Latest 300-435 Dumps Pdf, 300-435 Exams Dumps

First and foremost, in order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our 300-435 learning questions in this website. Second, we can assure you that you will get the latest version of our 300-435 Training Materials for free from our company in the whole year after payment on 300-435 practice materials. Last but not least, we will provide the most considerate after sale service on our 300-435 study guide for our customers in

twenty four hours a day seven days a week.

How to study the 300-435 ENAUTO : Automating and Programming Cisco Enterprise Solutions Exam

There are many ways to prepare for **300-435** Exam. Aspirants can opt for Official Cisco training of Implementing Automation for Cisco Enterprise Solutions, ENAU. Many professionals would like to prepare for course with the help of course videos and online PDF's. However, it is quite essential to study smart way, and develop strategies for time management.

The Itexamguide provided exam dumps and test engine come at the rescue at this point. Itexamguide expert team recommends preparing some notes on exam topics during preparation of certification exam and don't forget to practice **300-435 Dumps** which are written by our expert team, each of these can assist you loads to clear this exam with excellent marks.

Cisco Automating and Programming Cisco Enterprise Solutions Sample Questions (Q15-Q20):

NEW QUESTION # 15

During a network outage, a network administrator used the Cisco SD-WAN vManage Troubleshooting Dashboard APIs to troubleshoot the cause of the issue. Which detail is captured during troubleshooting with these APIs?

- A. OMP connection health
- **B. connections summary**
- C. VPN health
- D. public cloud resources

Answer: B

Explanation:

Section: Cisco SD-WAN

Explanation/Reference: https://sdwan-docs.cisco.com/Product_Documentation/Command_Reference/Command_Reference/vManage_REST_APIs/Troubleshooting_APIs/Dashboard

NEW QUESTION # 16

Drag and drop the code from the bottom onto the box where the code is missing to construct a Python script to automate the process of updating the site-to-site VPN settings of the network. Not all options are used.

```

import requests

url = "https://api.meraki.com/api/v0/networks/{{networkId}}/"

payload = {
    "mode": "spoke",
    "hubs": [
        {"hubId": "N_4901849", "useDefaultRoute": True},
        {"hubId": "N_1892489", "useDefaultRoute": False}
    ],
    "subnets": [
        {"localSubnet": "192.168.1.0/24", "useVpn": True},
        {"localSubnet": "192.168.128.0/24", "useVpn": True}
    ]
}

headers = {
    'Accept': '*/.*',
    'Content-Type': 'application/json'
}

response = requests.request("PUT", url,
                             headers=headers,
                             data=payload)

print(response.text.encode('utf8'))

```

Answer:

Explanation:

```

import requests

url = "https://api.meraki.com/api/v0/networks/{{networkId}}/"

payload = {
    "mode": "spoke",
    "hubs": [
        {"hubId": "N_4901849", "useDefaultRoute": True},
        {"hubId": "N_1892489", "useDefaultRoute": False}
    ],
    "subnets": [
        {"localSubnet": "192.168.1.0/24", "useVpn": True},
        {"localSubnet": "192.168.128.0/24", "useVpn": True}
    ]
}

headers = {
    'Accept': '*/.*',
    'Content-Type': 'application/json'
}

response = requests.request("PUT", url,
                             headers=headers,
                             data=payload)

print(response.text.encode('utf8'))

```

Explanation:

Text Description automatically generated

import requests

```
url = "https://api.meraki.com/api/v0/networks/{{networkId}}/siteToSiteVpn "

payload = {
    "mode": "spoke",
    "hubs": [
        {"hubId": "N_4901849", "useDefaultRoute": True},
        {"hubId": "N_1892489", "useDefaultRoute": False}
    ],
    "subnets": [
        {"localSubnet": "192.168.1.0/24", "useVpn": True},
        {"localSubnet": "192.168.128.0/24", "useVpn": True}
    ]
}

headers = {
    'Accept': '*/*',
    'Content-Type': 'application/json'
}

response = requests.request("PUT", url,
                             headers=headers,
                             data=payload )

print(response.text.encode('utf8'))
```

NEW QUESTION # 17

Refer to the exhibit.

"https://vmanage-ip-address:8443/dataservice/template/policy/vsmart/activate/{policyId}"

A Python script must be created to deactivate vSmart Policy Cisco SD-WAN vManage Configuration APIs.

The documentation states the URL is as shown in the exhibit for this REST call using POST, and that

"policyId" is a required request parameter. Which line of Python code makes this call, assuming the variable "s" is a valid Requests session object and the variable "policy-id" is the policyId?

- A. s.port('https://vmanage:8443/dataservice/template/policy/vsmart/activate?policyId=%s' % policy_id)
- B. s.port('https://vmanage:8443/dataservice/template/policy/vsmart/activate&policyId=%s' % policy_id)
- C. s.port('https://vmanage:8443/dataservice/template/policy/vsmart/activate/%s' % policy_id)
- D. s.port('https://vmanage:8443/dataservice/template/policy/vsmart/activate/', data = {'policyId': policy_id})

Answer: C

NEW QUESTION # 18

What are two characteristics of REST API calls? (Choose two.)

- A. Parameters passed in the headers
- B. Stateless
- C. Unencrypted
- D. Non-cacheable
- E. Implemented over http

Answer: B,E

Explanation:

REST API calls are characterized as being stateless and implemented over HTTP. Being stateless means that each request from client to server must contain all of the information needed to understand and complete the request; there is no session state stored on the server. Implemented over HTTP indicates that REST APIs use standard web protocols for communication. References:
