

# CWNP - CWAP-405 - Latest Certified Wireless Analysis Professional Latest Exam Test

BTW, DOWNLOAD part of ExamBoosts CWAP-405 dumps from Cloud Storage: <https://drive.google.com/open?id=15C2RLitfwKP92thVM6vOjmkMGJwnBwhZ>

Our experts composed the contents according to the syllabus and the trend being relentless and continuously updating in recent years. We are sufficiently definite of the accuracy and authority of our CWAP-405 practice materials. They also simplify the difficulties in the contents with necessary explanations for you to notice. To make the best CWAP-405 study engine, they must be fully aware of exactly what information they need to gather into our CWAP-405 guide exam.

In addition to the advantages of high quality, our CWAP-405 exam questions also provide various versions. In order to meet your personal habits, you can freely choose any version of our CWAP-405 study materials within PDF, APP or PC version. Among them, the PDF version is most suitable for candidates who prefer paper materials, because it supports printing. And our PDF version of the CWAP-405 training guide can be carried with you for it takes on place.

## Updated CWAP-405 Demo | Free CWAP-405 Brain Dumps

Now rest assured that with the CWNP CWAP-405 exam questions you will get the updated version of CWAP-405 exam real questions all the time. You have the option to download updated CWNP CWAP-405 Exam Questions up to 12 months from the date of CWNP CWAP-405 exam questions purchase.

## CWNP Certified Wireless Analysis Professional Sample Questions (Q57-Q62):

### NEW QUESTION # 57

You suspect an interfere may exist in a BSS that is experiencing sporadic problems. You want to identify and locate the device. The

actual device identify is not known.

What tool should be used for this purpose?

- A. Protocol analyzer
- B. Throughput tester
- C. Cable tester
- **D. Spectrum analyzer**

**Answer: D**

#### **NEW QUESTION # 58**

A manufacturing facility has installed a new automation system which incorporates an 802.11 wireless network. The automation system is controlled from tablet computers connected via the WLAN. However, the automation system has not gone live due to problem with the tablets connecting to the WLAN. The WLAN vendor has been onsite to perform a survey and confirmed good primary and secondary coverage across the facility. As a CWAP you are called in to perform Spectrum Analysis to identify any interference sources. From the spectrum analysis, you did not identify any interference sources but were able to correctly identify the issue. Which of the following issues did you identify from the spectrum analysis?

- A. There is a power mismatch between the APs and the clients
- B. The tablets are connecting to the wrong SSID
- **C. A high noise floor has resulted in a SNR of less than 20dB**
- D. The tablets are entering power save mode and failing to wake up to receive the access points transmissions

**Answer: C**

Explanation:

Spectrum analysis can reveal elevated RF energy across the band even when no distinct interference signatures are present. A persistently high noise floor reduces the signal-to-noise ratio, and if the SNR drops below a usable threshold, clients may fail to reliably detect and decode frames needed to connect and maintain service, despite a survey showing adequate coverage levels.

#### **NEW QUESTION # 59**

In a Spectrum Analyzer the Swept Spectrogram plot displays what information?

- **A. RF power present at a particular frequency over the course of time**
- B. The RF time domain
- C. Reductions in frame transmissions
- D. Wi-Fi Device information

**Answer: A**

Explanation:

The Swept Spectrogram plot is a spectrum analysis plot that shows the RF power present at a particular frequency over the course of time. It can help identify trends and patterns in the RF spectrum over a longer period of time. It can also show how the RF environment changes over time and how different sources of RF signals affect each other. The other options are not correct, as they describe different types of plots or information that are not related to the Swept Spectrogram plot. References: [Wireless Analysis Professional Study Guide], Chapter 3: Spectrum Analysis, page 72-73

#### **NEW QUESTION # 60**

Which one of the statements regarding the Frame Control field in an 802.11 MAC header is true?

- A. Only Control frames have a Frame Control field
- B. The Frame Control field is always set to 0
- C. The Frame Control field is used to communicate the duration valued
- **D. The Frame Control field contains subfields, and some are 1-bit flags**

**Answer: D**

Explanation:

The Frame Control field in the 802.11 MAC header is composed of multiple subfields, including several 1-bit flags such as To DS, From DS, More Fragments, Retry, Power Management, More Data, Protected Frame, and Order. These subfields define the type, subtype, and control characteristics of the frame.

#### NEW QUESTION # 61

Both 802.11k and 802.11v make use of Neighbor report elements to inform STAs about neighboring BSS networks. In which type of Management frame would you find Neighbor report elements?

- A. Action
- B. Probe Response
- C. Authentication Request
- D. Association Response

**Answer: A**

Explanation:

Neighbor report elements used by 802.11k (Radio Resource Measurement) and 802.11v (BSS Transition Management) are carried in Action frames. These frames allow the AP to provide clients with information about neighboring BSSs to assist in roaming decisions.

#### NEW QUESTION # 62

.....

First and foremost, our company has prepared CWAP-405 free demo in this website for our customers. Second, it is convenient for you to read and make notes with our PDF version. Last but not least, we will provide considerate on line after sale service for you in twenty four hours a day, seven days a week. So let our CWAP-405 practice materials to be your learning partner in the course of preparing for the exam, especially the PDF version is really a wise choice for you.
