SAP Certified Application Associate - SAP S/4HANA Sourcing and Procurement Sample Questions (Q60-Q65):

NEW QUESTION # 60

In the standard system, a controllable system message is shown when a user creates a purchase order with a delivery date in the past. What must you configure to allow such purchase orders to only be created by authorized users?

- A. Copy the system message to a new version.
- B. Copy the system message to a new version.
- C. Copy the system message to a new version. Set it as an error message. Assign the version with user parameter MSV to the authorized users.
- D. Copy the system message to a new version. Set it as an error message. Assign the version with user parameter MSV to non-authorized users.

Answer: D

Explanation:

Explanation

The system message that is shown when a user creates a purchase order with a delivery date in the past can be controlled by copying it to a new version and setting it as an error message or a warning message. To allow such purchase orders to only be created by authorized users, the version with the error message must be assigned to non-authorized users with user parameter MSV. This way, non-authorized users will not be able to save or post such purchase orders, while authorized users will only receive a warning message that they can ignore. The other options do not achieve this, as they either assign the wrong version to the wrong users or do not set the message as an error message. References: [SAP Help Portal], [SAP Community]

NEW QUESTION # 61

For which documents can you configure the usage of time-dependent conditions? Note: There are 2 correct answers to this question.

- A. Purchase order
- B. Scheduling agreement
- C. Contract
- D. Quotation

Answer: B,D

NEW QUESTION # 62

In your project, you need to make sure that consignment purchase orders utilize a different number range than other purchase orders. What must you do?

- A. Customize a new document type, assign a new number range, and assign the item category
