

# Test Fortinet FCP\_FGT\_AD-7.6 Valid & FCP\_FGT\_AD-7.6 Practice Online

P.S. Free 2025 Fortinet FCP\_FGT\_AD-7.6 dumps are available on Google Drive shared by Easy4Engine:  
<https://drive.google.com/open?id=1nay8MO8m8oZewv9dbDjPrB0yJAKxEAv0>

If you prefer to practice FCP\_FGT\_AD-7.6 exam dumps on paper, then our exam dumps is your best choice. FCP\_FGT\_AD-7.6 PDF version is printable, and you can print them into hard one if you like, and you can also take some notes on them and practice them anytime and anyplace. Moreover, FCP\_FGT\_AD-7.6 training materials cover most of knowledge points for the exam, and you can have a good command of the major knowledge points as well as improve your professional ability in the process of practicing. We offer you free update for 365 days for FCP\_FGT\_AD-7.6 Exam Materials after purchasing. Our system will send the update version to you automatically.

The community has a lot of talent, people constantly improve their own knowledge to reach a higher level. But the country's demand for high-end IT staff is still expanding, internationally as well. So many people want to pass Fortinet FCP\_FGT\_AD-7.6 certification exam. But it is not easy to pass the exam. However, in fact, as long as you choose a good training materials to pass the exam is not impossible. We Easy4Engine Fortinet FCP\_FGT\_AD-7.6 Exam Training materials in full possession of the ability to help you through the certification. Easy4Engine website training materials are proved by many candidates, and has been far ahead in the international arena. If you want to through Fortinet FCP\_FGT\_AD-7.6 certification exam, add the Easy4Engine Fortinet FCP\_FGT\_AD-7.6 exam training to Shopping Cart quickly!

>> Test Fortinet FCP\_FGT\_AD-7.6 Valid <<

## Pass Guaranteed 2026 Fortinet FCP\_FGT\_AD-7.6 –Reliable Test Valid

This way you can save money even if Fortinet FCP\_FGT\_AD-7.6 introduces fresh Fortinet FCP\_FGT\_AD-7.6 exam updates. So why are you delaying? Purchase the Fortinet FCP\_FGT\_AD-7.6 Preparation material to get certified on the first attempt.

## Fortinet FCP\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.</li> </ul>

## Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q58-Q63):

### NEW QUESTION # 58

Which two statements are true regarding FortiGate HA configuration synchronization? (Choose two.)

- A. Incremental configuration synchronization can occur from changes made on any FortiGate device within the HA cluster.
- B. Checksums of devices will be different from each other because some configuration items are not synced to other HA members.
- C. Checksums of devices are compared against each other to ensure configurations are the same.
- D. Incremental configuration synchronization can occur only from changes made on the primary FortiGate device.

**Answer: C,D**

Explanation:

In FortiGate HA (High Availability) configuration, checksums of device configurations are compared to ensure they are synchronized and identical across the cluster. Incremental synchronization can only happen from changes made on the primary device to ensure consistency and integrity across the cluster members.

Changes made on non-primary devices do not initiate synchronization.

### NEW QUESTION # 59

You are encountering connectivity problems caused by intermediate devices blocking IPsec traffic.

In which two ways can you effectively resolve the problem? (Choose two.)

- A. You can turn on fragmentation to fix large certificate negotiation problems.
- B. You should use the protocol IKEv2.

- C. You can configure a hub-and-spoke topology with SSL VPN tunnels to bypass blocked UDP ports.
- D. You can use SSL VPN tunnel mode to prevent problems with blocked ESP and UDP ports (500 or 4500).

**Answer: C,D**

Explanation:

The training is basically trying to point out the advantage of FortiGate's SSL VPN over IPsec VPN in situation where issues are caused by an intermediate device.

IPsec uses ESP and UDP 500 and 4500, so where these are blocked, SSL VPN tunnel mode shines because it uses HTTPS (443) and TLS by default (both TCP).

Again where UDP ports are blocked, SSL VPN shines (Tunnel mode Hub and Spoke) because it does not use UDP.

#### NEW QUESTION # 60

A FortiGate firewall policy is configured with active authentication, however, the user cannot authenticate when accessing a website. Which protocol must FortiGate allow even though the user cannot authenticate?

- A. Kerberos
- B. LDAP
- C. TACASC+
- D. DNS

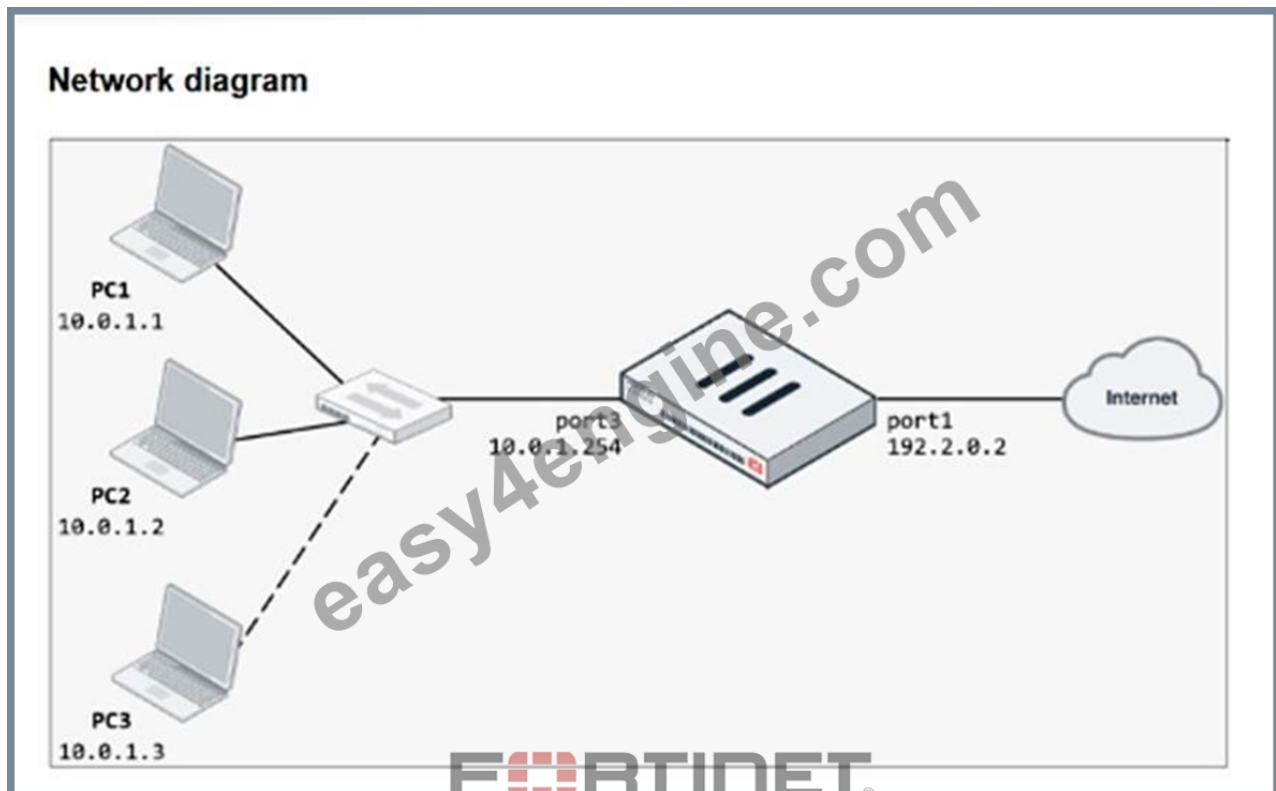

**Answer: D**

Explanation:

DNS traffic must be allowed so the user can resolve domain names and reach the authentication server or web resources, even if authentication initially fails.

#### NEW QUESTION # 61

Refer to the exhibits.

**Dynamic IP pool**

**Edit Dynamic IP Pool**

Name: internet-pool

Comments: Write a comment... 0/255

Type: One-to-One

External IP Range: 192.2.0.10-192.2.0.11

ARP Reply: ☒

---

**Firewall policy**

**Edit Policy**

Name: LAN-to-Internet

Incoming Interface: LAN (port3)

Outgoing Interface: WAN (port1)

Source: all

Destination: all

Schedule: always

Service: ALL

Action: ☒ ACCEPT ☐ DENY

Inspection Mode: Flow-based ☒ Proxy-based

Firewall/Network Options

NAT: ☒

IP Pool Configuration: ☐ Use Outgoing Interface Address ☒ Use Dynamic IP Pool

internet-pool

Preserve Source Port: ☐

Protocol Options: ☒ PROXY default

The exhibits show a diagram of a FortiGate device connected to the network, as well as the firewall policy and IP pool configuration on the FortiGate device.

Two PCs, PC1 and PC2, are connected behind FortiGate and can access the internet successfully. However, when the administrator adds a third PC to the network (PC3), the PC cannot connect to the internet.

Based on the information shown in the exhibit, which two configuration options can the administrator use to fix the connectivity issue for PC3? (Choose two.)

- A. In the firewall policy configuration, add 10.0.1.3 as an address object in the source field.
- B. In the IP pool configuration, set endip to 192.2.0.12.
- C. Configure another firewall policy that matches only the address of PC3 as source, and then place the policy on top of the list.
- D. In the IP pool configuration, set type to overload.

**Answer: B,D**

**Explanation:**

With IP pool type set to One-to-One, only as many internal hosts as there are public IPs in the pool (192.2.0.10-192.2.0.11) can use NAT. Changing the type to overload allows all internal hosts (including PC3) to share the available public IPs, so PC3 can reach the internet.

Alternatively, keeping One-to-One but extending the pool to 192.2.0.10-192.2.0.12 adds another public IP, allowing a third internal host (PC3) to be mapped and gain internet access.

**NEW QUESTION # 62**

What are three key routing principles in SD-WAN? (Choose three.)

- A. By default, SD-WAN rules are skipped if the included SD-WAN members do not have a valid route to the destination.
- B. By default, SD-WAN rules are skipped if the best route to the destination is not an SD-WAN member.
- C. By default, SD-WAN rules are skipped if only one route to the destination is available.
- D. Regular policy routes have precedence over SD-WAN rules.
- E. SD-WAN rules have precedence over any other type of routes.

**Answer: A,B,E**

Explanation:

SD-WAN rules are skipped if none of the SD-WAN members have a valid route to the destination.

SD-WAN rules take precedence over other route types.

SD-WAN rules are skipped if the best route to the destination is not an SD-WAN member by default.

## NEW QUESTION # 63

.....

In order to meet the demand of all customers and protect your machines network security, our company can promise that our FCP\_FGT\_AD-7.6 study materials have adopted technological and other necessary measures to ensure the security of personal information they collect, and prevent information leaks, damage or loss. In addition, the FCP\_FGT\_AD-7.6 Study Materials system from our company can help all customers ward off network intrusion and attacks prevent information leakage, protect user machines network security.
