問題 #36

What is found on an ART planning board?

- A. EPics
- **B. Features**
- C. User Stories
- D. Tasks

答案: B

解題說明:

Features are found on an ART planning board. An ART planning board is a tool that helps teams visualize and manage the work items for an Agile Release Train (ART). An ART is a long-lived team of Agile teams that delivers value in a regular cadence. Features are high-level descriptions of system behaviors that provide business value to a stakeholder. Features are derived from epics and decomposed into user stories or enablers.

Features are prioritized by business value using Weighted Shortest Job First (WSJF) and planned for Program Increments (PIs) by the ART teams. References: Organizing Around Value with ARTs, ART Planning Board

問題 #37

Which SAFe Lean-Agile Principle includes the critical part of "delaying decisions to the last responsible moment"?

- **A. Assume variability; preserve options**
- B. Make value flow without interruptions
- C. Build incrementally with fast, integrated learning cycles

- D. Base milestones on objective evaluation of working systems

答案： A

解題說明：

Explanation

The SAFe Lean-Agile Principle that includes the critical part of "delaying decisions to the last responsible moment" is "Assume variability; preserve options". This principle is based on the concept of set-based design, which is a way of managing uncertainty and complexity in product development. Set-based design means exploring multiple possible solutions in parallel, eliminating inferior options over time, and converging on the best solution as more information becomes available. Delaying decisions to the last responsible moment means keeping multiple options open until enough data and feedback are gathered to make an informed decision, which reduces risk and waste. 問題 #38

Why is it important to decouple deployment from release?

- A. To allow inspection of Agile maturity based on different cycle times
- B. To remove the need to respond quickly to production issues
- C. To make deploying of assets a business decision
- D. To enable releasing functionality on demand to meet business needs

答案： D

問題 #39

Which team type is organized to assist other teams with specialized capabilities and help them become more proficient in new technologies?

- A. Enabling team
- B. Stream-aligned team
- C. Platform team
- D. Complicated subsystem team

答案： A

解題說明：

Explanation

An enabling team is a type of cross-functional Agile team that is organized to assist other teams with specialized capabilities and help them become more proficient in new technologies. Enabling teams provide coaching, mentoring, training, and technical guidance to other teams in areas such as DevOps, test automation, security, compliance, etc. Enabling teams help other teams achieve the core competency of Technical Agility in SAFe.
