NEW QUESTION # 57

What is the maximum number of freight settlement documents that can be created from a freight order with two deliveries during its lifecycle, given that all the charge elements in the calculation sheet have a value greater than zero?

- A. 0
- **B. No limit**
- C. 1
- D. 2

Answer: B

Explanation:

In SAP S/4HANA Transportation Management, freight settlement documents (FSDs) are created based on freight orders to settle charges with carriers. According to the SAP documentation, there is no limit to the number of FSDs that can be created from a freight order during its lifecycle, as additional FSDs can be generated for changes, such as additional charges, corrections, or disputes, provided the charge elements have non-zero values. For a freight order with two deliveries, multiple FSDs can be created to account for initial settlements, amendments, or additional charges (e.g., detention or assessorial charges) throughout the lifecycle.

The other options are incorrect:

* A (3), B (1), and C (2) assume a fixed number of FSDs, which is not accurate since the system allows multiple FSDs based on changes or additional requirements.
