The Salesforce PDII topics or syllabus are updated with the passage of time. To pass the Salesforce PDII exam you have to know these topics. The Salesforce PDII certification exam trainers always work on these topics and add their appropriate Salesforce PDII exam questions and answers in the PDII exam dumps. These latest Platform Developer II PDII exam topics are added in all Salesforce PDII exam questions formats. You also get the opportunity to download the latest PDII PDF Questions and practice tests up to three months from the date of Salesforce PDII exam dumps purchase. So rest assured that with Salesforce PDII real dumps you will not miss even a single Salesforce PDII exam questions in the final exam. Now take the best decision of your career and enroll in Platform Developer II PDII certification exam and start this journey with Platform Developer II PDII practice test questions.

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our PDII real study dumps have the distinct advantage of fast delivery. Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the PDII prep guide in 5-10 minutes, so you can get our PDII Exam Questions at first time. And then you can start your study after downloading the PDII exam questions in the email attachments. High efficiency service has won reputation for us among multitude of customers, so choosing our PDII real study dumps we guarantee that you won't be regret of your decision.

**PDII 100% Correct Answers - PDII Test Discount**

Your purchase with Dumpcollection is safe and fast. We use Paypal for payment and committed to keep your personal information secret and never share your information to the third part without your permission. In addition, our Salesforce PDII practice exam torrent can be available for immediate download after your payment. Besides, we guarantee you 100% pass for PDII Actual Test, in case of failure, you can ask for full refund. The refund procedure is very easy. You just need to show us your PDII failure certification, then after confirmation, we will deal with your case.

## Salesforce Platform Developer II Sample Questions (Q149-Q154):

### NEW QUESTION # 149

A developer created an Opportunity trigger that updates the account rating when an associated opportunity is considered high value. Current criteria for an opportunity to be considered high value is an amount greater than or equal to \$1,000,000. However, this criteria value can change over time. There is a new requirement to also display high value opportunities in a Lightning web component. Which two actions should the developer take to meet these business requirements, and also prevent the business logic that obtains the high value opportunities from being repeated in more than one place?2021

- A. Use custom metadata to hold the high value amount.24
- B. Leave the business logic code inside the trigger for efficiency.23
- C. Create a helper class that fetches the high value opportunities.
- D. Call the trigger from the Lightning web25 component.

**Answer: A,C**

Explanation:

To build a maintainable and scalable solution, a developer must separate business logic from trigger execution and avoid hard-coding threshold values.

First, the \$1,000,000 threshold should be stored in Custom Metadata (Option B). Custom Metadata is superior to hard-coding or even Custom Settings in this context because the records are deployable and can be queried efficiently without counting against standard SOQL limits. If the business decides to lower the "high value" threshold to \$500,000, an administrator can simply update the Custom Metadata record without requiring any code changes or redeployments.

Second, the logic to identify these opportunities should be moved to a Helper Class (Option D). This follows the "Separation of Concerns" principle. Instead of writing the SOQL query and logic inside the trigger, the trigger calls a method in the helper class. Similarly, the Lightning Web Component's Apex controller can call the exact same method in the helper class. This ensures that the definition of a "high value opportunity" is managed in one single place in the codebase. If the logic becomes more complex (e.g., adding Industry filters), the developer only needs to update the helper class once to satisfy both the trigger and the UI component. Option A leads to "spaghetti code," and Option C is impossible as triggers cannot be called directly from JavaScript or other Apex classes.

### NEW QUESTION # 150

During the order of execution of a Visualforce page GET request, what happens after this step?  
Evaluate constructors on controllers and extensions

- A. Create view state if <apex: form> exists
- B. Evaluate constructors and expressions on custom components
- C. Send the HTML response to the browser
- D. Evaluate expressions, action attributes, and method calls

**Answer: B**

### NEW QUESTION # 151

How should a developer reference a third-party JavaScript library from a Lightning component?

- A. From an asset file
- B. From a document
- C. From a third-party URL
- D. From a static resource

**Answer: D**

### NEW QUESTION # 152

The Account object has a field, Audit\_Code\_c, that is used to specify what type of auditing the Account needs and a Lookup to User, Auditor\_c, that is the assigned auditor. When an Account is initially created, the user specifies the Audit\_Code c. Each User in the org has a unique text field, Audit\_Code\_e, that is used to automatically assign the correct user to the Account's Auditor\_c field.

```
trigger AccountTrigger on Account(before insert) {
    AuditAssigner.setAuditor(trigger.new);
}

public class AuditAssigner {
    public static void setAuditor(List<Account> accounts) {
        for (User u : [SELECT Id, Audit_Code__c FROM User]) {
            for (Account a : accounts) {
                if (u.Audit_Code__c == a.Audit_Code__c) {
                    a.Auditor_c = u.Id;
                }
            }
        }
    }
}
```

What should be changed to most optimize the code's efficiency?

Choose 2 answers

- A. Add a WHERE clause to the SOQL query to filter on audit codes.
- B. Add an initial SOQL query to get all distinct audit codes.
- C. Build a Map<Id, List<string>> of Account Id to audit codes.
- D. Build a Map<string, List<Account>> of audit code to accounts.

**Answer: A,D**

Explanation:

To optimize the code's efficiency when assigning users to the Account's Auditor field based on the audit code, the following changes should be considered:

B: Building a map of audit code to accounts (Map<string, List<Account>>) would allow for efficient grouping of accounts by their audit code. This would make it easier to process accounts with the same audit code in a single operation, reducing the number of SOQL queries and DML operations needed.

D: Adding a WHERE clause to the SOQL query to filter on audit codes would limit the number of records returned by the query. This means the code only processes relevant User records with matching audit codes, thereby reducing the processing time and memory consumption.

Option A is not recommended because querying for all distinct audit codes without any context of the accounts being processed could be inefficient. Option C is less effective because it would involve creating a mapping of Account Ids to audit codes, which doesn't aid in the efficient assignment of auditor to accounts.

### NEW QUESTION # 153

Exhibit:

```
<lightning:button label="Save" onclick="{!c.handleSave}" />

({
    handleSave : function (component, event, helper) {
        helper.saveAndRedirect(component);
    }
})
```

A company has the Lightning Component above that allows users to click a button to save their changes and redirects them to a

different page. Currently, when the user hits the Save button the records are getting saved, but they are not redirected.  
Which three techniques can a developer use to debug the JavaScript? Choose 3 answers

- A. Use Developer Console to view the debug log.
- B. Use Developer Console to view checkpoints.
- C. Use `console.log()` messages in the JavaScript.
- D. Enable Debug Mode for Lightning components for the user.
- E. Use the browser's dev tools to debug the JavaScript.

**Answer: C,D,E**

## NEW QUESTION # 154

.....

As far as the Platform Developer II (PDII) exam questions are concerned, these Salesforce PDII exam questions are designed and verified by the experience and qualified PDII exam trainers. They work together and strive hard to maintain the top standard of PDII Exam Practice questions all the time. So you rest assured that with the Dumpcollection Salesforce PDII exam questions you will ace your PDII exam preparation and feel confident to solve all questions in the final Salesforce PDII exam.

**PDII 100% Correct Answers:** [https://www.dumpcollection.com/PDII\\_braindumps.html](https://www.dumpcollection.com/PDII_braindumps.html)

If you desire a PDII certification, our products are your best choice, With the help of our PDII study guide, you can pretty much rest assured that you can pass the IT exam as well as obtaining the IT certification as easy as blowing off the dust, because our Salesforce PDII training materials are compiled by a large number of top IT exports who are coming from many different countries, Salesforce Trustworthy PDII Exam Torrent Many exams, however, are available on the Internet.

The key to this code is the line `'Inherits Vehicle'`, which tells Visual PDII Basic that this class is a child of the `'Vehicle'` class and therefore should inherit of all that class's properties and methods.

## 2026 Salesforce PDII: Updated Trustworthy Platform Developer II Exam Torrent

For each event, I invoke the event handler chain to see which entity should manage the event, If you desire a PDII certification, our products are your best choice.

With the help of our PDII study guide, you can pretty much rest assured that you can pass the IT exam as well as obtaining the IT certification as easy as blowing off the dust, because our Salesforce PDII training materials are compiled by a large number of top IT exports who are coming from many different countries.

Many exams, however, are available on the Internet, If more details you can try to download PDII dumps for free and if you have any questions you can contact with us at any time.

We not only need to prepare carefully for Salesforce Platform Developer II PDII 100% Correct Answers test, but also need to perform well during the exam, only in this way can we win the war, in other words, pass the exam.
