### **NEW QUESTION # 60**

What is created when you post a valued goods receipt for consumable materials?

- A. Vendor invoice document
- B. Material ledger document
- C. Controlling document
- D. Commitment

**Answer: C**

Explanation:

When you post a valued goods receipt for consumable materials (materials not destined for stock but for a specific cost object), the system generates a controlling document to record the financial impact on the relevant account assignment object, such as a cost center, internal order, or project. This ensures that the costs of the consumed materials are accurately reflected in management accounting.

Why other options are incorrect

- A. Commitment: A commitment represents a future obligation to pay and is typically created when the purchase order is saved, not at the time of the goods receipt.
- B. Vendor invoice document: This document is generated during the invoice verification stage, which occurs after the goods receipt when the supplier's invoice is received and processed.
- C. Material ledger document: While related to material valuation and inventory management, it is not the direct result of a goods receipt for consumable materials, as these items are immediately expensed to a cost object rather than tracked as valued stock.
