You can also trust on ITExamSimulator Juniper JN0-1103 exam dumps and start JN0-1103 exam preparation with confidence. The ITExamSimulator Design - Associate (JNCIA-Design) (JN0-1103) practice questions are designed and verified by experienced and qualified Juniper exam trainers. They utilize their expertise, experience, and knowledge and ensure the top standard of ITExamSimulator JN0-1103 Exam Dumps. So you can trust ITExamSimulator Juniper JN0-1103 exam questions with complete peace of mind and satisfaction.

Juniper JN0-1103 Exam Syllabus Topics:

Topic	Details
Topic 1	• Campus and Branch LAN Design: This section of the exam measures skills of LAN Infrastructure Specialists and covers considerations for designing wired campus or branch LANs. It addresses best practices in campus LAN design, modular design approaches, subnet and VLAN planning, and access control mechanisms. The section also introduces Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) architectures and discusses campus oversubscription ratios and design architectures.
Topic 2	• Campus and Branch WAN Design: This section of the exam measures skills of WAN Solutions Architects and covers considerations for designing campus or branch WANs. It includes understanding WAN connectivity functions, best practices for WAN design, performance optimization, VPN design, and implementing high availability through active • active and active • passive configurations. The section also explores Software-Defined WAN (SD-WAN) design considerations, devices, assurance models, and intersite connectivity.
Topic 3	• Customer Network Design Requirements: This section of the exam measures skills of Network Design Engineers and covers the foundational aspects of network design. It includes understanding Juniper's life-cycle service approach, defining proposal boundaries, and considerations for both greenfield and brownfield deployments. The section also addresses top-down network design methodologies and capacity planning to ensure scalable and efficient network infrastructures.
Topic 4	• Securing the Network: This section of the exam measures the skills of Security Architects and covers essential security design principles. It encompasses general security considerations, strategies for securing data centers and campus WANs, and the implementation of zero-trust security models. Additionally, it delves into Secure Access Service Edge (SASE) frameworks to enhance network security posture.

JN0-1103 Valid Test Tutorial | JN0-1103 Latest Learning Materials

As we have become the leader in this career and our experts have studying the JN0-1103 exam braindumps for many years and know every detail about this subjest. So our JN0-1103 simulating exam is definitely making your review more durable. To add up your interests and simplify some difficult points, our experts try their best to design our JN0-1103 Study Material and help you understand the learning guide better.

Juniper Design - Associate (JNCIA-Design) Sample Questions (Q159-Q164):

NEW QUESTION # 159
As a network architect, where would you add PTX Series routers?

- A. cellular edge
- B. access network
- C. core network
- D. branch location

Answer: C

Explanation:
PTX Series routers are purpose-built for the core network, offering ultra-high throughput, scalability, and low- latency forwarding ideal for service provider and large-scale data center cores.

NEW QUESTION # 160
What are three components used to enforce 802.1X in your design? (Choose three.)

- A. VoIP phone
- B. authenticator
- C. edge router
- D. authentication server
- E. supplicant

Answer: B,D,E

NEW QUESTION # 161
What are two aspects of brownfield projects? (Choose two.)

- A. Old equipment that should be replaced.
- B. New networks with few or no restraints to consider.
- C. Next-generation networks created from the ground up.
- D. Legacy applications that are no longer used.

Answer: A,D

NEW QUESTION # 162
You are evaluating an existing network to determine requirements for a network upgrade. In this scenario, which statement is true?

- A. A network baseline identifies traffic growth patterns across network devices.
- B. A network baseline identifies how many users are connected to the network.
- C. A network baseline identifies the type and level of traffic load on the network.
- D. A network baseline identifies devices that do not have redundant components.

Answer: C

NEW QUESTION # 163
Which three critical design blocks or functional areas benefit from HA design solutions? (Choose three.)

- A. WAN
- B. collocation
- C. data center
- D. campus
- E. home office

Answer: A,C,D

NEW QUESTION # 164

......

Up to 1 year of free updates of Juniper JN0-1103 exam questions are also available at ITExamSimulator. To test the features of our product before buying, you may also try a free demo. It is not difficult to clear the JN0-1103 certification exam if you have actual exam questions of at your disposal. Why then wait? Visit and download Juniper JN0-1103 updated exam questions right away to start the process of cracking your test in one go.
