

# AZ-305 Study Tool, Reliable AZ-305 Braindumps Pdf

BTW, DOWNLOAD part of DumpStillValid AZ-305 dumps from Cloud Storage: [https://drive.google.com/open?id=1rNFe\\_r6LmtsxeDjPzvBeBHDgS-ISWsux](https://drive.google.com/open?id=1rNFe_r6LmtsxeDjPzvBeBHDgS-ISWsux)

There are many merits of our product on many aspects and we can guarantee the quality of our AZ-305 practice engine. Firstly, our experienced expert team compile them elaborately based on the real exam and our AZ-305 study materials can reflect the popular trend in the industry and the latest change in the theory and the practice. Secondly, both the language and the content of our AZ-305 Study Materials are simple, easy to be understood and suitable for any learners.

Learning knowledge is not only to increase the knowledge reserve, but also to understand how to apply it, and to carry out the theories and principles that have been learned into the specific answer environment. The Designing Microsoft Azure Infrastructure Solutions exam dumps are designed efficiently and pointedly, so that users can check their learning effects in a timely manner after completing a section. Good practice on the success rate of AZ-305 Quiz guide is not fully indicate that you have mastered knowledge is skilled, therefore, the AZ-305 test material let the user consolidate learning content as many times as possible, although the practice seems very boring, but it can achieve the result of good consolidate knowledge.

## Pass Guaranteed Quiz Microsoft - AZ-305 High Hit-Rate Study Tool

Microsoft AZ-305 exam materials of DumpStillValid is developed in accordance with the latest syllabus. At the same time, we also constantly upgrade our training materials. So our exam training materials is simulated with the practical exam. So that the pass rate of DumpStillValid is very high. It is an undeniable fact. Through this we can know that DumpStillValid Microsoft AZ-305 Exam

Training materials can bring help to the candidates. And our price is absolutely reasonable and suitable for each of the candidates who participating in the IT certification exams.

## Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q412-Q417):

### NEW QUESTION # 412

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are designing an Azure solution for a company that has four departments. Each department will deploy several Azure app services and Azure SQL databases.

You need to recommend a solution to report the costs for each department to deploy the app services and the databases. The solution must provide a consolidated view for cost reporting that displays cost broken down by department.

Solution: Create a separate resource group for each department. Place the resources for each department in its respective resource group.

Does this meet the goal?

- A. No
- B. Yes

**Answer: A**

Explanation:

Instead create a resource group for each resource type. Assign tags to each resource group.

Note: Tags enable you to retrieve related resources from different resource groups. This approach is helpful when you need to organize resources for billing or management.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/resource-group-using-tags>

### NEW QUESTION # 413

You need to design a storage solution for an app that will store large amounts of frequently used data. The solution must meet the following requirements:

Maximize data throughput.

Prevent the modification of data for one year.

Minimize latency for read and write operations.

Which Azure Storage account type and storage service should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Storage account type:**

<input type="checkbox"/>	BlobStorage
<input type="checkbox"/>	BlockBlobStorage
<input type="checkbox"/>	FileStorage
<input type="checkbox"/>	StorageV2 with Premium performance
<input type="checkbox"/>	StorageV2 with Standard performance

**Storage service:**

<input type="checkbox"/>	Blob
<input type="checkbox"/>	File
<input type="checkbox"/>	Table

Answer:

Explanation:

The screenshot shows the Azure portal interface. On the left, there is a sidebar with the text "Storage account type" and "Storage service". The main area displays two dropdown menus. The top dropdown, labeled "Storage account type", contains the following options: "BlobStorage", "BlockBlobStorage" (which is highlighted with a red box), "FileStorage", "StorageV2 with Premium performance", and "StorageV2 with Standard performance". The bottom dropdown, labeled "Storage service", contains the following options: "Blob" (which is highlighted with a red box), "File", and "Table".

#### NEW QUESTION # 414

You have an Azure subscription that contains the SQL servers shown in the following table.

Name	Resource group	Location
SQLsvr1	RG1	East US
SQLsvr2	RG2	West US

The subscription contains the storage accounts shown in the following table.

Name	Resource group	Location	Account kind
storage1	RG1	East US	StorageV2 (general purpose v2)
storage2	RG2	Central US	BlobStorage

You create the Azure SQL databases shown in the following table.

Name	Resource group	Server	Pricing tier
SQLdb1	RG1	SQLsvr1	Standard
SQLdb2	RG1	SQLsvr1	Standard
SQLdb3	RG2	SQLsvr2	Premium

The screenshot shows the Azure portal interface. At the top left, there is a "Answer Area" button. The main area displays three statements about audit storage:

- "When you enable auditing for SQLdb1, you can store the audit information to storage1." To the right are two radio buttons: "Yes" and "No".
- "When you enable auditing for SQLdb2, you can store the audit information to storage2." To the right are two radio buttons: "Yes" and "No".
- "When you enable auditing for SQLdb3, you can store the audit information to storage2." To the right are two radio buttons: "Yes" and "No".

Answer:

Explanation:

Answer Area

**Microsoft**  
Statements

When you enable auditing for SQLdb1, you can store the audit information to storage1.  Yes  No

When you enable auditing for SQLdb2, you can store the audit information to storage2.  Yes  No

When you enable auditing for SQLdb3, you can store the audit information to storage3.  Yes  No

Explanation:

Box 1: Yes

Be sure that the destination is in the same region as your database and server.

Box 2: No

Box 3: Yes

## NEW QUESTION # 415

You have an Azure subscription that contains a virtual network named VNET1 and 10 virtual machines. The virtual machines are connected to VNET1.

You need to design a solution to manage the virtual machines from the internet. The solution must meet the following requirements:

- \* Incoming connections to the virtual machines must be authenticated by using Azure Multi-Factor Authentication (MFA) before network connectivity is allowed.
- \* Incoming connections must use TLS and connect to TCP port 443.
- \* The solution must support RDP and SSH.

What should you Include In the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To provide access to virtual machines on VNET1, use:

Azure Bastion  
 Just-in-time (JIT) VM access  
 Azure Web Application Firewall (WAF) in Azure Front Door

To enforce Azure MFA, use:

An Azure Identity Governance access package  
 A Conditional Access policy that has the Cloud apps assignment set to Azure Windows VM Sign-In  
 A Conditional Access policy that has the Cloud apps assignment set to Microsoft Azure Management

Answer:

Explanation:

Answer Area

To provide access to virtual machines on VNET1, use:

Azure Bastion  
 Just-in-time (JIT) VM access  
 Azure Web Application Firewall (WAF) in Azure Front Door

To enforce Azure MFA, use:

An Azure Identity Governance access package  
 A Conditional Access policy that has the Cloud apps assignment set to Azure Windows VM Sign-In  
 A Conditional Access policy that has the Cloud apps assignment set to Microsoft Azure Management

Explanation:

To provide access to virtual machines on VNET1, use:  Just-in-time (JIT) VM access

To enforce Azure MFA, use:  An Azure Identity Governance access package

**Microsoft**

## NEW QUESTION # 416

You have an application that is used by 6,000 users to validate their vacation requests. The application manages its own credential. Users must enter a username and password to access the application. The application does NOT support identity providers. You plan to upgrade the application to use single sign-on (SSO) authentication by using an Azure Active Directory (Azure AD) application registration.

Which SSO method should you use?

- A. password-based
- B. SAML
- C. header-based
- D. OpenID Connect

**Answer: A**

Explanation:

Password - On-premises applications can use a password-based method for SSO. This choice works when applications are configured for Application Proxy.

With password-based SSO, users sign in to the application with a username and password the first time they access it. After the first sign-on, Azure AD provides the username and password to the application. Password-based SSO enables secure application password storage and replay using a web browser extension or mobile app. This option uses the existing sign-in process provided by the application, enables an administrator to manage the passwords, and doesn't require the user to know the password.

Incorrect:

Choosing an SSO method depends on how the application is configured for authentication. Cloud applications can use federation-based options, such as OpenID Connect, OAuth, and SAML.

Federation - When you set up SSO to work between multiple identity providers, it's called federation.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/what-is-single-sign-on>

## NEW QUESTION # 417

.....

DumpStillValid's Microsoft AZ-305 exam training materials are the necessities of each of candidates who participating in the IT certification. With this training material, you can do a full exam preparation. So that you will have the confidence to win the exam. DumpStillValid's Microsoft AZ-305 Exam Training materials are highly targeted. Not every training materials on the Internet have such high quality. Only DumpStillValid could be so perfect.

**Reliable AZ-305 Braindumps Pdf:** <https://www.dumpstillvalid.com/AZ-305-prep4sure-review.html>

With our AZ-305 practice test, you only need to spend 20 to 30 hours in preparation since there are all essence contents in our AZ-305 study materials, Microsoft AZ-305 Study Tool Otherwise, our full refund policy will enable you to get your money back, Microsoft AZ-305 Study Tool In this way, how possible can they not achieve successfully fast learning, Microsoft AZ-305 Study Tool We sincerely hope you can get successful aims as soon as possible.

Just above the Refresh button you'll see the time AZ-305 the list was last updated, The commissioned work is also a challenge in a different way, With our AZ-305 Practice Test, you only need to spend 20 to 30 hours in preparation since there are all essence contents in our AZ-305 study materials.

## Free PDF Quiz 2026 Trustable Microsoft AZ-305: Designing Microsoft Azure Infrastructure Solutions Study Tool

Otherwise, our full refund policy will enable you to get your money back, Reliable AZ-305 Braindumps Pdf In this way, how possible can they not achieve successfully fast learning, We sincerely hope you can get successful aims as soon as possible.

Trust our exam questions and answers for Designing Microsoft Azure Infrastructure Solutions, success is on the way.
