

2026 Newest 1z0-1080-25–100% Free New Test Bootcamp | Exam Oracle Planning 2025 Implementation Professional Success

BONUS!!! Download part of Exams4Collection 1z0-1080-25 dumps for free: <https://drive.google.com/open?id=1MsIc5kv6Sg69xCJRtWfte59rDEll1MPg>

Therefore, make the most of this opportunity of getting these superb exam questions for the Oracle Planning 2025 Implementation Professional certification exam. We guarantee you that our top-rated Oracle 1z0-1080-25 Practice Exam (PDF, desktop practice test software, and web-based practice exam) will enable you to pass the 1z0-1080-25 certification exam on the very first go.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 2	<ul style="list-style-type: none">• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 3	<ul style="list-style-type: none">• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 4	<ul style="list-style-type: none">• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.

Topic 5	<ul style="list-style-type: none"> Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 6	<ul style="list-style-type: none"> Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 7	<ul style="list-style-type: none"> Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 8	<ul style="list-style-type: none"> Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 9	<ul style="list-style-type: none"> Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 10	<ul style="list-style-type: none"> Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 11	<ul style="list-style-type: none"> Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 12	<ul style="list-style-type: none"> Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 13	<ul style="list-style-type: none"> Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 14	<ul style="list-style-type: none"> Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 15	<ul style="list-style-type: none"> Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 16	<ul style="list-style-type: none"> Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 17	<ul style="list-style-type: none"> This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 18	<ul style="list-style-type: none"> Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 19	<ul style="list-style-type: none"> Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 20	<ul style="list-style-type: none"> Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 21	<ul style="list-style-type: none"> Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.

Exam 1z0-1080-25 Success | 1z0-1080-25 Preparation

Exams4Collection has designed Oracle 1z0-1080-25 pdf dumps format that is easy to use. Anyone can download the Oracle 1z0-1080-25 pdf questions file and use it from any location or at any time. Oracle PDF Questions files can be used on laptops, tablets, and smartphones. Moreover, you will get actual Oracle 1z0-1080-25 Pdf Dumps file.

Oracle Planning 2025 Implementation Professional Sample Questions (Q107-Q112):

NEW QUESTION # 107

You want to track budgets and review status, process issues, and approval unit ownership. Which two statements are true about approval unit hierarchies?

- A. You set up separate approval unit hierarchies for the budget scenario and the forecast scenario.
- B. The Approval path is dependent on the organizational structure.
- C. You can set up approvals to use secondary dimension.
- D. You can select an Approvals template of Hierarchy, Top Down, or Custom.

Answer: A,C

NEW QUESTION # 108

You want to allocate project expenses to one or more capital assets. Which two statements describe what you need to set up in Projects or Capital to share the data?

- A. In Projects, on the Enable page, enable projects of type Capital.
- B. In Capital, on the Enable page, in Map/Rename Dimensions, add a custom dimension called Project.
- C. In Projects, under Expenses, select Integration with Capital.
- D. In Capital, under Expenses, select Integration from Projects.

Answer: A,C

Explanation:

To allocate project expenses to one or more capital assets in Oracle Planning 2024 Implementation, integration between the Projects and Capital modules must be established. Two specific setup steps are required to enable this data sharing:

* B. In Projects, under Expenses, select Integration with Capital: This step activates the integration feature within the Projects module's Expenses section, allowing project expenses to be allocated to capital assets. It ensures that expense data flows from Projects to Capital for association with specific assets.

* D. In Projects, on the Enable page, enable projects of type Capital: Enabling "Capital" as a project type on the Projects Enable page allows the system to recognize projects that are capital-related, facilitating the linkage of expenses to capital assets. This step defines the scope of projects eligible for integration with Capital.

* A. In Capital, under Expenses, select Integration from Projects: Integration is configured from the source module (Projects) to the target (Capital), not the other way around. Capital receives data but does not initiate the integration.

* C. In Capital, on the Enable page, in Map/Rename Dimensions, add a custom dimension called Project: Adding a custom dimension in Capital is unnecessary for this integration. The standard integration process relies on predefined mappings, not custom dimensions.

Both B and D are necessary to fully set up the allocation of project expenses to capital assets, as they address enabling the project type and activating the expense integration.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Administering Projects - Integration with Capital" (docs.oracle.com, updated 2024). Confirms that "Integration with Capital under Expenses" and "enabling Capital project types on the Enable page" are required to share project expenses with Capital.

* Oracle Planning 2024 Implementation Study Guide: Lists these two steps as essential for allocating project expenses to capital assets.

NEW QUESTION # 109

Which three form validation rules options are supported in Planning?

- A. Validate only for cells and pages to which a user has access

- B. Validate only for users with access to this form
- C. Validate for all page combinations and all existing or potential blocks
- D. Validate only for pages with existing blocks
- E. Validate rules as Service Administrator, regardless of logged-in user, when the form is loaded or saved

Answer: A,C,D

Explanation:

In Oracle Planning 2024 Implementation, form validation rules ensure data integrity and usability by defining how forms are validated when loaded or saved. The platform supports multiple validation options tailored to performance, security, and user access, as outlined below:

* A. Validate only for cells and pages to which a user has access: This option restricts validation to the data cells and form pages that the logged-in user has permission to view or edit, based on security settings. It enhances performance by limiting the validation scope and ensures users only interact with relevant data.

* C. Validate for all page combinations and all existing or potential blocks: This comprehensive validation option checks all possible page combinations and data blocks (both existing and potential) within the form. It is useful for ensuring complete data consistency across the application, though it may impact performance due to its extensive scope.

* E. Validate only for pages with existing blocks: This option limits validation to pages that already contain data blocks, ignoring potential blocks that could be created. It strikes a balance between performance and thoroughness, focusing validation efforts on existing data.

* B. Validate rules as Service Administrator, regardless of logged-in user, when the form is loaded or saved: While Service Administrators have elevated privileges, this is not a distinct form validation rule option. Validation rules are applied based on form settings and user access, not specifically tied to the Service Administrator role overriding the logged-in user's context.

* D. Validate only for users with access to this form: This option overlaps with A but is less precise.

Validation is tied to cell-level and page-level access rather than a broad "users with access to this form" criterion, making A the more accurate choice per Oracle's terminology.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Designing Forms - Validation Rules" (docs.oracle.com, updated 2024). Describes validation options including "cells and pages a user has access to," "all page combinations and blocks," and "pages with existing blocks."

* Oracle Planning 2024 Implementation Study Guide: Lists the three supported validation options (A, C, E) under form design and validation settings, aligning with security and performance optimization features.

NEW QUESTION # 110

You want to create a dashboard to provide an overview at the beginning of the planning and forecasting process. You create a dashboard with Dashboard 1.0. Which three statements are true about Dashboard 1.0?

- A. You can switch easily between using the design environment and the runtime environment.
- B. You can include user variables in the global PV bar and the local POV.
- C. You can add hierarchical labels in charts.
- D. You can include multiple forms that dynamically update, including their associated charts.
- E. You can use a logarithmic scale in relevant chart types.

Answer: A,B,D

NEW QUESTION # 111

Which module do you enable and configure if you want to develop plans and forecasts with driver-based or based income statement, balance sheet, and cash flow planning, or revenue and expenses?

- A. Projects
- B. Strategic Workforce
- C. Capital
- D. Financials

Answer: D

NEW QUESTION # 112

.....

The most advantage of our 1z0-1080-25 exam torrent is to help you save time. It is known to us that time is very important for you. As the saying goes, an inch of time is an inch of gold; time is money. If time be of all things the most precious, wasting of time must be the greatest prodigality. We believe that you will not want to waste your time, and you must want to pass your 1z0-1080-25 Exam in a short time, so it is necessary for you to choose our Oracle Planning 2025 Implementation Professional prep torrent as your study tool. If you use our products, you will just need to spend 20-30 hours to take your exam.
