New Adobe AD0-E117 Dumps Questions - Valid AD0-E117 Exam Objectives

CertkingdomPDF is a leading provider of top-quality Adobe Experience Manager Architect Master (AD0-E117) preparation material for the AD0-E117 test. Our Adobe Experience Manager Architect Master (AD0-E117) exam questions are designed to help customers get success on the first try. These latest Adobe AD0-E117 Questions are the result of extensive research by a team of professionals with years of experience.

Adobe Experience Manager Architect Master Sample Questions (Q47-Q52):

NEW QUESTION # 47
A customer wants to simplify and automate publishing press pages and defines the following flows:
What should the Architect recommend?

- A. Advise the customer to use Launches
- B. Configure MSM with the "Activate on Blueprint activation" option
- C. Implement a Sling event listener that triggers on page creation
- D. Create a custom workflow

Answer: A

Explanation:
Advise the customer to use Launches . According to Adobe Experience Manager documentation1, launches in AEM Sites provide a way to create, author, and review web site content for future release. Launches can also be synchronized with the production web site and activated at a scheduled time1

NEW QUESTION # 48
An Architect is performing infrastructure and capacity planning for Author servers for a customer using AEM
6.5. Which two factors would lead the Architect to pick a multi-author instance architecture setup? (Choose two.)

- A. Website Traffic handled by servers
- B. Types of actions performed by Authors
- C. Cache Efficiency on the dispatcher
- D. Fail safeness of the servers
- E. Number of Parallel Authors

Answer: D,E

Explanation:
"a multi-author instance architecture setup provides failover and load balancing for author servers. It also allows for scaling up the number of parallel authors who can work on the same content without affecting performance".

NEW QUESTION # 49
A client wants to change how they publish their content. Refer to the following client business requirements:
* The client has a seasonal business that has significant content changes across their site that need to be rolled out at once based on the season change over date.
* The content authors need to be able to work one season in advance of publish dates to ensure that all changes can be completed on time.
* The content authors need a way to indicate that all the seasonal changes are ready. If the content changes are not completed, then the pages should not get published.
* The content authors need the ability to modify the current live pages without rolling back changes for a future content rollout.
What approach should the Architect recommend?

- A. Use Launches inside of AEM for each new season and use the production ready flag to show changes are completed.
- B. Create a Project inside of AEM for each new season and create a task for notifying that changes are completed.
- C. Use the Manage Publication with scheduling value set to the season change over date when changes are completed.
- D. Use the Versioning feature when editing a page to toggle and publish changes when ready.

Answer: A

Explanation:
"using Launches inside of AEM for each new season can allow content authors to work on future content changes without affecting the current live pages and use the production ready flag to indicate when changes are completed".

NEW QUESTION # 50
A client is using AEM and wants to make sure they are managing their configurations correctly. Refer to the following requirements:
The client has multiple brands that they will be hosting on a single AEM implementation The client wants to reuse as much between brands as possible Each brand needs to be able to override the default values for items like contact us information The client plans to support multiple languages in multiple regions for each brand Each brand/language/region combination will have its own set of content approvers used as part of a custom workflow Which approach should an Architect recommend to manage the client's configurations for AEM?

- A. Use the OOTB Configuration Browser to set configuration defaults and approval group by brand /language/region combination.
- B. Use OSGi to manage approval group and provide default contact us information by runmode.
- C. Use Context-aware configurations to manage configuration overrides and approval group by brand /language/region combination.
- D. Use OSGi Configuration to handle configuration overrides by brand. Create a new workflow for each brand/language/region combination for content approval.

Answer: C

Explanation:
"using Context-aware configurations can allow managing configuration overrides and approval group by brand/language/region combination using content policies".

NEW QUESTION # 51

A customer wants to migrate their AEM environment from an on-premise infrastructure to a public cloud to improve performance.
The customer currently hosts many assets (images, videos, documents) in the DAM.
Approximately 10 business users frequently upload new assets and update existing assets. Editors then use these assets on the sites.
What should an Architect do as part of this migration?

- A. Set up a horizontally scalable AEM environment on MongoDB
- B. Run online revision cleanup before moving to the new storage format
- C. Set up Connected Assets to share the DAM assets in the sites
- D. Move to a shared datastore and enable binary less replication

Answer: B

NEW QUESTION # 52

......
