Our Palo Alto Networks PCCP dumps assists the candidates of the test with its three formats to advance their preparation as per various learning needs. A team of experts at PassSureExam has designed the PCCP Pdf Format to help applicants who are too busy to prepare intensively for the Palo Alto Networks PCCP certification exam on the first go.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.
Topic 2	<ul style="list-style-type: none"> • Cybersecurity: This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.
Topic 3	<ul style="list-style-type: none"> • Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.

Why we are ahead of the other sites in the IT training industry? Because the information we provide have a wider coverage, higher quality, and the accuracy is also higher. So PassSureExam is not only the best choice for you to participate in the Palo Alto Networks Certification PCCP Exam, but also the best protection for your success.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q107-Q112):

NEW QUESTION # 107

Under which category does an application that is approved by the IT department, such as Office 365, fall?

- A. unsanctioned
- B. prohibited
- C. tolerated
- **D. sanctioned**

Answer: D

Explanation:

A sanctioned application is an application that is approved by the IT department and meets the security and compliance requirements of the organization. Sanctioned applications are allowed to access the organization's network and data and are monitored and protected by the IT department. Examples of sanctioned applications are Office 365, Salesforce, and Zoom. Sanctioned applications are different from unsanctioned, prohibited, and tolerated applications, which are not approved by the IT department and may pose security risks to the organization. Unsanctioned applications are applications that are used by the employees without the IT department's knowledge or consent, such as Dropbox, Gmail, or Facebook. Prohibited applications are applications that are explicitly forbidden by the IT department, such as BitTorrent, Tor, or malware. Tolerated applications are applications that are not approved by the IT department, but are not blocked or restricted, such as Skype, Spotify, or YouTube. NEW QUESTION # 108

Which statement describes a host-based intrusion prevention system (HIPS)?

- A. It scans a Wi-Fi network for unauthorized access and removes unauthorized devices.
- B. It is placed as a sensor to monitor all network traffic and scan for threats.
- **C. It is installed on an endpoint and inspects the device.**
- D. It analyzes network traffic to detect unusual traffic flows and new malware.

Answer: C

Explanation:

A Host-Based Intrusion Prevention System (HIPS) is installed directly on an endpoint device (such as a server or workstation) and monitors local system activity, including processes, file access, and system calls, to detect and prevent malicious behavior.

NEW QUESTION # 109

Which component of the AAA framework verifies user identities so they may access the network?

- A. Allowance
- B. Accounting
- C. Authorization
- **D. Authentication**

Answer: D

Explanation:

Authentication is the component of the AAA (Authentication, Authorization, and Accounting) framework that verifies user identities (e.g., via passwords, certificates, or biometrics) before granting access to network resources.

NEW QUESTION # 110

On an endpoint, which method is used to protect proprietary data stored on a laptop that has been stolen?

- A. operating system patches
- **B. full-disk encryption**
- C. endpoint-based firewall
- D. periodic data backups

Answer: B

Explanation:

Full-disk encryption is a method of protecting data on a laptop that has been stolen by encrypting the entire hard drive, making it unreadable without the correct password or key. This prevents unauthorized access to the proprietary data stored on the laptop, even if the thief removes the hard drive and connects it to another device. Full-disk encryption can be enabled using built-in features such as BitLocker on Windows or FileVault on macOS, or using third-party software such as Absolute Home & Office12.

NEW QUESTION # 111

What does SOAR technology use to automate and coordinate workflows?

- A. Security Incident and Event Management
- B. Cloud Access Security Broker
- **C. playbooks**
- D. algorithms

Answer: C

Explanation:

SOAR tools ingest aggregated alerts from detection sources (such as SIEMs, network security tools, and mailboxes) before executing automatable, process-driven playbooks to enrich and respond to these alerts.

NEW QUESTION # 112

.....

The pressure we face comes from all aspects. As the social situation changes, these pressures will only increase. We cannot change the external environment. What we can do is improve our own strength. However, blindly taking measures may have the opposite effect. So here comes your best assistant-our PCCP Practice Engine. If you study with our PCCP exam materials, you can become better not only because that you can learn more, but also because you can get the admired PCCP certification.
