GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q51-Q56):

NEW QUESTION # 51

There are five teams working on a product. How many Product Owners would there be? (Choose the best answer)

- A. Let the team decide
- B. It depends
- C. 0
- **D. 1**

Answer: D

Explanation:

A single product has one Product Owner, regardless of the number of teams. The Scrum Guide states: "The Product Owner is one person, not a committee... Multiple Scrum Teams often work together on the same product. One Product Backlog is used to describe the upcoming work on the product."

* A: Multiple Product Owners fragment accountability.

* B: Correct—one Product Owner for one product.

NEW QUESTION # 52

Incremental delivery means: (Choose the best answer)

- **A. Deploy functional increments over the course of the project**
- B. Release working software only after testing each increment
- C. Deliver nonfunctional increments in the iteration retrospectives
- D. Improve and elaborate our Agile process with each increment delivered

Answer: A

Explanation:

Incremental delivery in Scrum involves delivering usable product pieces iteratively. The Scrum Guide defines an Increment as: "a concrete stepping stone toward the Product Goal" that is "usable" and "meets the Definition of Done." Option D—deploying functional increments over the project—reflects this, emphasizing cumulative value delivery.

* A: Nonfunctional increments contradict the "usable" requirement.

* B: Testing is part of creating a "Done" Increment, not a post-delivery step.

NEW QUESTION # 53

What is typical work for a Product Owner in a Sprint? (Choose the best two answers)

- A. Create financial reporting upon the spent hours reported by the Developers.
- **B. Collaborate with stakeholders, user communities, and product managers.**
- C. Update the work plan for the Developers on a daily basis.
- D. Attend every Daily Scrum to answer functional questions on the discussed Sprint Backlog items.
- **E. Work with the Developers on Product Backlog refinement.**

Answer: B,E

Explanation:

The Scrum Guide outlines the Product Owner's responsibilities as maximizing value through Product Backlog management, which includes:

* C: "Developing and explicitly communicating the Product Goal" and refining the Product Backlog with Developers to ensure clarity and readiness.

NEW QUESTION # 54

Who creates the Definition of "Done"? (Choose the best answer)

- A. The Product Owner as he/she is responsible for the product's success
- B. The Scrum Master as he/she is responsible for the Developers' productivity
- **C. The development organization (or Scrum Team if none is available from the development organization)**
- D. The Scrum Team, in a collaborative effort where the result is the common denominator of all members' definitions

Answer: C

Explanation:

The Definition of "Done" is a shared standard, often set by the organization, but defaults to the Scrum Team if no broader standard exists. The Scrum Guide states: "If the Definition of Done for an increment is part of the conventions, standards, or guidelines of the development organization, all Scrum Teams must follow it as a minimum. If it is not an organizational standard, the Scrum Team must create a Definition of Done appropriate for the product."
