APMG-International ISO/IEC 27001 (2022) Foundation Exam 認定 ISO-IEC-27001-Foundation 試験問題 (Q36-Q41):

質問 # 36

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [?] these actions.

- A. improve the effectiveness of
- B. evaluate the effectiveness of
- C. apply competent resources to
- D. communicate

正解: B

解説:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

* integrate and implement the actions into its ISMS processes; and

* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

質問 # 37

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Maintain contact with legal authorities
- B. Regular review of contractual compliance
- C. Regular review of compliance
- D. Return assets to their legal owners

正解: C

解説:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls (Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer is A.

質問 # 38

What is the definition of a threat according to ISO/IEC 27000?

- A. The risk remaining after risk treatment

- B. A weakness of an asset or a control that can be exploited
- **C. A potential cause of an unwanted incident which can result in harm to a system or organization**
- D. A single or a series of unwanted or unexpected information security events

正解: C

解説:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.74, threat is defined as:

"Potential cause of an unwanted incident, which can result in harm to a system or organization." This definition directly matches option A.

* Option B refers to an "information security incident" (ISO/IEC 27000:2018, Clause 3.32).

* Option C describes a "vulnerability" (ISO/IEC 27000:2018, Clause 3.67).

* Option D refers to "residual risk" (ISO/IEC 27000:2018, Clause 3.61).

The standard emphasizes that threats exploit vulnerabilities, causing incidents that can harm information confidentiality, integrity, and availability. Correctly identifying threats is critical for risk assessment (Clause

6.1.2). Thus, the correct definition per ISO/IEC 27000 is A.

質問 # 39

Identify the missing word in the following sentence.

According to ISO/IEC 27000, the definition of risk [?] is a "process to comprehend the nature of risk and to determine the level of risk."

- A. Management
- **B. Analysis**
- C. Evaluation
- D. Assessment

正解: B

解説:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

ISO/IEC 27000 defines:

* Risk analysis: "process to comprehend the nature of risk and to determine the level of risk" (Clause 3.58).

* Risk assessment: the overall process of risk identification, risk analysis, and risk evaluation.

* Risk evaluation: compares results of risk analysis against risk criteria to determine priority.

* Risk management: coordinated activities to direct and control an organization with regard to risk.

Therefore, the missing word in the given definition is "analysis".

This is important for ISMS implementation: organizations must understand the distinctions. Risk analysis is the core technical evaluation stage, while assessment is the broader process including evaluation, and management refers to the overall governance of risks.

Thus, the correct verified answer is B: Analysis.

質問 # 40

Which is a control title within Annex A of ISO/IEC 27001?

- A. Protection of documents
- B. Change control
- **C. Information security in supplier relationships**
- D. Responsibilities and procedures

正解: C

解説:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

In ISO/IEC 27002:2022, which provides control guidance for Annex A of ISO/IEC 27001, Clause 5.19 is titled: "Information security in supplier relationships." This control requires organizations to ensure that information security is addressed in supplier agreements and relationships. It is part of the Organizational Controls theme. The other options are not control titles in Annex A:

* "Responsibilities and procedures" (B) was used in older standards like ISO/IEC 27001:2005 but no longer exists.
