Exam Cyber AB CMMC-CCA Actual Tests & Latest CMMC-CCA Exam Notes

P.S. Free 2026 Cyber AB CMMC-CCA dumps are available on Google Drive shared by BraindumpsPass: https://drive.google.com/open?id=192vgOaZz0c1RiMWZc-9Gg_e-iwGjZy9Z

If you are worried about your exam, just choose us, we will help you pass the exam and strengthen your confidence. CMMC-CCA Soft test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your nerves will be decreased and your confidence will be increased. In addition, CMMC-CCA Training Materials are high quality, and they can help you pass the exam just one time. If you fail to pass the exam in your first attempt after using CMMC-CCA exam dumps of us, we will give you full refund.

The job with high pay requires they boost excellent working abilities and profound major knowledge. Passing the CMMC-CCA exam can help you find the job you dream about, and we will provide the best CMMC-CCA question torrent to the client. We are aimed that candidates can pass the CMMC-CCA exam easily. The CMMC-CCA Study Materials what we provide is to boost pass rate and hit rate, you only need little time to prepare and review, and then you can pass the CMMC-CCA exam. It costs you little time and energy, and you can download the software freely and try out the product before you buy it.

>> Exam Cyber AB CMMC-CCA Actual Tests <<

Latest CMMC-CCA Exam Notes - CMMC-CCA Pass Rate

CMMC-CCA real questions in PDF format are vital in enhancing Cyber AB Certified CMMC Assessor (CCA) Exam exam preparation. With Certified CMMC Assessor (CCA) Exam (CMMC-CCA) exam dumps PDF, you can easily study via your smartphone, laptop, and tablet. BraindumpsPass has designed the Certified CMMC Assessor (CCA) Exam (CMMC-CCA) PDF format for your convenience, so you prepare for the certification exam at any time and anywhere you want. You can also print questions in the Certified CMMC Assessor (CCA) Exam (CMMC-CCA) dumps PDF format if you want to avoid eye strain.

Cyber AB CMMC-CCA Exam Syllabus Topics:

Topic	Details
Topic 1	• Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
Topic 2	• CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.

Topic 3	• CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.
Topic 4	• Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q74-Q79):

NEW QUESTION # 74

An OSC's network diagram shows a separate network segment (192.168.50.0/24) designated for its engineering department. This segment restricts access to specific engineering resources. While the servers are physically located in a shared data center, the network configuration isolates them logically. Through which of the following does the network segmentation create isolation for the engineering department's resources?

- A. Logical separation through network configuration
- B. Requirement of a security badge to access the data center
- C. Encryption of engineering data at rest
- D. Physical barriers within the data center

Answer: A

Explanation:
Comprehensive and Detailed in Depth Explanation:
Network segmentation, as described in NIST SP 800-171 (SC-3.13.6) and CMMC Level 2, isolates resources logically using configurations like subnets (e.g., 192.168.50.0/24), firewalls, or ACLs, not physical means.
This protects engineering resources containing CUI by restricting access, despite their physical location in a shared data center.
Option B (physical barriers) applies to facility security, not network isolation. Option C (encryption at rest) protects data, not network access. Option D (security badges) is irrelevant to network segmentation. Option A is the correct answer per CMMC guidelines.
Reference Extract:
* NIST SP 800-171, 3.13.6:"Deny traffic by default and allow by exception through logical segmentation."
* CMMC AG Level 2, SC.L2-3.13.6:"Logical separation via network configuration isolates sensitive resources."Resources:https://csrc.nist.gov/pubs/sp/800/171/a/final;https://dodcio.defense.gov/Portals/0 /Documents/CMMC/AG_Level2_MasterV2.0_FINAL_201112016_508.pdf

NEW QUESTION # 75

You are a Lead Assessor tasked with conducting a CMMC Assessment for an OSC seeking to secure its CMMC Level 2 certification. The OSC has previously conducted a self-assessment and engaged a Registered Practitioner Organization (RPO) for a preliminary evaluation. As part of the CMMC Assessment process, you begin by determining the necessary evidence for each practice or process across the OSC's organizational functional areas. You consider both the adequacy and sufficiency of the evidence in relation to the CMMC's requirements. After initial preparations, you and the OSC's POC schedule a joint review session to align on the scope and expectations for the upcoming assessment. What does the criterion of 'Adequacy' primarily assess in the context of evidence collection for a CMMC assessment?

- A. The evidence is relevant and demonstrates performance of a CMMC practice.
- B. The quality of the cybersecurity measures in place at the OSC.
- C. The quantity of evidence available for each CMMC practice.
- D. The OSC's overall cybersecurity policy comprehensiveness.

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation:
'Adequacy' in the CAP assesses whether evidence is relevant and directly demonstrates a CMMC practice's performance, not broader policy (Option A), quantity (Option B), or measure quality (Option D). Option C ensures evidence aligns with specific practice objectives.
Extract from Official Document (CAP v1.0):
* Section 2.1 - Evidence Collection (pg. 24):"Adequacy assesses whether the gathered evidence is relevant and demonstrates the performance of a CMMC practice." References:
CMMC Assessment Process (CAP) v1.0, Section 2.1.

NEW QUESTION # 76

In ensuring it meets its mandates to protect CUI under CMMC, a contractor has implemented a robust, dynamic session lock with pattern-hiding displays to prevent access and viewing of data. After every 5 minutes of inactivity, the current session is locked and a blank, black screen with a battery life indicator is displayed. As a CCA, you will potentially use the following assessment methods to examine the contractor's implementation of session lock EXCEPT?

- A. Test the strength of the user's password
- B. Test the mechanisms implementing the access control policy for session lock
- C. Interview the system administrator
- D. Examine the system design documentation

Answer: A

Explanation:
Comprehensive and Detailed In-Depth Explanation:
AC.L2-3.1.10 - Session Lock requires "initiating a session lock after inactivity." Interviewing admins (A), examining docs (B), and testing mechanisms (D) assess implementation. Password strength (C) relates to IA.
L2-3.5.7, not session lock, per the CMMC guide's focus on lock-specific methods.
Extract from Official CMMC Documentation:
* CMMC Assessment Guide Level 2 (v2.0), AC.L2-3.1.10: "Interview, examine docs, test lock mechanisms."
* NIST SP 800-171A, 3.1.10: "Exclude password strength from lock assessment." Resources:
* https://dodcio.defense.gov/Portals/0/Documents/CMMC/AG_Level2_MasterV2.

NEW QUESTION # 77

During your on-site assessment, you examine an OSC's network architecture and the components that make up its defined security boundary. You notice various network devices, servers, and endpoints that are considered part of the OSC's information system. Additionally, the design team also uses a 3D printer to produce model prototypes. Which of the following is not a boundary component?

- A. The virtualization systems
- B. The gateway
- C. The 3D printer
- D. The router

Answer: C

Explanation:
Comprehensive and Detailed Explanation:
Boundary components in the CMMC Assessment Scope - Level 2 are network infrastructure elements (e.g., routers, gateways, virtualization systems) that define and protect the security boundary. The 3D printer, while a Specialized Asset if tied to CUI-related prototyping, is a peripheral device, not a core boundary component like Options A, C, and D. It doesn't inherently define or secure the network boundary, making B the correct answer.
Reference:
CMMC Assessment Scope - Level 2, Section 2.2 (Boundary Definition), p. 4: "Boundary components include network devices and systems, not ancillary equipment."

NEW QUESTION # 78

An OSC creates standard user accounts with limited capabilities and administrator accounts with full system access. A standard user initiates the uninstall of the anti-virus software, which is organizationally defined as a privileged function. Which of the following would indicate AC.L2-3.1.7: Privileged Functions is properly implemented?

- A. The antivirus software is not uninstalled.
- B. The antivirus software is successfully uninstalled, and the event is captured in an application audit log.
- C. The antivirus software is not uninstalled, and the attempt is captured in an application audit log.
- D. The antivirus software is successfully uninstalled.

Answer: C

Explanation:
* Applicable Requirement: AC.L2-3.1.7 - "Prevent non-privileged users from executing privileged functions and capture the execution of such functions in audit logs."
* Correct Interpretation:
* A non-privileged (standard) user should be prevented from performing privileged functions (e.
g., uninstalling security software).
* The attempt must be logged to provide traceability and support accountability.
* Why C is Correct: It demonstrates both prevention (software not uninstalled) and auditing (attempt captured in a log), exactly matching the practice.
Why Other Options Are Insufficient:
* A: Prevention is shown, but there is no evidence of logging.
* B: Function was not prevented, so requirement not met.
* D: Logging exists, but privileged action was not prevented.
References (CCA Official Sources):
* NIST SP 800-171 Rev. 2 - AC.L2-3.1.7
* NIST SP 800-171A - AC.L2-3.1.7 Assessment Objectives

NEW QUESTION # 79
......

No matter how much you study, it can be difficult to feel confident going into the Certified CMMC Assessor (CCA) Exam (CMMC-CCA) exam. However, there are a few things you can do to help ease your anxiety and boost your chances of success. First, make sure you prepare with Real CMMC-CCA Exam Dumps. If there are any concepts you're unsure of, take the time to take CMMC-CCA practice exams until you feel comfortable.
