SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q23-Q28):

NEW QUESTION # 23

(What are some key differentiators of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Predictive Analytics
- B. Large Foundation Models
- C. AI Foundation
- D. Embedded AI
- E. Ecosystem of Innovation

Answer: C,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.

Exact extracts supporting this:

Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com

AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.) Ecosystem of Innovation: "Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP

applications."sap.com Implies ecosystem.

Other options are incorrect because:

Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.

Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business grounding.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," units on market point of view and role of Business AI, highlighting embedded AI, foundation, and ecosystem as differentiators, per C_BCBAI_2502 materials.

NEW QUESTION # 24

How does SAP AI contribute to personalized marketing campaigns?

There are 2 correct answers to this question.

Response:

- A. Predictive analytics for targeted marketing
- B. Manual campaign execution
- C. Automated payroll processing
- D. AI-driven customer segmentation

Answer: A,D

NEW QUESTION # 25

Which SAP Business AI solutions are used for automating business workflows? Note: There are 2 correct answers to this question.

- A. SAP Conversational AI
- B. SAP Intelligent Robotic Process Automation (RPA)
- C. SAP SuccessFactors
- D. SAP Extended Warehouse Management

Answer: A,B

Explanation:

SAP Business AI provides solutions to automate business workflows, streamlining repetitive tasks and enhancing process efficiency. The correct answers are SAP Intelligent Robotic Process Automation (RPA) and SAP Conversational AI, as these solutions are specifically designed to automate workflows using AI-driven capabilities.

SAP documentation states: "SAP Intelligent RPA automates repetitive business tasks such as data entry, document processing, and workflow execution by combining robotic process automation with AI capabilities." This enables organizations to streamline processes like invoice processing or order management, reducing manual effort. SAP Conversational AI, powered by Joule, supports workflow automation by

"enabling natural language interactions to trigger and manage business processes." For example, Joule can "automate case classification and resolve customer inquiries" by integrating with workflow systems, enhancing efficiency in service and support processes.

The incorrect options-SAP Extended Warehouse Management and SAP SuccessFactors-are not focused on general workflow automation. SAP Extended Warehouse Management is tailored to logistics and inventory management, not broad workflow automation. SAP SuccessFactors focuses on HR processes, such as recruitment and talent management, not general business workflows. SAP's emphasis on automation, as seen in solutions like SAP Business Technology Platform, confirms the suitability of SAP Intelligent RPA and SAP Conversational AI for this purpose.

Option B: Resourcefulness is not a defined characteristic; focus is on the three R's.
