Reliable Exam HCL-DOM-AADM-12 Pass4sure - HCL-DOM-AADM-12 Reliable Study Notes

Our HCL-DOM-AADM-12 exam cram is famous for instant access to download, and you can receive the downloading link and password within ten minutes, and if you don't receive, you can contact us. Moreover, HCL-DOM-AADM-12 exam materials contain both questions and answers, and it's convenient for you to check the answers after practicing. We offer you free demo to have a try before buying, so that you can know what the complete version is like. We offer you free update for 365 days for HCL-DOM-AADM-12 Exam Dumps, so that you can obtain the latest information for the exam, and the latest version for HCL-DOM-AADM-12 exam dumps will be sent to your email automatically.

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q31-Q36):

NEW QUESTION # 31

Where are effective policies for a user listed and applied in Domino?

- A. In the Person document's Policies tab
- B. In the notes.ini file
- C. In the certlog.nsf database
- D. In the Configuration Settings document

Answer: A

Explanation:

To verify which policies are currently governing a specific user, an administrator checks the Policies tab within that user's Person document in the Domino Directory. This tab displays the "Effective Policy," which is the result of all Organizational and Explicit policies assigned to that individual. This is the definitive location to see which administrative rules are being pushed to the user's client and mail file.

NEW QUESTION # 32

Who typically has access to extract ID files from the ID Vault?

- A. Anyone listed in the ACL of the Domino Directory
- B. SMTP server and Domino router task
- C. ID recovery authority
- D. Only the user and the vault administrator

Answer: D

Explanation:

Access to the ID Vault is strictly controlled to ensure the security of user credentials. By default, only the user (via automated synchronization/recovery) and designated Vault Administrators (who have been granted explicit rights in the Vault document) can extract or manage ID files. This prevents unauthorized users from obtaining the private keys of others stored within the vault.

NEW QUESTION # 33

Which two steps are required to reclaim space from DAOS after deleting large numbers of documents?
(Choose two)

- A. Issue tell daosmgr resync command
- B. Run the Fixup task
- C. Issue tell daosmgr prune command
- D. Enable Transaction Logging

Answer: A,C

Explanation:

The Domino Attachment and Object Service (DAOS) stores attachments separately from NSF files. When documents are deleted, the associated attachment files (.NLO) are not immediately removed from the storage.

To reclaim this physical disk space, an administrator must:

* Issue the tell daosmgr prune command : This identifies and deletes attachment files that are no longer referenced by any database and have exceeded the deferral interval.

* Issue the tell daosmgr resync command : This synchronizes the DAOS catalog (daoscat.nsf) with the physical files on disk to ensure the repository is accurate.

NEW QUESTION # 34

Which database stores all administration requests for processing by AdminP?

- A. names.nsf

- B. ddm.nsf
- C. daoscat.nsf
- D. admin4.nsf

Answer: D

Explanation:

All requests for the Administration Process are stored in the Administration Requests database (admin4.nsf). When an administrator performs a task (like deleting a user), a "request" document is created in this database. The AdminP task on each server in the domain periodically checks this database to see if there are tasks it needs to perform, such as updating local database ACLs or deleting local replicas.

NEW QUESTION # 35

Which database stores inbound mail before it is routed to a user's mailbox?

- A. names.nsf
- B. mail.box
- C. mailroute.nsf
- D. router.nsf

Answer: B

Explanation:

In HCL Domino, the mail.box database (or databases, if multiple are configured) acts as the temporary holding area or "staging ground" for all transit mail. When mail arrives at the server—whether from a local Notes user, another Domino server, or via SMTP—it is deposited into mail.box. The Router task then monitors this database, reads the recipient information, and moves the message to its final destination (the user's mail file) or transfers it to another server.

NEW QUESTION # 36

.....

You may be busy in your jobs, learning or family lives and can't get around to preparing and taking the certificate exams but on the other side you urgently need some useful HCL-DOM-AADM-12 certificates to improve your abilities in some areas.
