Valid PSE-Strata-Pro-24 Exam Forum - 100% Pass 2026 First-grade Palo Alto Networks Relevant PSE-Strata-Pro-24 Questions

ExamcollectionPass's Palo Alto Networks PSE-Strata-Pro-24 practice exam software tracks your performance and provides results on the spot about your attempt. In this way, our Palo Alto Networks PSE-Strata-Pro-24 simulation software encourages self-analysis and self-improvement. Questions in the Palo Alto Networks PSE-Strata-Pro-24 Practice Test software bear a striking resemblance to those of the real test. This Palo Alto Networks PSE-Strata-Pro-24 practice exam software is easily accessible on all Windows laptops and computers.

ExamcollectionPass is one of the leading best platforms that have been offering valid, verified, and updated Palo Alto Networks Exam Questions for many years. Over this long time period, countless PSE-Strata-Pro-24 exam candidates have passed their PSE-Strata-Pro-24 Exam. They all got help from real and valid ExamcollectionPass Palo Alto Networks Systems Engineer Professional - Hardware Firewall (PSE-Strata-Pro-24) practice questions and prepared well for the final Palo Alto Networks exam.

Relevant PSE-Strata-Pro-24 Questions - PSE-Strata-Pro-24 Valid Test

Format

To make sure you have all the practice you need, our PSE-Strata-Pro-24 practice test also includes numerous opportunities for you to put your skills to the PSE-Strata-Pro-24 test. Our Palo Alto Networks PSE-Strata-Pro-24 practice exams simulate the real thing, so you can experience the pressure and environment of the actual Palo Alto Networks Systems Engineer Professional - Hardware Firewall (PSE-Strata-Pro-24) test before the day arrives. You'll receive detailed feedback on your performance, so you know what areas to focus on and improve. At the ExamcollectionPass, we're committed to your success and believe in the effectiveness of our PSE-Strata-Pro-24 exam dumps.

Palo Alto Networks PSE-Strata-Pro-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• Business Value and Competitive Differentiators: This section of the exam measures the skills of Technical Business Value Analysts and focuses on identifying the value proposition of Palo Alto Networks Next-Generation Firewalls (NGFWs). Candidates will assess the technical business benefits of tools like Panorama and SCM. They will also recognize customer-relevant topics and align them with Palo Alto Networks' best solutions. Additionally, understanding Strata's unique differentiators is a key component of this domain.
Topic 2	• Deployment and Evaluation: This section of the exam measures the skills of Deployment Engineers and focuses on identifying the capabilities of Palo Alto Networks NGFWs. Candidates will evaluate features that protect against both known and unknown threats. They will also explain identity management from a deployment perspective and describe the proof of value (PoV) process, which includes assessing the effectiveness of NGFW solutions.
Topic 3	• Architecture and Planning: This section of the exam measures the skills of Network Architects and emphasizes understanding customer requirements and designing suitable deployment architectures. Candidates must explain Palo Alto Networks' platform networking capabilities in detail and evaluate their suitability for various environments. Handling aspects like system sizing and fine-tuning is also a critical skill assessed in this domain.
Topic 4	• Network Security Strategy and Best Practices: This section of the exam measures the skills of Security Strategy Specialists and highlights the importance of the Palo Alto Networks five-step Zero Trust methodology. Candidates must understand how to approach and apply the Zero Trust model effectively while emphasizing best practices to ensure robust network security.

Palo Alto Networks Systems Engineer Professional - Hardware Firewall Sample Questions (Q36-Q41):

NEW QUESTION # 36
A prospective customer has provided specific requirements for an upcoming firewall purchase, including the need to process a minimum of 200,000 connections per second while maintaining at least 15 Gbps of throughput with App-ID and Threat Prevention enabled.
What should a systems engineer do to determine the most suitable firewall for the customer?

- A. Use the online product configurator tool provided on the Palo Alto Networks website.
- **B. Download the firewall sizing tool from the Palo Alto Networks support portal.**
- C. Use the product selector tool available on the Palo Alto Networks website.
- D. Upload 30 days of customer firewall traffic logs to the firewall calculator tool on the Palo Alto Networks support portal.

Answer: B

Explanation:
* Firewall Sizing Tool (Answer B):
* The firewall sizing tool is the most accurate way to determine the suitable firewall model based on specific customer requirements, such as throughput, connections per second, and enabled features like App-ID and Threat Prevention.
* By inputting traffic patterns, feature requirements, and performance needs, the sizing tool provides tailored recommendations.

* Why Not A:
* While uploading traffic logs to the calculator tool may help analyze traffic trends, it is not the primary method for determining firewall sizing.
* Why Not C or D:
* The product configurator tool and product selector tool are not designed for detailed performance analysis based on real-world requirements like connections per second or enabled features.
References from Palo Alto Networks Documentation:
* Firewall Sizing Guide

NEW QUESTION # 37

A prospective customer is interested in Palo Alto Networks NGFWs and wants to evaluate the ability to segregate its internal network into unique BGP environments.
Which statement describes the ability of NGFWs to address this need?

- A. It can be addressed by creating multiple eBGP autonomous systems.
- B. It cannot be addressed because BGP must be fully meshed internally to work.
- C. It cannot be addressed because PAN-OS does not support it.
- D. It can be addressed with BGP confederations.

Answer: D

Explanation:
Step 1: Understand the Requirement and Context
* Customer Need: Segregate the internal network into unique BGP environments, suggesting multiple isolated or semi-isolated routing domains within a single organization.
* BGP Basics:
* BGP is a routing protocol used to exchange routing information between autonomous systems (ASes).
* eBGP: External BGP, used between different ASes.
* iBGP: Internal BGP, used within a single AS, typically requiring a full mesh of peers unless mitigated by techniques like confederations or route reflectors.
* Palo Alto NGFW: Supports BGP on virtual routers (VRs) within PAN-OS, enabling advanced routing capabilities for Strata hardware firewalls (e.g., PA-Series).
* "PAN-OS supports BGP for dynamic routing and network segmentation" (docs.paloaltonetworks.com/pan-os /10-2/pan-os-networking-admin/bgp).
Step 2: Evaluate Each Option
Option A: It cannot be addressed because PAN-OS does not support it
Analysis:
PAN-OS fully supports BGP, including eBGP, iBGP, confederations, and route reflectors, configurable under
"Network > Virtual Routers > BGP."
Features like multiple virtual routers and BGP allow network segregation and routing policy control.
This statement contradicts documented capabilities.
Verification:
"Configure BGP on a virtual router for dynamic routing" (docs.paloaltonetworks.com/pan-os/10-2/pan-os- networking-admin/bgp/configure-bgp).
Conclusion: Incorrect-PAN-OS supports BGP and segregation techniques. Not Applicable.
Option B: It can be addressed by creating multiple eBGP autonomous systems Analysis:
eBGP: Used between distinct ASes, each with a unique AS number (e.g., AS 65001, AS 65002).
Within a single organization, creating multiple eBGP ASes would require:
Assigning unique AS numbers (public or private) to each internal segment.
Treating each segment as a separate AS, peering externally with other segments via eBGP.
Challenges:
Internally, this isn't practical for a single network-it's more suited to external peering (e.g., with ISPs).
Requires complex management and public/private AS number allocation, not ideal for internal segregation.
Doesn't leverage iBGP or confederations, which are designed for internal AS management.
PAN-OS supports eBGP, but this approach misaligns with the intent of internal network segregation.
Verification:
"eBGP peers connect different ASes" (docs.paloaltonetworks.com/pan-os/10-2/pan-os-networking-admin/bgp /bgp-concepts).
Conclusion: Possible but impractical and not the intended BGP solution for internal segregation. Not Optimal

NEW QUESTION # 38

In addition to Advanced DNS Security, which three Cloud-Delivered Security Services (CDSS) subscriptions utilize inline machine learning (ML)? (Choose three)

- A. Advanced Threat Prevention
- B. Advanced URL Filtering
- C. Enterprise DLP
- D. IoT Security
- E. Advanced WildFire

Answer: A,B,C

NEW QUESTION # 39

In addition to Advanced DNS Security, which three Cloud-Delivered Security Services (CDSS) subscriptions utilize inline machine learning (ML)? (Choose three)

- A. Advanced WildFire
- B. Enterprise DLP
- C. Advanced Threat Prevention
- D. Advanced URL Filtering
- E. IoT Security

Answer: A,C,D

Explanation:
To secure and protect your traffic using CDSS, Cloud NGFW for AWS provides Palo Alto Networks protections such as:
* App-ID. Based on patented Layer 7 traffic classification technology, the App-ID service allows you to see the applications on your network, learn how they work, observe their behavioral characteristics, and understand their relative risk. Cloud NGFW for AWS identifies applications and application functions via multiple techniques, including application signatures, decryption, protocol decoding, and heuristics.
These capabilities determine the exact identity of applications traversing your network, including those attempting to evade detection by masquerading as legitimate traffic by hopping ports or using encryption.
* Threat Prevention. The Palo Alto Networks Threat Prevention service protects your network by providing multiple layers of prevention to confront each phase of an attack. In addition to essential intrusion prevention service (IPS) capabilities, Threat Prevention possesses the unique ability to detect and block threats on any ports-rather than simply invoking signatures based on a limited set of predefined ports.
* Advanced URL Filtering. This critical service built into Cloud NGFW for AWS stops unknown web- based attacks in real-time to prevent patient zero with the industry's only ML-powered Advanced URL Filtering. Advanced URL Filtering combines the renowned Palo Alto Networks malicious URL database with the industry's first real-time web protection engine so organizations can automatically and instantly detect and prevent new malicious and targeted web-based threats.
* DNS. DNS Security gives you real-time protection, applying industry-first protections to disrupt attacks that use DNS. Tight integration with a Palo Alto Networks Next-Generation Firewall (NGFW) gives you automated protections, prevents attackers from bypassing security measures, and eliminates the need for independent tools or changes to DNS routing. DNS Security gives your organization a critical new control point to stop attacks.
* WildFire. Palo Alto Networks Advanced WildFire is the industry's largest cloud-based malware prevention engine that protects organizations from highly evasive threats using patented machine learning detection engines, enabling automated protections across network, cloud, and endpoints.
Advanced WildFire analyzes every unknown file for malicious intent and then distributes prevention in record time-60 times faster than the nearest competitor-to reduce the risk of patient zero.

NEW QUESTION # 40

What does Policy Optimizer allow a systems engineer to do for an NGFW?

- A. Act as a migration tool to import policies from third-party vendors
- B. Show unused licenses for Cloud-Delivered Security Services (CDSS) subscriptions and firewalls
- C. Identify Security policy rules with unused applications

- D. Recommend best practices on new policy creation

Answer: C

Explanation:

Policy Optimizer is a feature designed to help administrators improve the efficiency and effectiveness of security policies on Palo Alto Networks Next-Generation Firewalls (NGFWs). It focuses on identifying unused or overly permissive policies to streamline and optimize the configuration.
* Why "Identify Security policy rules with unused applications" (Correct Answer C)?Policy Optimizer provides visibility into existing security policies and identifies rules that have unused or outdated applications. For example:
* It can detect if a rule allows applications that are no longer in use.
* It can identify rules with excessive permissions, enabling administrators to refine them for better security and performance.By addressing these issues, Policy Optimizer helps reduce the attack surface and improves the overall manageability of the firewall.
* Why not "Recommend best practices on new policy creation" (Option A)?Policy Optimizer focuses on optimizing existing policies, not creating new ones. While best practices can be applied during policy refinement, recommending new policy creation is not its purpose.
* Why not "Show unused licenses for Cloud-Delivered Security Services (CDSS) subscriptions and firewalls" (Option B)?Policy Optimizer is not related to license management or tracking. Identifying unused licenses is outside the scope of its functionality.
* Why not "Act as a migration tool to import policies from third-party vendors" (Option D)?Policy Optimizer does not function as a migration tool. While Palo Alto Networks offers tools for third-party firewall migration, this is separate from the Policy Optimizer feature.
Reference: The Palo Alto Networks Policy Optimizer documentation highlights its primary function of identifying unused or overly broad policy rules to optimize firewall configurations.

NEW QUESTION # 41

......

Most people are nervous and anxious to take part in the PSE-Strata-Pro-24 exam for the first time. Then it is easy for them to make mistakes. So it is important to get familiar with the real test environment. Also, the real test environment of the PSE-Strata-Pro-24 Study Materials can help you control time. After all, you must submit your practice in limited time in PSE-Strata-Pro-24 practice materials. Trust in our PSE-Strata-Pro-24 training guide, and you will get success for sure.
