

2026 Certification DevOps-Foundation Exam Cost - Valid Peoplecert PeopleCert DevOps Foundationv3.6Exam - Certification DevOps-Foundation Book Torrent

BTW, DOWNLOAD part of Pass4Test DevOps-Foundation dumps from Cloud Storage: https://drive.google.com/open?id=1e-U7j3_bxb5TeyaMvACIImlfaO8V6fuHa

The actual Peoplecert DevOps-Foundation exam questions are in PDF format for the one who wants to study offline. The actual Peoplecert DevOps-Foundation exam questions are in simple PDF form. The PDF format is suitable both for smartphones as well as tablets. You can print documents and study anywhere. The plus point is that the PDF version is updated regularly to improve its DevOps-Foundation Exam Questions and reflect changes in the syllabus of the exam.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.

Topic 2	<ul style="list-style-type: none"> • Business and Technology Frameworks: This section of the exam measures the skills of IT operations specialists and covers various supporting frameworks that intersect with DevOps. These include Agile and Lean, IT Service Management, Value Stream Management, Site Reliability Engineering, Safety Culture, Learning Organisations, and Continuous Funding models that enable long-term adaptability.
Topic 3	<ul style="list-style-type: none"> • Exploring DevOps: This section of the exam measures the skills of DevOps engineers and covers the foundations of DevOps, including its emergence as a critical discipline in the digital era. It introduces learners to the basic purpose, evolution, and significance of DevOps in modern software and infrastructure environments.
Topic 4	<ul style="list-style-type: none"> • Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.

Certification DevOps-Foundation Book Torrent, Latest DevOps-Foundation Study Guide

The Pass4Test is committed to ace your PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam preparation and ensure your success on the first attempt. To achieve this objective the Pass4Test is offering top-rated, real, and updated PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam questions in three different formats. The names of these formats are DevOps-Foundation PDF dumps file, desktop practice test software, and web-based practice test software.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q71-Q76):

NEW QUESTION # 71

Which of the following is NOT a benefit of using a Kanban board?

- **A. It defines policies and procedures**
- B. It enables people to work collaboratively
- C. It reduces work in progress
- D. It reduces idle time and waste

Answer: A

Explanation:

Kanban boards are visual management tools used to track work and manage flow. They provide transparency, limit work in progress (WIP), and help teams focus on delivering value quickly.

* A: Reducing WIP is a key Kanban principle that improves flow and delivery speed.

* C: Visibility fosters collaboration and shared ownership.

* D: By identifying bottlenecks and waste, Kanban helps reduce idle time.

B-defining policies and procedures-is not an inherent benefit of Kanban. While teams may display existing policies on a Kanban board, the board itself does not define them. Its role is to visualize work and flow, not to establish governance rules.

Thus,Bis the correct "NOT" benefit.

NEW QUESTION # 72

An organization is considering introducing Continuous Integration to their software development. What would be the PRIMARY benefit of this approach?

- A. Commits can be tested together in order to detect and remediate errors before they go into production
- B. Continuous integration will push more changes into real-time quickly
- C. Continuous integration allows more developers to work on the same product simultaneously
- D. Continuous integration will require the creation of a version control repository

Answer: A

Explanation:

Continuous Integration (CI) is the practice of frequently merging small code changes into a shared repository, followed by automated builds and tests. The primary benefit is early detection and resolution of integration issues. When commits are tested together continuously, defects are caught soon after introduction, reducing the cost and complexity of fixing them.

While B (more developers can work together) is a side effect, it is not the primary goal. C (pushing changes quickly) is more related to Continuous Delivery or Continuous Deployment. D (version control) is a prerequisite for CI, not the main benefit.

Therefore, A correctly captures the primary benefit—finding and fixing issues early before they reach production.

NEW QUESTION # 73

What is NOT an example of a business performance metric?

- A. Cashflow
- B. Epics delivered
- C. Marketshare
- D. Earnings

Answer: B

Explanation:

Epics delivered is a software/process metric, not a business performance metric.

* Business performance metrics include financial and market indicators: earnings, cashflow, market share, revenue growth.

Why not the others?

* Earnings, Cashflow, Marketshare: Directly tied to business health.

Extract-style reference:

"Business performance metrics focus on outcomes such as earnings, cashflow, and marketshare. Agile metrics like epics delivered measure team output, not business value."

-Project to Product, Mik Kersten

PeopleCert DevOps Foundation v3.6: Distinguishes business impact from process metrics.

NEW QUESTION # 74

What is the first step to take when improving DevOps automation?

- A. Implement self-service
- B. Architect before automating
- C. Build a DevOps toolchain
- D. Replace proprietary software with open source tools

Answer: B

Explanation:

PeopleCert emphasizes that architecture must be planned before automating processes. This means mapping the value stream, understanding dependencies, identifying bottlenecks, and defining integration points before selecting or configuring tools.

Automating without a clear architecture can lead to fragmented processes, wasted effort, and technical debt.

Once the architecture is sound, teams can implement automation in a way that supports scalability, maintainability, and interoperability.

A (building the toolchain) is important but comes after architecture. C (switching to open source) is a tooling decision, not the first automation step. D (self-service) is a benefit of automation, not the starting point.

Thus, B - Architect before automating - is the correct first step.

The DevOps Handbook- Design Before Automating

NEW QUESTION # 75

Regardless of structure, what should a DevOps team NOT be?

- A. Flat
- **B. Isolated**
- C. Continuously engaged
- D. Balanced in terms of people and automation skills

Answer: B

Explanation:

A core goal of DevOps is to eliminate isolation between roles, teams, and departments. Isolated teams - cut off from other parts of the value stream - create bottlenecks, reduce visibility, and slow feedback.

While flat hierarchies (A), continuous engagement (C), and balanced skills (D) are positive traits, B is the opposite of DevOps principles.

Therefore, B is the correct "NOT" choice.
