Salesforce Platform Developer II Sample Questions (Q66-Q71):

NEW QUESTION # 66

A company has a native iOS order placement app that needs to connect to Salesforce to retrieve consolidated information from many different objects in a JSON format.

Which is the optimal method to implement this in Salesforce?

- A. Apex SOAP callout
- B. Apex SOAP web service
- C. Apex REST callout
- **D. Apex REST web service**

Answer: D

Explanation:

Apex REST web services are the best method for creating custom endpoints that return data in a specific format, such as JSON, which is perfect for a native iOS application that needs to integrate with Salesforce for retrieving data. NEW QUESTION # 67

Exhibit:

□ The test method above tests an Apex trigger that the developer knows will make a lot of queries when a lot of Account are simultaneously updated to be customer.

The test method fails at the Line 20 because of too many SOQL queries

What is the correct way to fix this?

□ The test method above tests an Apex trigger that the developer knows will make a lot of queries when a lot of Accounts are simultaneously updated to be customers.

The test method fails at the Line 20 because of too many SOQL queries.

What is the correct way to fix this?

- A. Add Test.startTest() before and Test.stopTest() after both Line 7 of the code and Line 20 of the code.
- B. Replace most of the Apex Trigger with Process Builder processes to reduce the number of queries in the trigger.
- C. Add Test.startTest() before Line 18 of the code and add Test.stopTest() after line 18 of the code.
- D. Change the DataFactory class to create fewer Accounts so that the number of queries in the trigger is reduced.

Answer: A

NEW QUESTION # 68

What is the optimal way to fix this?

- A. □
- B. □
- C. □
- D. □

Answer: A

NEW QUESTION # 69

Universal Containers implements a private sharing model for the Convention Attendee custom object. As part of a new quality assurance effort, the company created an Event Reviewer custom user lookup field on the object. Management wants the event reviewer to automatically gain Read/write access to every record they are assigned to.

What is the best approach to ensure the assigned reviewer obtains Read/Write access to the record?

- A. Create an After Insert trigger on the Convention Attendee custom object, and use Apex Sharing Reasons and Apex Managed Sharing.
- B. Create a criteria-based sharing rule on the Convention Attendee custom object to share the records the a group of Event Reviewers.
- C. Create a Before Insert trigger on the Convention Attendee custom object, and use Apex Sharing Reasons and Apex Managed Sharing.
- D. Create criteria-based sharing rules on the Convention Attendee custom object to share the records with the Event Reviewers.

Answer: C

NEW QUESTION # 70

A developer implemented a custom data table in a Lightning web component with filter functionality. However, users are submitted support tickets about long load times when the filters are changed. The component uses an Apex method that is called to query for

What should the developer do to improve performance of the component?

- Answer: C**
