With the development of science and technology, getting OGEA-103 certification as one of the most powerful means to show your ability has attracted more and more people to be engaged in the related exams. Thus there is no doubt that candidates for the exam are facing ever-increasing pressure of competition. Since OGEA-103 Certification has become a good way for all of the workers to prove how capable and efficient they are. But it is universally accepted that only the studious people can pass the complex OGEA-103 exam.

The Open Group OGEA-103 certification is ideal for professionals who are involved in enterprise architecture, such as architects, project managers, and IT leaders. It is also beneficial for individuals who want to enhance their career prospects and demonstrate their proficiency in enterprise architecture. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification is recognized globally and is highly valued by employers in various industries. Passing the OGEA-103 exam requires a deep understanding of the TOGAF framework, and successful candidates are equipped with the skills and knowledge to develop and implement effective enterprise architecture strategies.

The format of the OGEA-103 Exam is a closed-book, multiple-choice exam that lasts for four hours. OGEA-103 exam is split into two sections, and the passing score for each section is 60%. OGEA-103 exam can be taken at authorized test centers or online. Upon passing the exam, individuals will receive their TOGAF Enterprise Architecture certification, which is globally recognized and highly regarded in the industry.

Latest OGEA-103 Test Blueprint | OGEA-103 Valid Test Format

ITExamReview has collected the frequent-tested knowledge into our OGEA-103 practice materials for your reference according to our experts' years of diligent work. So our OGEA-103 exam materials are triumph of their endeavor. By resorting to our OGEA-103 practice materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our OGEA-103 training engine, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our OGEA-103 exam questions.

Passing the OGEA-103 Exam is a significant achievement for professionals in the enterprise architecture field. It demonstrates a high level of expertise and knowledge in the industry, and it opens up new career opportunities. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification is recognized by major organizations globally, including governments, commercial enterprises, and educational institutions. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification is an excellent investment for professionals who want to enhance their career prospects and be recognized as a leader in the enterprise architecture domain.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30

What is present in all phases within the ADM and should be identified, classified and mitigated before starting a transformation effort?

- A. Information gaps
- **B. Risk**
- C. Budgetary constraints
- D. Schedule constraints

Answer: B

Explanation:

According to the TOGAF Standard, 10th Edition, risk is present in all phases within the Architecture Development Method (ADM), and it should be identified, classified, and mitigated before starting a transformation effort 1. Risk is defined as "the effect of uncertainty on objectives" 2, and it can have positive or negative impacts on the architecture project. Risk management is a technique that helps to assess and address the potential risks that may affect the achievement of the architecture objectives, and to balance the trade-offs between opportunities and threats. Risk management is applied throughout the ADM cycle, from the Preliminary Phase to the Requirements Management Phase, and it is integrated with other techniques, such as stakeholder management, business transformation readiness assessment, gap analysis, and migration planning 1. The other options are not correct, as they are not present in all phases within the ADM, and they are not necessarily identified, classified, and mitigated before starting a transformation effort. Budgetary constraints are the limitations on the financial resources available for the architecture project, and they are usually considered in Phase E: Opportunities and Solutions, and Phase F: Migration Planning 3. Schedule constraints are the limitations on the time available for the architecture project, and they are also usually considered in Phase E and F 3. Information gaps are the missing or incomplete data or knowledge that may affect the architecture project, and they are usually identified in Phase B: Business Architecture, Phase C: Information Systems Architecture, and Phase D: Technology Architecture .

NEW QUESTION # 31

Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- **A. Architecture Landscape**
- B. Governance Log
- C. Architecture Metamodel
- D. Reference Library

Answer: A

Explanation:

The Architecture Landscape is a class of information within the Architecture Repository that shows an architectural view of the

building blocks that are in use within the organization today (the Baseline Architecture), as well as those that are planned for the future (the Target Architecture). The Architecture Landscape typically contains a list of the applications in use within the enterprise, along with their relationships and dependencies, as well as other relevant architectural information. The Architecture Landscape helps to identify opportunities for re-use, consolidation, or retirement of existing applications, as well as gaps or overlaps in the current or future architecture.

The TOGAF Standard, Version 9.2, Part IV: Architecture Content Framework, Chapter 34: Architecture Landscape : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 47: Architecture Repository

NEW QUESTION # 32

Which section of the TOGAF template for Architecture Principles should highlight the requirements for carrying out the principle?

- A. Name
- **B. Implications**
- C. Rationale
- D. Statement

Answer: B

Explanation:

The Implications section describes the impact of adhering to the principle on the organization, the processes, the information systems, and the technology²³. It also identifies the changes, costs, and risks that may result from applying the principle²³. The Implications section helps to communicate the benefits and consequences of the principle to the stakeholders and to guide the implementation and governance of the architecture²³.

The other sections of the TOGAF template for Architecture Principles are¹:

- * Name: This section provides a short and memorable name for the principle that represents its essence and purpose²³. The name should not mention any specific technology or solution²³.
- * Statement: This section provides a concise and formal definition of the principle that expresses the fundamental rule or constraint that the principle imposes²³. The statement should be clear, unambiguous, and testable²³.
- * Rationale: This section provides the reasoning and justification for the principle, explaining why it is important and how it supports the business goals and drivers²³. The rationale should also link the principle to the higher-level enterprise or IT principles that it elaborates on²³.

NEW QUESTION # 33

Which of the following best describes the purpose of the Gap Analysis technique?

- A. To govern the architecture throughout its implementation process
- B. To allocate resources for architecture projects
- **C. To identify items omitted from the Target Architecture**
- D. To develop a set of general rules and guidelines for the architecture

Answer: C

Explanation:

Explanation

The purpose of the Gap Analysis technique is similar to the previous question, but with a focus on the Target Architecture. The technique helps to identify the items that are not included or specified in the Target Architecture, such as capabilities, services, components, standards, or technologies. These items may be essential for achieving the vision and goals of the enterprise, or for addressing the stakeholder concerns and requirements. By identifying the items omitted from the Target Architecture, the technique helps to ensure that the architecture is comprehensive, feasible, and realistic.

NEW QUESTION # 34

Which section of the TOGAF template for Architecture Principles should highlight the business benefits of adhering to the principle?

- A. Implications
- B. Name
- **C. Rationale**
- D. Statement

Answer: C

Explanation:

According to the TOGAF Standard, 10th Edition, the rationale section of the architecture principles template should highlight the business benefits of adhering to the principle, as well as the business risks of not adhering to it 1. The rationale section should explain the reasoning behind the principle, and provide evidence or arguments to support it. The rationale section should also link the principle to the business drivers, goals, and objectives of the enterprise, and show how the principle contributes to the value and success of the enterprise. The other options are not correct, as they have different purposes in the architecture principles template. The name section should provide a short and memorable name for the principle, such as "Information is an Asset" or "Business Continuity" 1. The statement section should provide a concise and formal statement of the principle, such as "The enterprise's information is recognized as a core asset, and is managed accordingly" or "The enterprise's ability to provide critical services and products must be maintained in the event of a disaster" 1. The implications section should identify the impact of the principle on the enterprise, such as the changes, costs, benefits, and risks that may result from applying or violating the principle 1. Reference: 1: TOGAF Standard, 10th Edition, Part III: ADM Guidelines and Techniques, Chapter 23: Architecture Principles, Section 23.3 Developing Architecture Principles.
