Sometimes many people find they always have one begin that if I have money.....If so I advise you apply for an IT certification steadfastly. Salesforce Analytics-Admn-201 valid exam questions and answers give an excellent beginning for your dream. If you pass exams and get a certification, you can obtain a high-salary job and realize your goal. Analytics-Admn-201 Valid Exam Questions and answers help you pass exam certainly. We have a series of products for IT certification exams.

Salesforce Analytics-Admn-201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Troubleshooting: This section of the exam measures the skills of Support Specialists and covers resolving common Tableau Server issues. Candidates must know how to reset accounts, package logs, validate site resources, rebuild search indexes, and use analysis reports. It also includes understanding the role of browser cookies and creating support requests when needed.
Topic 2	<ul style="list-style-type: none"> • Installation and Configuration: This section of the exam measures the skills of Server Engineers and covers the process of installing Tableau Server, understanding installation paths, identity store options, SSO integrations, SSL setup, and silent installs. Candidates also need to demonstrate the ability to configure Tableau Server by setting cache, distributing processes, customizing sites, and configuring user quotas. It further includes adding users, managing their roles and permissions, and applying Tableau’s security model at different levels from sites to workbooks.
Topic 3	<ul style="list-style-type: none"> • Administration: This section of the exam measures the skills of Tableau Administrators and covers the day-to-day tasks of maintaining Tableau Server. Candidates should understand how to create and manage schedules, subscriptions, backups, and restores, as well as how to use tools such as TSM, Tabcmd, and REST API. It emphasizes monitoring, server analysis, log file usage, and embedding practices. It also includes managing projects, sites, and nested structures, while contrasting end-user and administrator abilities. Knowledge of publishing, web authoring, sharing views, caching, and data source certification is also tested.
Topic 4	<ul style="list-style-type: none"> • Migration & Upgrade: This section of the exam measures the skills of System Engineers and covers the process of upgrading and migrating Tableau Server environments. Candidates should understand how to carry out clean reinstalls, migrate servers to new hardware, and maintain backward compatibility during the process.
Topic 5	<ul style="list-style-type: none"> • Connecting to and Preparing Data: This section of the exam measures the skills of Tableau Administrators and covers the basic understanding of Tableau Server’s interface, navigation, and overall topology. Candidates are expected to recognize both client and server components, understand how these interact, and know where to find information about versions, releases, and updates. It also focuses on system requirements, including hardware, operating systems, browsers, email configurations, cloud considerations, and licensing models. Additionally, it examines knowledge of server processes, data source types, network infrastructure, and ports needed for a stable deployment.

2026 Salesforce Realistic Analytics-Admn-201 Reliable Dumps Pass Guaranteed Quiz

You don't know how to acquire a promotion quickly while you're trying to get a new job or already have one but need a promotion. The sole option is Salesforce Analytics-Admn-201 certification, which makes it simple for you to advance in your career. Your skills will advance and your resume will be enhanced thanks to the Salesforce Analytics-Admn-201 Certification.

Salesforce Certified Tableau Server Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which two settings should you configure to allow users to post comments on a visualization? (Choose two.)

- A. Comments must be enabled on the site Settings page
- B. Add Comments must be allowed in permissions for the relevant users
- C. The relevant users must have a minimum site role of Explorer (can publish)
- D. Comments must be enabled on the server Settings page

Answer: A,B

Explanation:

Comments on visualizations foster collaboration in Tableau Server-let's break down the requirements:

* Commenting Prerequisites:

* Site-Level Enablement: Comments must be activated for the site.

* Permission: Users need the "Add Comment" capability on the content.

* Site Role: Minimum role of Viewer allows commenting if permissions are set.

* Option B (Add Comments must be allowed in permissions): Correct.

* Details: In the Permissions dialog (e.g., for a workbook), set "Add Comment" to "Allowed" for users/groups. Default is "Denied" unless explicitly enabled.

* How: Content > Workbooks > Actions > Permissions > Edit Rule.

* Why: Permissions are granular-site enablement alone isn't enough.

* Option D (Comments must be enabled on the site Settings page): Correct.

* Details: Go to Site > Settings > General > Allow Comments-check the box.

* Why: This is a site-wide toggle (default: off). Without it, no one can comment, regardless of permissions.

* Option A (Minimum site role of Explorer - can publish): Incorrect.

* Why: Viewer role suffices if permissions allow-Explorer (can publish) isn't required (it adds publishing, not commenting).

* Option C (Server Settings page): Incorrect.

* Why: Comments are a site-level feature, not server-wide-no such toggle exists in TSM's Server Settings.

Why This Matters: Enabling comments at both site and content levels ensures controlled collaboration-key for team insights.

Reference: Tableau Server Documentation - "Enable Comments" (<https://help.tableau.com/current/server/en-us/comment.htm#enable>).

NEW QUESTION # 23

You attempt to delete a user who owns content on a Tableau Server. What is the result of the delete action?

- A. The user and all of the user's content is deleted
- B. The user is deleted, and the user's content is reassigned to the server administrator
- C. The user is switched to an Unlicensed site role and is NOT deleted
- D. The user is deleted, and the user's content is reassigned to the project leader

Answer: C

Explanation:

Deleting a user in Tableau Server involves handling their owned content (workbooks, data sources)-let's analyze the process:

* Deletion Rules:

* Ownership Check: Tableau prevents deletion if the user owns content to avoid orphaning it.

- * Action: Instead of deleting, the user's site role is set to Unlicensed, retaining their account and content ownership.
 - * Resolution: An admin must reassign ownership (e.g., via Users > Actions > Change Owner) before deletion.
 - * Option D (User switched to Unlicensed and NOT deleted): Correct.
 - * Details: Attempting deletion (e.g., Users > Select User > Actions > Delete) triggers a check. If content exists, the user becomes Unlicensed-still in the system but unable to log in.
 - * Why: Protects data integrity-content remains accessible for reassignment.
 - * Option A (Deleted, content to server admin): Incorrect.
 - * Why: No automatic reassignment to the server admin-manual action is required first.
 - * Option B (Deleted, content to project leader): Incorrect.
 - * Why: Project leaders don't automatically inherit content-no such mechanism exists.
 - * Option C (User and content deleted): Incorrect.
 - * Why: Tableau avoids deleting content with the user-too destructive without explicit intent.
- Why This Matters: This safeguard prevents accidental data loss, ensuring admins manage ownership transitions deliberately.
Reference: Tableau Server Documentation - "Delete Users" (https://help.tableau.com/current/server/en-us/users_delete.htm).

NEW QUESTION # 24

A user named John publishes a workbook named Sales Quota to a project named Sales. The All Users group has the View and Download Workbook/Save As capabilities only to the Sales project. A user named Sandy has the Explorer (can publish) site role, on the Sales Quota workbook. No other users or groups have permissions to the Sales project. The Sales project is set to Managed by the owner. What are the effective rights for Sandy?

- A. No access
- B. All of the capabilities associated with the Editor rule
- C. View and Download Workbook/Save As
- D. The same rights as John

Answer: C

NEW QUESTION # 25

What should you do to configure the view URL and enable recording for a site that has recording workbook performance metrics enabled?

- A. Type `:record_performance=yes&` at the end of the view URL, immediately after the session ID
- B. Delete the session ID in the URL and reload the view
- C. Type `:record_performance=yes&` at the end of the view URL, immediately before the session ID
- D. Click the Performance link in the toolbar at the top of the view

Answer: A

Explanation:

Tableau Server can record performance metrics for workbooks to troubleshoot slow-loading views. This feature must be enabled at the site level (via Settings > General > Allow Performance Recording). Once enabled, you can trigger recording for a specific view by modifying its URL.

The correct syntax is to append `:record_performance=yes&` to the view URL, immediately after the session ID. For example:

* Original

URL: `http://server/##/site/my-site/views/workbook/view?;iid=1`

* Modified

URL: `http://server/##/site/my-site/views/workbook/view?;iid=1:record_performance=yes`

&

After loading the view with this parameter, a performance recording is generated and accessible via the Performance option in the toolbar.

- * Option B (Type `:record_performance=yes&` at the end of the view URL, immediately after the session ID): Correct. This follows Tableau's documented method for enabling performance recording.
- * Option A (Click the Performance link in the toolbar): Incorrect. The Performance link appears only after recording is triggered via the URL; it's not the method to enable it.
- * Option C (Type `:record_performance=yes&` immediately before the session ID): Incorrect. The parameter must follow the session ID (e.g., `;iid=1`) to function correctly.
- * Option D (Delete the session ID in the URL and reload the view): Incorrect. The session ID is required for the view to load

properly; removing it breaks the URL.

Reference: Tableau Server Documentation - "Record Performance of a View" (https://help.tableau.com/current/server/en-us/perf_record.htm).

NEW QUESTION # 26

What command should you run to update the automatically-generated secrets that are created during a Tableau Server installation?

- A. **tsm security regenerate-internal-tokens**
- B. tsm security validate-asset-keys
- C. tsm data-access caching set -r 1
- D. tsm licenses refresh

Answer: A

Explanation:

Tableau Server uses internal secrets (tokens) for secure communication between its processes (e.g., Repository, File Store). These are automatically generated during installation and can be regenerated if compromised or for security maintenance. The command to update these is:

* tsm security regenerate-internal-tokens: This regenerates the internal security tokens, ensuring all processes use the new tokens after a restart.

* Option C (tsm security regenerate-internal-tokens): Correct. This is the documented command for updating internal secrets.

* Option A (tsm data-access caching set -r 1): Incorrect. This command configures caching behavior, not security tokens.

* Option B (tsm licenses refresh): Incorrect. This refreshes license data, unrelated to internal secrets.

* Option D (tsm security validate-asset-keys): Incorrect. This validates encryption keys for assets, not internal tokens.

Reference: Tableau Server Documentation - "Regenerate Internal Tokens" (https://help.tableau.com/current/server/en-us/cli_security.htm#regenerate-internal-tokens).

NEW QUESTION # 27

.....

The Analytics-Admn-201 learning materials are of high quality, mainly reflected in the adoption rate. As for our Analytics-Admn-201 exam question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our Analytics-Admn-201 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our Analytics-Admn-201 Quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our Analytics-Admn-201 exam question is 99%. So our Analytics-Admn-201 study guide is a good choice for you.
