

Get Excellent ITIL-4-Practitioner-Deployment-Management Test Question and Pass Exam in First Attempt

BTW, DOWNLOAD part of DumpsReview ITIL-4-Practitioner-Deployment-Management dumps from Cloud Storage: https://drive.google.com/open?id=180vf45DBH8oqZWApIra_zrlhgDF0tODq

All the ITIL-4-Practitioner-Deployment-Management training files of our company are designed by the experts and professors in the field. The quality of our study materials is guaranteed. According to the actual situation of all customers, we will make the suitable study plan for all customers. If you buy the ITIL-4-Practitioner-Deployment-Management learning dumps from our company, we can promise that you will get the professional training to help you pass your exam easily. By our professional training, you will pass your exam and get the related certification in the shortest time.

We can't forget the advantages and the conveniences that reliable ITIL-4-Practitioner-Deployment-Management real preparation materials complied by our companies bring to us. First, by telling our customers what the key points of learning, and which learning ITIL-4-Practitioner-Deployment-Management exam training questions is available, they may save our customers money and time. Our ITIL-4-Practitioner-Deployment-Management learning prep guides our customers in finding suitable jobs and other information as well. Secondly, a wide range of practice types and different versions of our ITIL-4-Practitioner-Deployment-Management exam training questions receive technological support through our expert team.

Get Real Peoplecert ITIL-4-Practitioner-Deployment-Management Exam Questions By [DumpsReview]

Our ITIL-4-Practitioner-Deployment-Management question materials are designed to help ambitious people. The nature of human being is pursuing wealth and happiness. Perhaps you still cannot make specific decisions. It doesn't matter. We have the free trials of the ITIL-4-Practitioner-Deployment-Management study materials for you. The initiative is in your own hands. Our ITIL-4-Practitioner-Deployment-Management Exam Questions are very outstanding. People who have bought our products praise our company highly. In addition, we have strong research competence. So you can always study the newest version of the ITIL-4-Practitioner-Deployment-Management exam questions.

Peoplecert ITIL 4 Practitioner: Deployment Management Sample Questions (Q10-Q15):

NEW QUESTION # 10

[Measure and Improve Deployment Management]

An organization has an objective to create and use deployment approaches that would fit the needs of the organization and the context. How should the organization assess if this objective is achieved?

- A. By asking stakeholders about their satisfaction with deployment lead times
- B. By measuring percentage of deployments which did not follow the agreed policies and models
- C. By looking at the deployment backlog throughput
- D. By analyzing the adherence to deployment schedules

Answer: A

Explanation:

ITIL 4 emphasizes stakeholder satisfaction as a key indicator of whether a practice meets organizational needs and context, as it reflects the value delivered to users and the business. Option B, asking stakeholders about their satisfaction with deployment lead times, directly assesses whether deployment approaches are effective and aligned with expectations, making it the best method to evaluate the objective.

Option A (By looking at the deployment backlog throughput): Incorrect, as throughput measures efficiency but does not directly indicate whether the deployment approach fits the organization's needs or context.

Option B (By asking stakeholders about their satisfaction with deployment lead times): Correct, as stakeholder feedback on lead times reflects whether deployments are timely and valuable, aligning with ITIL 4's focus on value co-creation.

Option C (By measuring the percentage of deployments which did not follow the agreed policies and models): Incorrect, as non-compliance indicates process issues but does not directly assess fit with organizational needs or stakeholder satisfaction.

Option D (By analyzing the adherence to deployment schedules): Incorrect, as schedule adherence measures operational performance, not whether the approach meets broader contextual needs.

NEW QUESTION # 11

[Measure and Improve Deployment Management]

Which capability criterion should be used to assess if the organization is succeeding in increasing the capability level of its deployment management practice by maintaining an effective deployment approach?

- A. New and changed services and service components are successfully deployed
- B. Deployments are supported by relevant competences
- C. Deployments include required technologies and information flows
- D. Deployment rules are integrated with policies and rules for changes and releases

Answer: A

Explanation:

ITIL 4 defines capability levels based on outcomes and value delivery, with higher levels indicating reliable and effective practices.

To assess whether an organization is increasing its deployment management capability by maintaining an effective approach, the key criterion is whether new and changed services and service components are successfully deployed (Option A). This outcome-focused measure directly indicates the practice's reliability and alignment with organizational goals.

Option A (New and changed services and service components are successfully deployed): Correct, as successful deployments are the primary indicator of an effective deployment management practice, reflecting capability maturity in ITIL 4.

Option B (Deployments are supported by relevant competences): Incorrect, as while competences are important, they are a supporting factor, not the primary criterion for assessing capability outcomes.

Option C (Deployments include required technologies and information flows): Incorrect, as having the right technologies is a prerequisite, not a direct measure of deployment success or capability.

Option D (Deployment rules are integrated with policies and rules for changes and releases): Incorrect, as integration with other practices supports deployment but is not the key indicator of capability compared to actual deployment success.

NEW QUESTION # 12

[Engage with Stakeholders and Suppliers]

Which is NOT an example of how an organization should work with suppliers to improve its deployment management practice?

- A. Developing and enforcing detailed and rigorous procedures for every interaction between suppliers and the organization
- B. Carefully selecting suppliers of software tools for CI/CD pipeline
- C. Involving third parties in review and planning of the value streams that include deployment management
- D. Considering dependencies on third parties when analyzing service value streams which include deployment management

Answer: A

Explanation:

ITIL 4 encourages collaborative and flexible relationships with suppliers to enhance deployment management, focusing on value co-creation rather than rigid controls. Option D is not aligned with this approach, as overly detailed and rigorous procedures can hinder adaptability and innovation in supplier relationships.

Option A (Considering dependencies on third parties when analyzing service value streams which include deployment management): Correct practice, as understanding supplier dependencies ensures effective integration of deployment activities into value streams.

Option B (Carefully selecting suppliers of software tools for CI/CD pipeline): Correct, as choosing reliable suppliers for CI/CD tools is critical to building a robust deployment management practice.

Option C (Involving third parties in review and planning of the value streams that include deployment management): Correct, as supplier involvement in planning fosters collaboration and ensures alignment with deployment goals.

Option D (Developing and enforcing detailed and rigorous procedures for every interaction between suppliers and the organization): Incorrect, as this approach is overly prescriptive and contradicts ITIL 4's emphasis on flexible, value-focused supplier relationships. It risks stifling collaboration and innovation.

NEW QUESTION # 13

[Understand the Key Concepts of Deployment Management]

Which of the following BEST describes the scope of deployment management practice?

- A. The practice includes deploying network hubs to and removing applications from staging environments
- B. The practice includes updating service documentation and transferring it to the live environment
- C. The practice includes deploying network hubs but not additional software licenses to the live environment
- D. The practice includes removing configuration documentation but not physical servers from the live environment

Answer: A

Explanation:

ITIL 4's deployment management practice encompasses moving hardware, software, and associated components into or out of environments (e.g., staging, testing, or production) to support service delivery. Option A, which includes deploying network hubs (hardware) and removing applications from staging environments (software), accurately reflects this broad scope across the service lifecycle.

Option A (The practice includes deploying network hubs to and removing applications from staging environments): Correct, as it covers both hardware and software movements across environments, aligning with ITIL 4's definition of deployment management.

Option B (The practice includes updating service documentation and transferring it to the live environment): Incorrect, as updating and transferring documentation is part of knowledge management, not deployment management.

Option C (The practice includes removing configuration documentation but not physical servers from the live environment):

Incorrect, as deployment management includes moving physical servers, and configuration documentation is managed elsewhere.

Option D (The practice includes deploying network hubs but not additional software licenses to the live environment): Incorrect, as software licenses may be part of deployment if required, and the option arbitrarily limits the scope.

NEW QUESTION # 14

[Use Tools and Techniques for Deployment]

An organization is facing errors and delays when deploying software. An investigation has shown that these are often caused by the need for unplanned manual configuration of the target environments. What is the BEST recommendation for the organization to improve the success rate of deployments?

- A. Leverage Infrastructure as Code
- B. Integrate build, test, and deployment activities
- C. Use incremental deployments
- D. Automate the CI/CD pipeline

Answer: A

Explanation:

The issue of errors and delays due to unplanned manual configuration of target environments points to inconsistent or poorly managed environments. ITIL 4 recommends leveraging Infrastructure as Code (IaC) (Option A) to address this, as IaC automates and standardizes environment provisioning, ensuring consistency and reducing manual errors.

Option A (Leverage Infrastructure as Code): Correct, as IaC (e.g., using tools like Terraform or Ansible) defines environments in code, enabling repeatable, error-free setups and directly addressing the problem of manual configuration errors.

Option B (Use incremental deployments): Incorrect, as incremental deployments focus on releasing smaller changes but do not address the root cause of environment configuration issues.

Option C (Integrate build, test, and deployment activities): Incorrect, as while integration improves pipeline flow, it does not specifically resolve manual configuration errors in target environments.

Option D (Automate the CI/CD pipeline): Incorrect, as automating the pipeline is a broader solution that may include IaC, but it is not specific enough to address the environment configuration issue directly.

NEW QUESTION # 15

.....

If you are going to prepare for the ITIL-4-Practitioner-Deployment-Management exam in order to get the related certification and improve yourself, you are bound to be very lucky. Because you meet us, we are willing to bring a piece of good news for you. With the joint efforts of all parties, our company has designed the very convenient and useful ITIL-4-Practitioner-Deployment-Management Study Materials. More importantly, the practices have proven that the study materials from our company have helped a lot of people achieve their goal and get the related certification.

Reliable ITIL-4-Practitioner-Deployment-Management Exam Registration: <https://www.dumpsreview.com/ITIL-4-Practitioner-Deployment-Management-exam-dumps-review.html>

DumpsReview Reliable ITIL-4-Practitioner-Deployment-Management Exam Registration is pleased to present the Unlimited Access Plan with complete access to Peoplecert Reliable ITIL-4-Practitioner-Deployment-Management Exam Registration Reliable ITIL-4-Practitioner-Deployment-Management Exam Registration exam papers with the actual Peoplecert Reliable ITIL-4-Practitioner-Deployment-Management Exam Registration Reliable ITIL-4-Practitioner-Deployment-Management Exam Registration Reliable ITIL-4-Practitioner-Deployment-Management Exam Registration course specialists, So our ITIL-4-Practitioner-Deployment-Management actual test materials will increase your possibility of getting them dramatically.

Although you may have to hover over the corner to make it visible, ITIL-4-Practitioner-Deployment-Management Ignoring the fact that there are dozens of people with my first and last name in the world, including a former U.S.

DumpsReview is pleased to present the Unlimited Access Plan with complete access Real ITIL-4-Practitioner-Deployment-Management Exam Questions to Peoplecert ITIL Practitioner Level exam papers with the actual Peoplecert ITIL Practitioner Level answers developed by our Peoplecert ITIL Practitioner Level course specialists.

Free PDF 2026 Peoplecert ITIL-4-Practitioner-Deployment-Management: ITIL 4 Practitioner: Deployment Management Latest Test Question

So our ITIL-4-Practitioner-Deployment-Management Actual Test materials will increase your possibility of getting them dramatically, Thanks for browsing our website and the attention you pay to our ITIL 4 Practitioner: Deployment Management exam practice questions.

If you still have doubt about ITIL-4-Practitioner-Deployment-Management cram PDF or ITIL-4-Practitioner-Deployment-Management dumps PDF file please contact us about your questions or you can try and download the ITIL-4-Practitioner-Deployment-Management cram sheet free demo.

Before you decide to buy, you can try our free demo of the ITIL-4-Practitioner-Deployment-Management training quiz.
