AZ-204 Exam Quiz - AZ-204 Cert Exam

To keep the AZ-204 practice questions in Microsoft PDF format up to date, we regularly update them to according to changes in the real AZ-204 exam content. This dedication to keep Developing Solutions for Microsoft Azure (AZ-204) exam questions relevant to the AZ-204 actual test domain ensures that customers always get the most up-to-date Microsoft AZ-204 questions from ExamTorrent.

Microsoft Developing Solutions for Microsoft Azure Sample Questions (Q86-Q91):

NEW QUESTION # 86

You are developing a solution that uses the Azure Storage Client library for .NET. You have the following code: (Line numbers are included for reference only.)

```

01 CloudBlockBlob src = null;
02 try
03 {
04     src = container.ListBlobs().OfType<CloudBlockBlob>().FirstOrDefault();
05     var id = await src.AcquireLeaseAsync(null);
06     var dst = container.GetBlockBlobReference(src.Name);
07     string cpid = await dst.StartCopyAsync(src);
08     await dst.FetchAttributeAsync();
09     return id;
10 }
11 catch (Exception e)
12 {
13     throw;
14 }
15 finally
16 {
17     if (src != null)
18         await src.FetchAttributesAsync();
19     if (src.Properties.LeaseState != LeaseState.Available)
20         await src.BreakLeaseAsync(new TimeSpan(0));
21 }

```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statement	Yes	No
The code creates an infinite lease	<input type="radio"/>	<input type="radio"/>
The code at line 06 always creates a new blob	<input type="radio"/>	<input type="radio"/>
The finally block releases the lease	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statement	Yes	No
The code creates an infinite lease	<input checked="" type="radio"/>	<input type="radio"/>
The code at line 06 always creates a new blob	<input type="radio"/>	<input checked="" type="radio"/>
The finally block releases the lease	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Statement	Yes	No
The code creates an infinite lease	<input checked="" type="radio"/>	<input type="radio"/>
The code at line 06 always creates a new blob	<input type="radio"/>	<input checked="" type="radio"/>
The finally block releases the lease	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: Yes

AcquireLeaseAsync does not specify leaseTime.

leaseTime is a TimeSpan representing the span of time for which to acquire the lease, which will be rounded down to seconds. If null, an infinite lease will be acquired. If not null, this must be 15 to 60 seconds.

Box 2: No

The GetBlockBlobReference method just gets a reference to a block blob in this container.

Box 3: Yes

The BreakLeaseAsync method initiates an asynchronous operation that breaks the current lease on this container.

Reference:

<https://docs.microsoft.com/en-us/dotnet/api/microsoft.azure.storage.blob.cloudblobcontainer.acquireleaseasync>

<https://docs.microsoft.com/en-us/dotnet/api/microsoft.azure.storage.blob.cloudblobcontainer.getblockblobreference>
<https://docs.microsoft.com/en-us/dotnet/api/microsoft.azure.storage.blob.cloudblobcontainer.breakleaseasync>

NEW QUESTION # 87

You need to ensure that validation testing is triggered per the requirements.

How should you complete the code segment? To answer, select the appropriate values in the answer area.

NOTE: Each correct selection is worth one point.

```
var event = getEvent();
if (event.eventType === 
    && event.data.target === 
    && event..contains('contosoimages'))
{
    startValidationTesting();
}
```

Answer:

Explanation:

```
var event = getEvent();
if (event.eventType === 'RepositoryUpdated'
    && event.data.target === 'service'
    && event.repository.contains('contosoimages'))
{
    startValidationTesting();
}
```

Box 1: RepositoryUpdated

When a new version of the ContentAnalysisService is available the previous seven days of content must be processed with the new

version to verify that the new version does not significantly deviate from the old version.

Box 2: service

Box 3: imageCollection

Reference:

<https://docs.microsoft.com/en-us/azure/devops/notifications/oob-supported-event-types>

NEW QUESTION # 88

A software as a service (SaaS) company provides document management services. The company has a service that consists of several Azure web apps. All Azure web apps run in an Azure App Service Plan named PrimaryASP.

You are developing a new web service by using a web app named ExcelParser. The web app contains a third-party library for processing Microsoft Excel files. The license for the third-party library stipulates that you can only run a single instance of the library. You need to configure the service.

How should you complete the script? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
Set-AzAppServicePlan `
  -ResourceGroupName $rg `
  -Name "PrimaryASP" `
```

```
NumberOfSites 1
PerSiteScaling $true
TargetWorkerCount = 1
MaxNumberOfWorkers = 1
SiteConfig.NumberOfWorkers = 1
```

```
$app = Get-AzWebApp `
  -ResourceGroupName $rg `
  -Name "ExcelParser"
```

```
$app.  
NumberOfSites 1  
PerSiteScaling $true  
TargetWorkerCount = 1  
MaxNumberOfWorkers = 1  
SiteConfig.NumberOfWorkers = 1
```

```
Set-AzWebApp $app
```

Answer:

Explanation:

Answer Area

```
Set-AzAppServicePlan `
  -ResourceGroupName $rg `
  -Name "PrimaryASP" `
```

```
NumberOfSites 1
PerSiteScaling $true
TargetWorkerCount = 1
MaxNumberOfWorkers = 1
SiteConfig.NumberOfWorkers = 1
```

```
$app = Get-AzWebApp `
  -ResourceGroupName $rg `
  -Name "ExcelParser"
```

```
$app.
```

```
NumberOfSites 1
PerSiteScaling $true
TargetWorkerCount = 1
MaxNumberOfWorkers = 1
SiteConfig.NumberOfWorkers = 1
```

```
Set-AzWebApp $app
```

Explanation

Table Description automatically generated

```
Set-AzAppServicePlan `
  -ResourceGroupName $rg `
  -Name "PrimaryASP" `
```

NumberOfSites 1
PerSiteScaling \$true
TargetWorkerCount = 1
MaxNumberOfWorkers = 1
SiteConfig.NumberOfWorkers = 1

```
$app = Get-AzWebApp `
  -ResourceGroupName $rg `
  -Name "ExcelParser"
```

```
$app.
```

NumberOfSites 1
PerSiteScaling \$true
TargetWorkerCount = 1
MaxNumberOfWorkers = 1
SiteConfig.NumberOfWorkers = 1

Reference:

<https://docs.microsoft.com/en-us/azure/app-service/manage-scale-per-app>

NEW QUESTION # 89

You are developing an ASP.NET Core app that includes feature flags which are managed by Azure App Configuration. You create an Azure App Configuration store named AppFeatureFlagStore that contains a feature flag named Export.

You need to update the app to meet the following requirements:

- * Use the Export feature in the app without requiring a restart of the app.
- * Validate users before users are allowed access to secure resources.
- * Permit users to access secure resources.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
public void Configure(IApplicationBuilder app, IWebHostEnvironment env)
{
    if (env.IsDevelopment())
    {
        app.UseDeveloperExceptionPage();
    }
    else
    {
        app.UseExceptionHandler("/Error");
    }

    app.
    {
        UseAuthentication
        UseStaticFiles
        UseSession
        UseCookiePolicy
    } ();

    app.
    {
        UseAuthorization
        UseHttpsRedirection
        UseSession
        UseCookiePolicy
    } ();

    app.
    {
        UseAzureAppConfiguration
        UseRequestLocalization
        UseCors
        UseStaticFiles
    } ();

    app.UseEndpoint(endpoints =>
    {
        endpoints.MapRazorPages();
    });
}
```

Answer:

Explanation:

Microsoft

```
public void Configure(IApplicationBuilder app, IWebHostEnvironment env)
{
    if (env.IsDevelopment())
    {
        app.UseDeveloperExceptionPage();
    }
    else
    {
        app.UseExceptionHandler("/Error");
    }

    app. [dropdown] ();
    [dropdown]
    UseAuthentication
    UseStaticFiles
    UseSession
    UseCookiePolicy

    app. [dropdown] ();
    [dropdown]
    UseAuthorization
    UseHttpsRedirection
    UseSession
    UseCookiePolicy

    app. [dropdown] ();
    [dropdown]
    UseAzureAppConfiguration
    UseRequestLocalization
    UseCors
    UseStaticFiles

    app.UseEndpoint(endpoints =>
    {
        endpoints.MapRazorPages();
    });
}
```

Explanation

Box 1: UseAuthentication

Need to validate users before users are allowed access to secure resources.

UseAuthentication adds the AuthenticationMiddleware to the specified IApplicationBuilder, which enables authentication capabilities.

Box 2: UseAuthorization

Need to permit users to access secure resources.

UseAuthorization adds the AuthorizationMiddleware to the specified IApplicationBuilder, which enables authorization capabilities.

Box 3: UseStaticFiles

Need to use the Export feature in the app without requiring a restart of the app.

UseStaticFiles enables static file serving for the current request path Reference:

<https://docs.microsoft.com/en-us/dotnet/api/microsoft.aspnetcore.builder.iapplicationbuilder?view=aspnetcore-5>.

NEW QUESTION # 90

You need to implement the bindings for the CheckUserContent function.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```

public static class CheckUserContent
{
    [FunctionName ("CheckUserContent")]
    public static void Run(
        string content,
        [QueueTrigger("userContent")]
        [BlobTrigger("userContent/{name}")]
        [CosmosDBTrigger("content", "userContent")]
        [Table("content", "userContent", "{name}")]
        Stream output)
    {
        ...
    }
}

```

Answer:

Explanation:

```

public static class CheckUserContent
{
    [FunctionName ("CheckUserContent")]
    public static void Run(
        string content,
        [QueueTrigger("userContent")]
        [BlobTrigger("userContent/{name}")]
        [CosmosDBTrigger("content", "userContent")]
        [Table("content", "userContent", "{name}")]
        Stream output)
    {
        ...
    }
}

```

Explanation

```

public static class CheckUserContent
{
    [FunctionName ("CheckUserContent")]
    public static void Run (
        string content,
        [QueueTrigger("userContent")]
        [BlobTrigger("userContent/{name}")]
        [CosmosDBTrigger("content", "userContent")]
        [Table("content", "userContent", "{name}")]
        Stream output)
    {
        ...
    }
}

```

Box 1: [BlobTrigger(...)]

Box 2: [Blob(...)]

Azure Blob storage output binding for Azure Functions. The output binding allows you to modify and delete blob storage data in an Azure Function.

The attribute's constructor takes the path to the blob and a FileAccess parameter indicating read or write, as shown in the following example:

```

[FunctionName("ResizeImage")]
public static void Run(
    [BlobTrigger("sample-images/{name}")] Stream image,
    [Blob("sample-images-md/{name}", FileAccess.Write)] Stream imageSmall)
{
}

```

Scenario: You must create an Azure Function named CheckUserContent to perform the content checks.

The company's data science group built ContentAnalysisService which accepts user generated content as a string and returns a probable value for inappropriate content. Any values over a specific threshold must be reviewed by an employee of Contoso, Ltd.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-functions/functions-bindings-storage-blob-output>

NEW QUESTION # 91

.....

All kinds of exams are changing with dynamic society because the requirements are changing all the time. To keep up with the newest regulations of the AZ-204 exam, our experts keep their eyes focusing on it. Our AZ-204 exam torrent are updating according to the precise of the real exam. Our AZ-204 Test Prep to help you to conquer all difficulties you may encounter. Once you choose our AZ-204 quiz torrent, we will send the new updates for one year long, which is new enough to deal with the exam for you and guide you through difficulties in your exam preparation.

AZ-204 Exam Quiz: <https://www.examtorent.com/AZ-204-valid-vce-dumps.html>

If you purchase the training materials we provide, you can pass Microsoft certification AZ-204 exam successfully, If you purchase our AZ-204 test guide materials, you only need to spend 20 to 30 hours' studying before exam and attend AZ-204 exam easily,

You can visit ExamTorrent to get the best quality AZ-204 practice test material for the AZ-204 exam, Microsoft AZ-204 Valid Dumps Pdf They are in fact meant to provide you the opportunity to revise your learning and overcome your exam fear by repeating the practice tests as many times as you can.

Faced with toxic superiors, people in your organization may withdraw, fail to AZ-204 share valuable information, no longer have the energy or incentive to go the extra mile, lose creativity, become irritable and oppositional, and leave.

Top AZ-204 Valid Dumps Pdf Pass Certify | Professional AZ-204 Exam Quiz: Developing Solutions for Microsoft Azure

You cannot upgrade directly to any of these operating systems, If you purchase the training materials we provide, you can pass Microsoft Certification AZ-204 Exam successfully.

If you purchase our AZ-204 test guide materials, you only need to spend 20 to 30 hours' studying before exam and attend AZ-204 exam easily, You can visit ExamTorrent to get the best quality AZ-204 practice test material for the AZ-204 exam.

They are in fact meant to provide you the opportunity to Dumps AZ-204 Collection revise your learning and overcome your exam fear by repeating the practice tests as many times as you can.

What's more, you can set the question sequences of AZ-204 Developing Solutions for Microsoft Azure exam study dumps as you like.
