Overview:

Car Warranty

You are the supervisor for a Car Warranty Center. You use Excel to report employee hours and telephone calls.

Task 1:

On the Average Call Time worksheet, use an Excel feature to copy the sparkline into all the vacant cells of the Trend column.

Answer:

Explanation:

See the solution in Explanation below.

Explanation:

In Excel 365, the most efficient way to do this is using the AutoFill feature or simply dragging the fill handle.

Here is your step-by-step solution:

Step 1: Switch to the Correct Worksheet

Ensure you are on the Average Call Time worksheet. Click the red tab at the bottom of the screen to switch from the "Employee Hours" view (shown in your image) to the call time data.

Step 2: Identify the Sparkline

Locate the first cell in the Trend column that already contains a Sparkline (likely cell F4 or similar, depending on your layout).

Step 3: Use the Fill Handle to Copy

- * Hover your mouse over the bottom-right corner of the cell containing the sparkline.

- * Your cursor will change from a thick white cross to a thin black cross (+).

- * Click and drag the fill handle down to the bottom of the column to fill all the vacant cells in the "Trend" column.

Pro Tip: Alternatively, you can simply double-click the thin black cross (fill handle), and Excel will automatically fill the sparklines down to the last row of your data.

□

Alternative Method: Using the Ribbon

If you prefer using the menu interface:

- * Select the cell with the existing sparkline and all the empty cells below it where you want the sparklines to appear.
- * Go to the Home tab.
- * In the Editing group, click the Fill icon (downward arrow).
