SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement C-S4CPR-2502 Prüfungsfragen mit Lösungen (Q36-Q41):

36. Frage

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Prepare
- **B. Realize**
- C. Explore
- D. Deploy

Antwort: B

37. Frage

- A. Supplier confirmations
- B. Supplier down payments
- **C. Supplier EDI messages**
- **D. Purchase order items**
- **E. Request for quotation items**

Antwort: C,D,E

38. Frage

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user. How would you troubleshoot? Note: There are 3 correct answers to this question.

- A. Check the business role template.
- **B. Check the space and page(s) assigned to the role.**
- **C. Check the business catalogues assigned to the role.**
- D. Check the Role Maintenance app.
- **E. Check the restrictions for the role.**

Antwort: B,C,E

Begründung:

If an SAP Fiori app is not displaying on the SAP Fiori Launchpad despite the user having the correct business role, the issue could stem from several configuration areas. Here's how to troubleshoot:

* Check the business catalogues assigned to the role (A): Business catalogues group apps into logical sets. Ensure that the business role assigned to the user includes the catalogue containing the missing app.

* Check the restrictions for the role (B): Restrictions such as organizational assignments or field-level constraints might prevent the

app from being visible. Verify that no such restrictions are applied to the role.

* Check the space and page(s) assigned to the role (C): Spaces and pages define the layout of the SAP Fiori Launchpad. Ensure that the app is assigned to the correct space and page within the role configuration.

* Check the Role Maintenance app (D): While the Role Maintenance app is useful for managing roles, it does not directly address visibility issues related to spaces, pages, or catalogues.

* Check the business role template (E): Business role templates serve as a starting point for creating roles but do not directly impact app visibility once the role is assigned.

39. Frage

How can you migrate data to SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. With a separate SAP HANA database
- **B. With Core Data Services**
- **C. With XML or CSV templates**
- D. With the zero downtime service

Antwort: B,C

Begründung:

Data migration to SAP S/4HANA Cloud Public Edition can be performed using specific tools and methods provided by SAP. Below are the two correct answers:

* With XML or CSV templates (Option A): SAP provides predefined XML or CSV templates for migrating data into the system. These templates ensure that data is structured correctly and can be uploaded seamlessly. The SAP Data Migration Guide confirms that XML and CSV templates are standard tools for data migration.

* With the zero downtime service (Option C): The zero downtime service allows organizations to migrate data without interrupting business operations. This is particularly useful for large-scale implementations where continuous availability is critical. The SAP Zero Downtime Service Guide documents this approach.

* B. With Core Data Services: Core Data Services (CDS) are used for defining and consuming data models in SAP systems but are not a tool for data migration.

* D. With a separate SAP HANA database: A separate SAP HANA database is not used for migrating data to SAP S/4HANA Cloud Public Edition. Instead, data migration is performed using the tools provided by SAP.

* SAP Data Migration Guide: Explains the use of XML and CSV templates for data migration.

* SAP Zero Downtime Service Guide: Describes the zero downtime service and its role in ensuring uninterrupted operations during data migration.

40. Frage

In which application can you see the available business context capacity remaining for extension items?

- A. Extensibility Inventory app
- **B. Extensibility Cockpit app**
- C. Custom Reusable Elements app
- D. Extensibility Explorer app

Antwort: B

Begründung:

The Extensibility Cockpit app is used to view the available business context capacity remaining for extension items in SAP S/4HANA Cloud Public Edition. This app provides insights into the extensibility limits and helps administrators manage customizations effectively.

* Extensibility Cockpit app (Option A): The Extensibility Cockpit app displays the remaining capacity for custom extensions, such as custom fields, custom logic, and UI adaptations. It ensures that organizations stay within the predefined extensibility limits. The SAP Extensibility Guide confirms this functionality.

* B. Extensibility Inventory app: The Extensibility Inventory app provides an overview of existing extensions but does not show the remaining capacity.

* C. Custom Reusable Elements app: This app is used for managing reusable custom elements, not for tracking extensibility capacity.
