Our company sells three kinds of NCP-MCA guide torrent online whose contents are definitely same as each other. The PDF format of NCP-MCA exam torrent is easy to download, prints, and browse learning, which can be printed on paper and can make notes anytime. SOFT/PC test engine of NCP-MCA Exam applies to Windows system computers. It can simulate the real operation test environment. App/online test engine of the NCP-MCA guide torrent can be used on all kinds of electronic devices.

## Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q48-Q53):

### NEW QUESTION # 48

Which feature of Calm allows for the creation of task-based automation against dynamic lists of Windows or Linux VMs?

- A. Playbooks
- B. Blueprints
- C. Projects
- D. Runbooks

**Answer: D**

### NEW QUESTION # 49

An administrator is trying to deploy a VM from an image onto a newly-built cluster, but the image is unavailable. The administrator is able to deploy the image onto other clusters with no issue. Image placement policies have already been created within Prism Central. Why is the image unavailable for deployment on the cluster?

- A. The image does not have the proper category assigned for the placement policy,
- B. The image has not been directly uploaded to the cluster
- C. The cluster does not have the proper category assigned for the placement policy,
- D. The image is corrupted.

**Answer: A,C**

Explanation:

The image is unavailable for deployment on the cluster because the cluster and the image do not have the proper categories assigned for the placement policy. A placement policy is a set of rules that determines which clusters and images are available for VM deployment based on the categories and values assigned to them. If the cluster and the image do not match the placement policy criteria, they will not be shown as options for VM deployment. Therefore, the administrator needs to assign the appropriate categories and values to the cluster and the image to make them compatible with the placement policy. ### NEW QUESTION # 50

Refer to exhibits.

The variable VM\_NAME is giving a warning that indicates that the variable is not found. When checking the Service tab, the variable is found to match the VM\_NAME field entry as shown in the exhibit below:

What is causing this warning message?

- A. User modifiable variable for VM\_NAME is not allowed
- B. @@{calm\_time}@@ output is longer than allowed for a Service Name
- C. Service Name matches the variable name
- D. VM\_NAME variable must be defined under Application Profile

**Answer: A**

### NEW QUESTION # 51

A developer created blueprints in a development environment, and everything worked as expected. The developer then moved the blueprints to the production environment but noticed that the deployment is noticeable slower in production compared to the development environment.

What is the most likely issue causing this behavior?

- A. The production Prism Central is not compatible with Calm
- B. Prism Central is not able to reach the DNS server.
- **C. The production Prism Central only has 26 RAM allocated.**
- D. The production Prism Element Data service IP address is incorrect.

**Answer: C**

Explanation:

According to the Nutanix Calm Administration Guide<sup>1</sup>, the minimum system requirements for Prism Central are 32 GB of RAM and 8 vCPUs. If the production Prism Central has less than the minimum RAM, it may affect the performance of Calm and other services running on Prism Cen

## NEW QUESTION # 52

Refer to exhibits.

The variable VM\_NAME is giving a warning that indicates that the variable is not found. When checking the Service tab, the variable is found to match the VM\_NAME field entry as shown in the exhibit below:

What is causing this warning message?

- **A. User modifiable variable for VM\_NAME is not allowed**
- B. @@{calm\_time}@@ output is longer than allowed for a Service Name
- C. Service Name matches the variable name
- D. VM\_NAME variable must be defined under Application Profile

**Answer: A**
