Pass Guaranteed Quiz 2026 Valid Cisco 350-601: Latest Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Test Preparation

With 350-601 test answers, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase new learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to 350-601 test dumps based on constantly changing syllabus and industry development breakthroughs. We also hired dedicated IT staff to continuously update our question bank daily, so no matter when you buy 350-601 Study Materials, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our 350-601 test answers, we will still provide you with the benefits of free updates within a year.

Cisco 350-601 certification exam is an important credential for individuals who want to demonstrate their expertise in implementing data center technologies. Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification is recognized by industry experts and can help professionals advance their careers in the field of data center technology. By passing 350-601 exam, candidates can demonstrate their ability to design, implement, and manage complex data center infrastructure solutions.

Concluding Thoughts

A look at the latest IT trends shows that data centers are fast gaining popularity. Reputable companies are now hiring competent individuals to supervise the associated processes. That list includes data center project managers, data center engineers, compliance officers, and cybersecurity specialists just to mention a few. If you are looking for one of the easiest ways to keep pace with the latest trends, the new Cisco 350-601 Exam is the way to go. This is the perfect time to capitalize on those opportunities!

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR)

Sample Questions (Q75-Q80):

NEW QUESTION # 75

An engineer is implementing NetFlow on a Cisco Nexus 7000 Series Switch. Drag and drop the NetFlow commands from the left into the correct order they must be entered on the right.

| | |
|--|--------|
| N7K-1(config)# interface <interface> N7K-1(config-if)# ip flow monitor NetflowMonitor input | Step 1 |
| N7K-1(config)# feature netflow | Step 2 |
| N7K-1(config)# flow exporter NetflowMonitor N7K-1(config)# flow record NetflowMonitor | Step 3 |
| N7K-1(config)# flow monitor NetflowMonitor | Step 4 |

Answer:

Explanation:

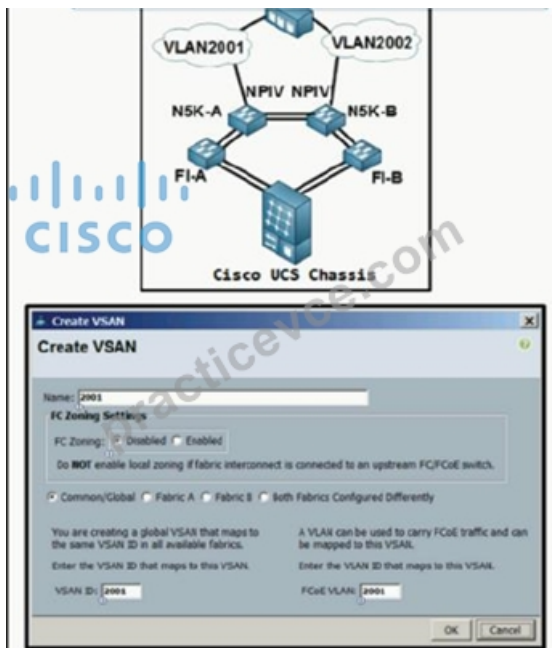

| | |
|--|--|
| N7K-1(config)# interface <interface> N7K-1(config-if)# ip flow monitor NetflowMonitor input | N7K-1(config)# feature netflow |
| N7K-1(config)# feature netflow | N7K-1(config)# flow monitor NetflowMonitor |
| N7K-1(config)# flow exporter NetflowMonitor N7K-1(config)# flow record NetflowMonitor | N7K-1(config)# interface <interface> N7K-1(config-if)# ip flow monitor NetflowMonitor input |
| N7K-1(config)# flow monitor NetflowMonitor | N7K-1(config)# flow exporter NetflowMonitor N7K-1(config)# flow record NetflowMonitor |

Explanation

- 1- feature netflow
- 2- flow monitor
- 3- Interface <interface>
- 4- flow exporter

NEW QUESTION # 76

Refer to the exhibit.

An engineer is configuring a VSAN on the network. Which option must be selected to create the VSAN?

- A. Fabric B
- **B. Fabric A**
- C. FC Zoning Enabled
- D. Common/Global

Answer: B

Explanation:

Explanation

<https://www.cisco.com/c/en/us/td/docs/switches/datacenter/mds9000/sw/nx-os/configuration/guides/fabric/fabric>

https://www.cisco.com/c/en/us/td/docs/unified_computing/ucs/ucs-central/GUI-User-Guides/Storage-Mgmt/1-5/

NEW QUESTION # 77

An engineer needs to connect Cisco UCS Manager to an external storage array. Due to budget limitations, the engineer must connect a Cisco UCS manager directly to an FC storage port. Which two actions must be taken to complete this connection? (Choose two)

- A. Configure the fabric interconnect in end-host mode
- B. Create a storage connection policy
- **C. Configure the fabric interconnect in FC switch mode**
- D. Create the required VSAN in the SAN cloud
- **E. Set FC zoning to disabled when creating the VSAN**

Answer: C,E

NEW QUESTION # 78

Refer to the exhibit. Which action must be taken before the maintenance policy can be committed?

```

FI-1# scope org /
FI-1 /org # create maint-policy maintenance
FI-1 /org/maint-policy* # set reboot-policy timer-automatic
FI-1 /org/maint-policy* # set soft-shutdown-timer never

```

- A. Set the soft shutdown timer to a specific time.
- B. Associate a service profile to the maintenance policy.
- **C. Specify a maintenance time by selecting a schedule.**

- D. Set the policy to apply the changes on the next reboot.

Answer: C

Explanation:

When a service profile is associated with a server, the server needs to be rebooted to complete the association. Specifying the reboot-policy command determines when the reboot occurs for all service profiles that include this maintenance policy. Possible values include:

immediate - The server reboots as soon as the change is made to the service profile.

timer-automatic - You select the schedule that specifies when maintenance operations can be applied to the server using the set scheduler command. Cisco UCS reboots the server and completes the service profile changes at the scheduled time.

user-ack - The user must explicitly acknowledge the changes by using the apply pending-changes command before changes are applied.

NEW QUESTION # 79

A customer reports Fibre Channel login requests to a cisco MDS 9000 series Switch from an unauthorized source. The customer requires a feature that will allow all devices already logged in and learned in and learned to be added to the Fibre channel active database. Which two features must be enabled to accomplish this goal?

(Choose two.)

- A. Smart aliases
- **B. Auto-learning**
- C. Enhanced zoning
- **D. Port security**
- E. Device aliases

Answer: B,D

Explanation:

[https://www.cisco.com/en/US/docs/storage/san_switches/mds9000/sw/rel_3_x/configuration/guides/fm_3_3_1/p_Port_Security_Activation](https://www.cisco.com/en/US/docs/storage/san_switches/mds9000/sw/rel_3_x/configuration/guides/fm_3_3_1/p_Port_Security_Activation_By_default,the_port_security_feature_is_not_activated_in_any_switch_in_the_Cisco_MDS_9000_Family.By_activating_the_port_security_feature,the_following_apply:Auto-learning_is_also_automatically_enabled,which_means:From_this_point,auto-learning_happens_for_the_devices_or_interfaces_that_were_already_logged_into_the_switch_and_also_for_the_new_devices_will_login_in_future.You_cannot_activate_the_database_until_you_disable_auto-learning.All_the_devices_that_are_already_logged_in_are_learned_and_are_added_to_the_active_database.All_entries_in_the_configured_database_are_copied_to_the_active_database.After_the_database_is_activated,subsequent_device_login_is_subject_to_the_activated_port_bound_WWN_pairs,excluding_the_auto-learned_entries.You_must_disable_auto-learning_before_the_auto-learned_entries_become_activated.) By default, the port security feature is not activated in any switch in the Cisco MDS

9000 Family. By activating the port security feature, the following apply: Auto-learning is also automatically enabled, which means: From this point, auto-learning happens for the devices or interfaces that were already logged into the switch and also for the new devices will login in future. You cannot activate the database until you disable auto-learning. All the devices that are already logged in are learned and are added to the active database. All entries in the configured database are copied to the active database. After the database is activated, subsequent device login is subject to the activated port bound WWN pairs, excluding the auto-learned entries. You must disable auto-learning before the auto-learned entries become activated.
