

Interactive C-SAC-2501 Questions, Exam Dumps C-SAC-2501 Pdf

Download the latest C-SAC-2501 exam dumps PDF for preparation

1.What source system can you connect to with a live connection?

- A. SAP ERP Central Component
- B. SAP SuccessFactors
- C. SAP Business ByDesign Analytics
- D. SAP Datasphere

Answer: D

SAP Analytics Cloud can establish a live connection with various source systems, including SAP Datasphere. This allows for real-time data access and analysis without the need to replicate data into the cloud, which is beneficial for scenarios where data privacy and security are paramount.

Live connection in SAP Analytics Cloud: advantages and challenges4 Explaining Where the Data Comes From - SAP Learning5

2.You are using a live connection for a model. Where is the data stored?

- A. Public dataset
- B. SAP Analytics Cloud model
- C. Source system
- D. Embedded data set

Answer: C

Connections and data preparation

When using a live connection in SAP Analytics Cloud, the data remains stored in the source system. This means that no data is imported or replicated into SAP Analytics Cloud; instead, it is accessed and analyzed in real-time directly from the source system. This approach ensures that the most current data is always used for analysis and that data governance and security policies of the source system remain in control.

Reference: Live Data Connections to SAP S/4HANA | SAP Help Portal1 SAP Analytics Cloud Connection Guide2

SAP Analytics Cloud Data Connections - InsightCubes

In the context of SAP Analytics Cloud, when using a live connection to connect to a data source, the data remains stored in the source system. This setup means that SAP Analytics Cloud directly queries the data in its original location, without importing or copying it into the SAP Analytics Cloud environment. This approach is advantageous for several reasons, including maintaining a single source of truth, reducing data redundancy, and ensuring data is always up-to-date without the need for synchronization processes. Live connections are particularly useful for real-time or near-real-time data analysis and reporting, providing insights based on the most current data available without the overhead of data replication.

Reference: SAP Analytics Cloud documentation and user guides typically emphasize the benefits and use cases of live connections, highlighting how they maintain data in the source system to ensure real-time data access and analysis.

SAP training materials for Data Analysts using SAP Analytics Cloud, including study guides and official certification resources, explain the technical and practical aspects of live connections, including where data is stored and how it is accessed.

C-SAC-2501 Test Torrent & C-SAC-2501 Reliable Braindumps & C-SAC-2501 Training Questions

If you want to pass a high percentage of the SAP C-SAC-2501 Exam, you should consider studying for the actual exam. These

practice tests are designed to help you prepare for the exam and ensure you know the syllabus content. It will also help you improve your time management skills, as these tests are designed like an actual exam. Moreover, they will help you learn to answer all questions in the time allowed.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q38-Q43):

NEW QUESTION # 38

You are creating a data action to copy data from one year to the next. In the parameter for the source year, which default setting must you change?

- A. Granularity
- B. Level
- **C. Cardinality**
- D. Hierarchy

Answer: C

NEW QUESTION # 39

You are creating a styling rule for a table. What is the context?

- A. The table header
- **B. The location of the cursor**
- C. The most granular level in the table
- D. The highest level in the table

Answer: B

NEW QUESTION # 40

You import data into a dataset. One of the columns imported is Year, and SAP Analytics Cloud interprets it as a measure. How can you ensure that it is treated as a calendar year?

- A. Includes the Year measure in a level-based time hierarchy in the dataset.
- **B. Change the Year measure to a dimension in the dataset.**
- C. Insert a character into the Year measure using the transform bar.
- D. Add the month as a suffix to the Year measure.

Answer: B

Explanation:

If SAP Analytics Cloud interprets a 'Year' column as a measure instead of a dimension, it should be changed to a dimension to ensure it is treated as a calendar year. This adjustment can be made within the model or dataset settings, where the column's role can be switched from a measure (quantitative value) to a dimension (qualitative value). Treating 'Year' as a dimension allows it to be used appropriately in time-based analyses, such as trends over time, without being aggregated like a numerical measure.

NEW QUESTION # 41

What is required to use version management in a story?

- A. Analytic model
- **B. Planning model**
- C. Optimized mode
- D. Classic mode

Answer: B

Explanation:

Reference:

NEW QUESTION # 42

In a data model, what can you use to further describe a dimension?

- A. Variable
- B. Measure
- C. **Property**
- D. Data action

Answer: C

Explanation:

In a data model within SAP Analytics Cloud, Properties are used to further describe dimensions. Properties provide additional context or metadata for dimension members, such as descriptions, classifications, or other attributes that help to better understand and analyze the data within the dimension. This makes properties essential for detailed data analysis and reporting.
