Our answers and questions are compiled elaborately and easy to be mastered. Because our C_SEC_2405 Test Braindumps are highly efficient and the passing rate is very high you can pass the exam fluently and easily with little time and energy needed.

SAP Certified Associate - Security Administrator Sample Questions (Q19-Q24):

NEW QUESTION # 19

In SAP S/4HANA Cloud Public Edition, which of the following can you change in a derived business role if the "Inherit Spaces in Derived Business Roles" checkbox is NOT selected in the leading business role?

- A. Business Role Template
- B. Restrictions
- C. Business Catalogs
- D. Pages

Answer: C

NEW QUESTION # 20

Which of the following rules does SAP recommend you consider when you define a role-naming convention for an SAP S/4HANA on-premise system? Note: There are 3 correct answers to this question.

- A. Role names must NOT start with "SAP"
- B. Role names can be no longer than 30 characters
- C. Role names can be no longer than 20 characters
- D. Role names are system language-independent
- E. Role names are system language-dependent

Answer: A,B,D

Explanation:

SAP provides specific guidelines for defining role-naming conventions in SAP S/4HANA on-premise systems to ensure consistency and avoid conflicts. Role names must be system language-independent, meaning they are not tied to specific language settings, ensuring universal usability across different system configurations.

Additionally, role names are limited to a maximum of 30 characters to comply with system constraints and maintain clarity. SAP also recommends that role names do not start with "SAP" to distinguish custom roles from SAP-delivered roles, preventing potential overlaps or confusion during system upgrades or maintenance.

These rules help maintain a structured and efficient authorization management process, avoiding issues related to naming conflicts or system limitations.

NEW QUESTION # 21

What does SAP recommend you do when you transport a custom leading business role in SAP S/4HANA Cloud Public Edition?

- A. Add all derived business roles as dependencies to the Software Collection.
- B. Add the pre-delivered business role that was used as a template to create the custom leading business role to the Software

Collection.

- C. Add all other leading business roles from the same Line of Business as dependencies to the Software Collection.

Answer: B

Explanation:

When transporting a custom leading business role in SAP S/4HANA Cloud Public Edition:

* Include the Template Role (C):

* SAP recommends adding the pre-delivered business role (template) to the software collection.

This ensures that all dependencies and baseline configurations are included during the transport.

* Maintain Consistency:

* Adding the template role ensures that the custom role remains functional across environments and avoids issues related to missing dependencies.

NEW QUESTION # 22

Which log types are available in the Administration Console of Cloud Identity Services? Note: There are 2 correct answers to this question.

- A. Performance logs
- **B. Change logs**
- C. Troubleshooting logs
- **D. Usage logs**

Answer: B,D

NEW QUESTION # 23

An authorization based on what object is required for trusted system access to an SAP Fiori back-end server?

- A. S_START
- B. S_RFC
- C. S_SERVICE
- **D. S_RFCACL**

Answer: D

Explanation:

The S_RFCACL authorization object is essential for trusted system access to an SAP Fiori back-end server. It controls Remote Function Call (RFC) access by verifying trust relationships and ensuring secure communication between systems.

Key Fields in S_RFCACL:

* ACTVT: Specifies the activity, such as execution or maintenance of RFC connections.

* RFC_SYSD: Identifies the trusted system by its System ID (SID).

* RFC_CLIENT: Specifies the client number in the trusted system.

SAP Security References:

* SAP Help Portal: Trusted RFC Connection Setup

NEW QUESTION # 24

.....

One of the most effective strategies to prepare for the SAP Certified Associate - Security Administrator (C_SEC_2405) exam successfully is to prepare with actual SAP C_SEC_2405 exam questions. It would be difficult for the candidates to pass the SAP exam on the first try if the C_SEC_2405 study materials they use are not updated. Studying with invalid C_SEC_2405 practice material results in a waste of time and money. Therefore, updated SAP C_SEC_2405 practice questions are essential for the preparation of the C_SEC_2405 exam.
