According to your actual situation, you can choose the suitable version from our Integration-Architect study question.

Salesforce Certified Integration Architect Sample Questions (Q62-Q67):

NEW QUESTION # 62
Northern Trail Outfitters (NTO) use Salesforce to track leads, opportunities, and to capture order details. However, Salesforce isn't the system that holds or processes orders. After the order details are captured in Salesforce, an order must be created in the remote system, which manages the orders lifecylce. The Integration Architect for the project is recommending a remote system that will subscribe to the platform event defined in Salesforce.
Which integration pattern should be used for this business use case?

- A. Batch Data Synchronization

- B. Request and Reply
- C. Remote Call In
- D. Fire and Forget

Answer: D

NEW QUESTION # 63
What should an integration architect recommend to ensure all integrations to the Northern Trail Outfitters' company portal use SSL mutual authentication?

- A. Generate a certification authority (CA) signed certificate
- B. Enforce SSL/TLS Mutual Authentication
- C. Enable My Domain and SSL/TLS

Answer: B

NEW QUESTION # 64
Northern Trail Outfitters (NTO) is looking to integrate three external systems that run nightly data enrichment processes in Salesforce. NTO has both of the following security and strict auditing requirements:
1. The external systems must follow the principle of least privilege, and
2. The activities of the eternal systems must be available for audit.
What should an Integration Architect recommend as a solution for these integrations?

- A. A shared Connected App for the three external system integrations.
- B. A Connected App for each external system integration.
- C. A shared integration user for the three external system integrations.
- D. A unique integration user for each external system integration.

Answer: B

NEW QUESTION # 65
A security assessment noted vulnerabilities on unmanaged packages; notably, secrets like usernames, passwords, and OAuth tokens are stored in plain text. Which persistence mechanisms should an integration architect require to ensure that secrets are protected from deliberate or inadvertent exposure?

- A. Protected Custom Metadata Types and Named Credentials
- B. Encrypted Custom Fields and Protected Custom Settings
- C. Named Credentials and Protected Custom Settings

Answer: C

NEW QUESTION # 66
A developer has been tasked by the integration architect tobuild a solution based on the Streaming API. The developer has done some research and has found there are different implementations of the events in Salesforce (Push Topic Events, Change Data Capture, Generic Streaming, Platform Events), but is unsure ofto proceed with the implementation.The developer asks the system architect for some guidance.
What should the architect consider when making the recommendation?

- A. Change Data Capture can be published from Apex.
- B. Push Topic Event can define a custom payload.B Change Data Capture does not have record access support.
- C. Apex triggers can subscribe to Generic Events.

Answer: A

Explanation:
Push Topic Events can define a custom payload, which is one of the factors that should be considered when choosing a Streaming

APIimplementation. Push Topic Events are based on SOQL queries that define the data changes to be notified of. You can specify the fields to be returned in the event message by using the SELECT clause in the query. This allows you to customize the payload according to your needs2 References: Create a PushTopic

NEW QUESTION # 67

......
