Latest SPLK-4001 Version | Splunk Real SPLK-4001 Braindumps: Splunk O11y Cloud Certified Metrics User Pass Certainly

Our website of the SPLK-4001 study guide only supports credit card payment, but do not support card debit card, etc. Pay attention here that if the money amount of buying our SPLK-4001 study materials is not consistent with what you saw before, you need to see whether you purchased extra copies of the product or were taxed. As our SPLK-4001 Guide materials are sold all around the world, you can find that the content and language is easy to understand.

Splunk O11y Cloud Certified Metrics User Sample Questions (Q57-Q62):

NEW QUESTION # 57

One server in a customer's data center is regularly restarting due to power supply issues. What type of dashboard could be used to view charts and create detectors for this server?

- A. Single-instance dashboard
- B. Machine dashboard
- C. Multiple-service dashboard
- D. Server dashboard

Answer: A

Explanation:

Explanation

According to the Splunk O11y Cloud Certified Metrics User Track document¹, a single-instance dashboard is a type of dashboard that displays charts and information for a single instance of a service or host. You can use a single-instance dashboard to monitor the performance and health of a specific server, such as the one that is restarting due to power supply issues. You can also create detectors for the metrics that are relevant to the server, such as CPU usage, memory usage, disk usage, and uptime. Therefore, option A is correct.

NEW QUESTION # 58

A customer wants to share a collection of charts with their entire SRE organization. What feature of Splunk Observability Cloud makes this possible?

- A. Public dashboards
- B. Chart exporter
- C. Shared charts
- **D. Dashboard groups**

Answer: D

Explanation:

Explanation

According to the web search results, dashboard groups are a feature of Splunk Observability Cloud that allows you to organize and share dashboards with other users in your organization¹. You can create dashboard groups based on different criteria, such as service, team, role, or topic. You can also set permissions for each dashboard group, such as who can view, edit, or manage the dashboards in the group. Dashboard groups make it possible to share a collection of charts with your entire SRE organization, or any other group of users that you want to collaborate with.

NEW QUESTION # 59

A customer operates a caching web proxy. They want to calculate the cache hit rate for their service. What is the best way to achieve this?

- A. Chart Options and metadata
- B. Timeshift and Top N
- C. Timeshift and Bottom N
- **D. Percentages and ratios**

Answer: D

Explanation:

Explanation

According to the Splunk O11y Cloud Certified Metrics User Track document¹, percentages and ratios are useful for calculating the proportion of one metric to another, such as cache hits to cache misses, or successful requests to failed requests. You can use the `percentage()` or `ratio()` functions in SignalFlow to compute these values and display them in charts. For example, to calculate the cache hit rate for a service, you can use the following SignalFlow code:

```
percentage(counters("cache.hits"), counters("cache.misses"))
```

This will return the percentage of cache hits out of the total number of cache attempts. You can also use the `ratio()` function to get the same result, but as a decimal value instead of a percentage.

```
ratio(counters("cache.hits"), counters("cache.misses"))
```

NEW QUESTION # 60

Which of the following are supported rollout functions in Splunk Observability Cloud?

- A. `sigma`, `epsilon`, `pi`, `omega`, `beta`, `tau`
- **B. `average`, `latest`, `lag`, `min`, `max`, `sum`, `rate`**
- C. `1min`, `5min`, `10min`, `15min`, `30min`
- D. `std_dev`, `mean`, `median`, `mode`, `min`, `max`

Answer: B

Explanation:

According to the Splunk O11y Cloud Certified Metrics User Track document1, Observability Cloud has the following rollup functions: Sum (default for counter metrics): Returns the sum of all data points in the MTS reporting interval. Average (default for gauge metrics): Returns the average value of all data points in the MTS reporting interval. Min: Returns the minimum data point value seen in the MTS reporting interval. Max: Returns the maximum data point value seen in the MTS reporting interval. Latest: Returns the most recent data point value seen in the MTS reporting interval. Lag: Returns the difference between the most recent and the previous data point values seen in the MTS reporting interval. Rate: Returns the rate of change of data points in the MTS reporting interval. Therefore, option A is correct.

NEW QUESTION # 61

For a high-resolution metric, what is the highest possible native resolution of the metric?

- A. 2 seconds
- B. 15 seconds
- C. 1 second
- D. 5 seconds

Answer: C

Explanation:

The correct answer is C. 1 second.

According to the Splunk Test Blueprint - O11y Cloud Metrics User document1, one of the metrics concepts that is covered in the exam is data resolution and rollups. Data resolution refers to the granularity of the metric data points, and rollups are the process of aggregating data points over time to reduce the amount of data stored.

The Splunk O11y Cloud Certified Metrics User Track document2 states that one of the recommended courses for preparing for the exam is Introduction to Splunk Infrastructure Monitoring, which covers the basics of metrics monitoring and visualization.

In the Introduction to Splunk Infrastructure Monitoring course, there is a section on Data Resolution and Rollups, which explains that Splunk Observability Cloud collects high-resolution metrics at 1-second intervals by default, and then applies rollups to reduce the data volume over time. The document also provides a table that shows the different rollup intervals and retention periods for different resolutions.

Therefore, based on these documents, we can conclude that for a high-resolution metric, the highest possible native resolution of the metric is 1 second.

NEW QUESTION # 62

.....

As a responsible company, we don't ignore customers after the deal, but will keep an eye on your exam situation. Although we can assure you the passing rate of our SPLK-4001 study materials nearly 100 %, we can also offer you a full refund if you still have concerns. If you try our SPLK-4001 Study Materials but fail in the final exam, we can refund the fees in full only if you provide us with a transcript or other proof that you failed the exam.
