅以及開發有效安全解決方案的能力。認證考試由 40-60 個問題組成，必須在 180 分鐘內回答。考試提供多種語言版本，包括英語、日語和中文，使其全球範圍內的候選人都能輕鬆參加。

## 最新的 Microsoft Certified: Security Operations Analyst Associate SC-200 免費考試真題 (Q98-Q103):

### 問題 #98

You have an Azure subscription.

You need to delegate permissions to meet the following requirements:

Enable and disable Azure Defender.

Apply security recommendations to resource.

The solution must use the principle of least privilege.

Which Azure Security Center role should you use for each requirement? To answer, drag the appropriate roles to the correct requirements. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Roles**

- Security Admin
- Resource Group Owner
- Subscription Contributor
- Subscription Owner

**Answer Area**

Enable and disable Azure Defender: Role

Apply security recommendations to a resource: Role

Microsoft

答案:

解題說明:

**Roles**

- Security Admin
- Resource Group Owner
- Subscription Contributor
- Subscription Owner

**Answer Area**

Enable and disable Azure Defender: Security Admin

Apply security recommendations to a resource: Subscription Contributor

Microsoft

### 問題 #99

You have a Microsoft Sentinel workspace.

You have a KQL query. The query returns Microsoft Sentinel incidents that are stored in the SecurityIncident table and occurred during the last 90 days.

You need to create a Microsoft Sentinel workbook that will include a visualization of the query.

To what should you set Data source and Resource type for the workbook? To answer, select the appropriate options in the answer area.

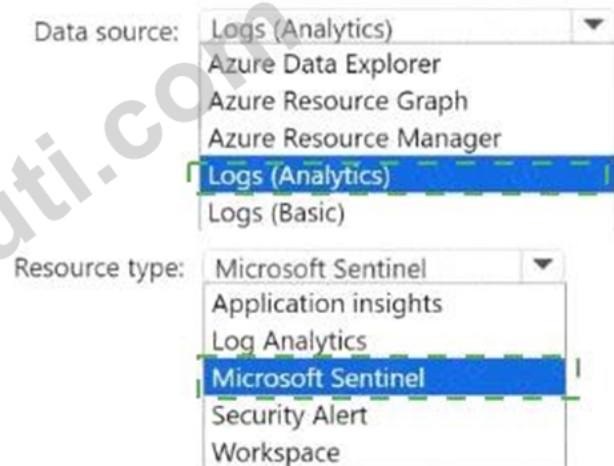

NOTE: Each correct selection is worth one point.

Answer Area

答案:

解題說明:

Explanation:

When you create a Microsoft Sentinel workbook that visualizes data retrieved using a Kusto Query Language (KQL) query, the workbook must use a data source that supports log analytics queries. According to Microsoft Sentinel and Azure Monitor documentation, Logs (Analytics) is the correct data source type for querying tables stored within a Log Analytics workspace, such as the SecurityIncident table. This table is where Microsoft Sentinel stores incident data.

In the workbook configuration, the Resource type determines which service the query context applies to.

Since you are querying Microsoft Sentinel incidents (not general Azure Monitor logs or metrics), you must set the resource type to Microsoft Sentinel. This ensures that the workbook is connected to Sentinel's analytics schema and can display visualizations (charts, metrics, timelines) based on Sentinel's native data tables.

Alternative resource types such as Log Analytics or Workspace could technically access the same data, but Microsoft Sentinel documentation recommends selecting Microsoft Sentinel when the workbook is designed for security operations and incident analysis. This provides tighter integration with the SOC dashboard experience, Sentinel permissions, and security insights views.

# Therefore, the correct selections are:

\* Data source: Logs (Analytics)

\* Resource type: Microsoft Sentinel

### 問題 #100

You have a Microsoft 365 subscription that uses Microsoft Defender for Cloud Apps and has Cloud Discovery enabled.

You need to enrich the Cloud Discovery data. The solution must ensure that usernames in the Cloud Discovery traffic logs are associated with the user principal name (UPN) of the corresponding Microsoft Entra ID user accounts.

What should you do first?

- A. Create a Microsoft 365 app connector.
- **B. Create an Azure app connector.**
- C. From Conditional Access App Control, configure User monitoring.
- D. Enable automatic redirection to Microsoft 365 Defender.

答案: B

問題 #101

Your company deploys Azure Sentinel.

You plan to delegate the administration of Azure Sentinel to various groups.

You need to delegate the following tasks:

\* Create and run playbooks

\* Create workbooks and analytic rules.

The solution must use the principle of least privilege.

Which role should you assign for each task? To answer, drag the appropriate roles to the correct tasks. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

答案:

問題 #102

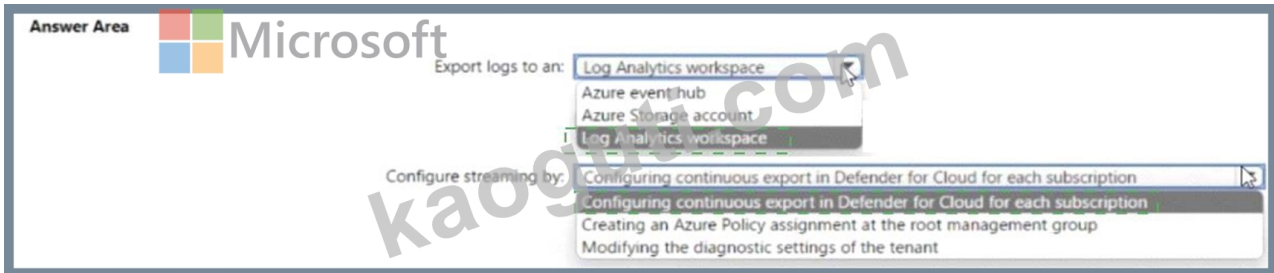

You have 100 Azure subscriptions that have enhanced security features in Microsoft Defender for Cloud enabled. All the subscriptions are linked to a single Azure AD tenant. You need to stream the Defender for Cloud logs to a syslog server. The solution must minimize administrative effort. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

答案：
