NEW QUESTION # 313

When can you use an Azure Resource Manager template?

- A. To set complex permissions automatically on existing objects in an Azure subscription
- B. To provision Azure subscriptions and apply policies for multi-tenant deployments
- C. to automate the creation of an interdependent and develop can deploy from the Azure portal

- D. to automate the creation of an interdependent group of Azure resources in a repeatable way

Answer: D

Explanation:

You can automate deployments and use the practice of infrastructure as code. In code, you define the infrastructure that needs to be deployed. To implement infrastructure as code for your Azure solutions, use Azure Resource Manager templates (ARM templates). The template is a JavaScript Object Notation (JSON) file that defines the infrastructure and configuration for your project. The template uses declarative syntax, which lets you state what you intend to deploy without having to write the sequence of programming commands to create it. In the template, you specify the resources to deploy and the properties for those resources.
