Dear, do you tired of the study and preparation for the Foundations-of-Programming-Python actual test? Here, we advise you to try the WGU Foundations-of-Programming-Python online test which can simulate the real test environment and give an excellent study experience. You see, you can set the test time and get the score immediately after each test by using Foundations-of-Programming-Python Online Test engine. With the interactive and intelligent functions of Real4exams Foundations-of-Programming-Python online test, you will be interested in the study. Besides, the valid questions & verified answers can also ensure the 100% pass rate.

Real4exams provides updated and valid WGU Foundations-of-Programming-Python Exam Questions because we are aware of the absolute importance of updates, keeping in mind the dynamic WGU Foundations-of-Programming-Python Exam Syllabus. We provide you update checks for 365 days after purchase for absolutely no cost.

## Valid WGU Foundations-of-Programming-Python Exam Topics | Foundations-of-Programming-Python Valid Study Guide

It is convenient for the user to read. The Foundations-of-Programming-Python test materials have a biggest advantage that is

different from some online learning platform which has using terminal number limitation, the Foundations-of-Programming-Python quiz torrent can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online of Foundations-of-Programming-Python Test Prep more conveniently at the same time. As far as concerned, the online mode for mobile phone clients has the same function.

## WGU Foundations of Programming (Python) - E010 JIV1 Sample Questions (Q54-Q59):

### NEW QUESTION # 54

What sequence of steps is required to execute a Python script from a text editor using the terminal on a Windows device?

- A. Save file > compile code > run executable
- B. Open terminal > write code directly > press Enter
- C. Save file > close text editor > open different IDE
- D. Save file > open terminal > type python filename.py

**Answer: D**

Explanation:

To run a Python script from a text editor using the terminal on Windows, the file should first be saved with the .py extension. Then, the terminal is opened, and the script is executed using the Python command followed by the filename.

Example:

```
python filename.py
```

The official Python documentation explains that when the interpreter is called with a filename argument, it reads and executes the script from that file. On Windows, the python command can be used from a terminal after Python is installed and configured correctly.

Therefore, the correct answer is A. Save file > open terminal > type python filename.py.

### NEW QUESTION # 55

Which data type is the value 3.14 in Python?

- A. Boolean
- B. Integer
- C. Float
- D. String

**Answer: C**

Explanation:

The value 3.14 is a float because it contains a decimal point.

Example:

```
type(3.14)
```

This returns:

```
<class 'float'>
```

Python's built-in numeric types include integers and floating-point numbers. A value with a decimal part, such as 3.14, is treated as a floating-point number.

Therefore, the correct answer is B. Float.

### NEW QUESTION # 56

Complete the function `double_number(num)` that takes one number parameter and returns double that number.

For example, `double_number(5)` should return 10.

```
def double_number(num):  
    # TODO: Return double the input number  
    # Example: double_number(5) should return 10  
    pass
```

**Answer:**

Explanation:

See the Step by Step Solution below in Explanation.

Explanation:

Step 1: The function receives one parameter named num.

Step 2: To double a number, multiply it by 2.

Step 3: The function should return the result using the return statement.

Correct code:

```
def double_number(num):  
    return num * 2
```

Example:

```
print(double_number(5))
```

Output:

10

### NEW QUESTION # 57

Write a complete function `reverse_string(text)` that takes a string and returns it reversed.

For example, `reverse_string("hello ")` should return `"olleh "`.

```
def reverse_string(text):  
    # TODO: Return the reversed string  
    pass
```

**Answer:**

Explanation:

See the Step by Step Solution below in Explanation.

Explanation:

Step 1: The function receives one string parameter named text.

Step 2: Python slicing can be used to reverse a string.

Step 3: The slice `[::-1]` means start at the end of the string and move backward by one character at a time.

Step 4: Return `text[::-1]`.

Correct code:

```
def reverse_string(text):  
    return text[::-1]
```

Example:

```
print(reverse_string("hello "))
```

Output:

olleh

### NEW QUESTION # 58

Which loop structure processes every individual item in a list called grades?

- A. `while grades[0]`
- B. `while len(grades) > 0:`
- C. `for grade in grades:`
- D. `for i in range(grades):`

**Answer: C**

Explanation:

The loop:

```
for grade in grades:
```

```
    print(grade)
```

processes every individual item in the list grades.

The variable `grade` represents the current item being processed. Python's documentation explains that a `for` statement iterates over the items of a sequence in order.

Therefore, the correct answer is B. `for grade in grades:`.

### NEW QUESTION # 59

.....

To pass the WGU Foundations-of-Programming-Python exam on the first try, candidates need Foundations of Programming (Python) - E010 JIV1 updated practice material. Preparing with real Foundations-of-Programming-Python exam questions is one of the finest strategies for cracking the exam in one go. Students who study with WGU Foundations-of-Programming-Python Real Questions are more prepared for the exam, increasing their chances of succeeding.

**Valid Foundations-of-Programming-Python Exam Topics:** [https://www.real4exams.com/Foundations-of-Programming-Python\\_braindumps.html](https://www.real4exams.com/Foundations-of-Programming-Python_braindumps.html)

It is necessary to strictly plan the reasonable allocation of Foundations-of-Programming-Python test time in advance, WGU Foundations-of-Programming-Python Dumps are worth trying while preparing for the exam, Foundations-of-Programming-Python Foundations of Programming (Python) - E010 JIV1 PDF format works smoothly on all smart devices, Our Foundations-of-Programming-Python exam questions can help you compensate for the mistakes you have made in the past, The best part of Real4exams Foundations-of-Programming-Python Exam Training is the practice exams that are prepared on the exact pattern of the actual exam.
