NEW QUESTION # 122

Which of the following would help a company avoid failure of a cloud project due to a lack of adherence of the company's operations and business processes to a cloud solution?

- A. Proof of value

- B. Cloud managed services
- C. Company baseline
- D. Industry benchmarks

Answer: A

Explanation:

A proof of value (POV) is a method of testing a cloud solution before fully adopting it, to ensure that it meets the company's operations and business processes. A POV can help a company avoid failure of a cloud project by validating the feasibility, functionality, and benefits of the cloud solution, and identifying any gaps or issues that need to be resolved. A POV can also help a company compare different cloud solutions and select the best one for their needs. A POV is different from a proof of concept (POC), which is a more technical demonstration of the cloud solution's capabilities and performance. NEW QUESTION # 123

A startup company wants to develop a new voice assistant that leverages technology that can improve its product based on end user input. Which of the following would MOST likely accomplish this goal?

- A. Blockchain
- B. Big Data
- C. VDI
- D. Machine learning

Answer: D

Explanation:

Machine learning is a technology that enables a voice assistant to improve its product based on end user input. Machine learning is a branch of artificial intelligence that allows systems to learn from data and experience, without being explicitly programmed. Machine learning can help a voice assistant to understand natural language, recognize speech, generate responses, and adapt to user feedback. Machine learning can also help a voice assistant to personalize its service, by learning the preferences, habits, and needs of each user. Machine learning can make a voice assistant more intelligent, accurate, and user-friendly over time.
