## FCP\_FAZ\_AN-7.6 – 100% Free Latest Exam Vce | Efficient Reliable FCP - FortiAnalyzer 7.6 Analyst Exam Pdf

If you buy the FCP\_FAZ\_AN-7.6 study materials of us, we ensure you to pass the exam. Since the FCP\_FAZ\_AN-7.6 study materials have the quality and the accuracy, and it will help you pass exam just one time. Buying FCP\_FAZ\_AN-7.6 exam dumps are pass guaranteed and money back guaranteed for the failure. Furthermore, we choose international confirmation third party for payment for the FCP\_FAZ\_AN-7.6 Exam Dumps, therefore we can ensure you the safety of your account and your money. The refund money will return to your payment account.

## Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q42-Q47):

### NEW QUESTION # 42

A playbook contains five tasks in total. An administrator runs the playbook and four out of five tasks finish successfully, but one task fails.

What will be the status of the playbook after it is run?

- A. Success
- B. Failed
- C. Upstream\_failed
- D. Attention required

**Answer: D**

Explanation:

In FortiAnalyzer, when a playbook is run, each task's status impacts the overall playbook status.

Here's what happens based on task outcomes:

Status When All Tasks Succeed:

If all tasks finish successfully, the playbook status is marked as Success.

Status When Some Tasks Fail:

If one or more tasks in the playbook fail, but others succeed, the playbook status generally changes to Attention required. This status indicates that the playbook completed execution but requires review due to one or more tasks failing.

This is different from a complete Failed status, which is used if the playbook cannot proceed due to a critical error in an early task, often one that upstream tasks depend on.

#### NEW QUESTION # 43

Which two FortiAnalyzer features allow you to automatically build a dataset and chart based on a filtered search result? (Choose two.)

- A. Custom View
- B. Dataset Library
- C. Export to Report Chart (FortiView)
- D. Chart Builder

**Answer: C,D**

#### NEW QUESTION # 44

What is the purpose of using data selectors when configuring event handlers?

- A. They are common filters that can be applied simultaneously to all event handlers.
- B. They download new filters can be used in event handlers.
- C. They filter the types of logs that FortiAnalyzer can accept from registered devices.
- D. They apply their filter criteria to the entire event handler so that you don't have to configure the same criteria in the individual rules.

**Answer: D**

#### NEW QUESTION # 45

Which two statements about playbook execution are true? (Choose two)

- A. FortiAnalyzer will not commit changes made by a Failed playbook
- B. The Playbook Monitor provides troubleshooting logs
- C. You can <un the default debugging playbook to investigate playbook errors.
- D. Even I the playbook status is Failed, individual tasks may have succeeded.

**Answer: A,B**

#### NEW QUESTION # 46

(How does FortiAnalyzer block indicators? (Choose one answer))

- A. It uses a FortiManager connector to send the block list.
- B. It uses a webhook to allow FortiGate to send the block list.
- C. It uses a FortiClient EMS connector to send the block list.

- D. It uses an automation script to update FortiGate with the block list.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of knowledge of FortiAnalyzer 7.6 Study guide documents:

The FortiAnalyzer study guide states that blocking suspicious indicators is performed by integrating FortiAnalyzer with FortiManager (not by directly pushing a block list to FortiGate). Specifically: "To use this feature, you must set up an authorized FortiManager connector for the FortiAnalyzer on the Fabric Connector page of FortiAnalyzer." It then explains the backend mechanism: "In the back end, a playbook called Block\_indicator runs every

5 minutes to send the information to FortiManager." After a successful run, "the blocked indicator is pushed to the FortiManager External Resource list." From there, FortiManager can create threat feeds

/security profiles/policy blocks and push policies to FortiGate as needed-however, the study guide clarifies:

"The Blocked status on FortiAnalyzer confirms that the list is updated on FortiManager, but it is not synced to FortiGate." Therefore, FortiAnalyzer blocks indicators by using a FortiManager connector and sending the block information to FortiManager (Option B).

## NEW QUESTION # 47

.....

Confronting a tie-up during your review of the exam? Feeling anxious and confused to choose the perfect FCP\_FAZ\_AN-7.6 latest dumps to pass it smoothly? We understand your situation of susceptibility about the exam, and our FCP\_FAZ\_AN-7.6 test guide can offer timely help on your issues right here right now. Without tawdry points of knowledge to remember, our experts systematize all knowledge for your reference. You can download our free demos and get to know synoptic outline before buying. Just hold the supposition that you may fail the exam even by the help of our FCP\_FAZ\_AN-7.6 Study Tool, we can give full refund back or switch other versions for you to relieve you of any kind of losses. What is more, we offer supplementary content like updates for one year after your purchase.
