

Exam TDA-C01 Dumps | TDA-C01 Latest Dumps Files

Họ và tên: Võ Nguyễn Minh Châu.....Lớp: L08.....

Nghiên cứu các hệ thống tích hợp với Core banking:

1. Bạn thường sử dụng các loại hệ thống tích hợp nào? Liệt kê và mô tả ngắn gọn về chúng.
2. Bạn muốn sử dụng hệ thống tích hợp nào nhất? Tại sao?
3. Theo thực trạng hiện nay, bạn quan ngại vấn đề nào của hệ thống ngân hàng? Tại sao?

Trả lời

Câu 1:

- Tích hợp core banking với NAPAS thông qua chuẩn ISO 8583 / API. Đây là lớp tích hợp cho phép kết nối trực tiếp giữa core banking và hệ thống chuyển mạch tài chính NAPAS. Luồng giao dịch thanh toán thẻ, chuyển khoản 24/7, QR và clearing được truyền và xác thực theo thời gian thực. Việc sử dụng ISO 8583 cho phép đảm bảo tính toàn vẹn message, cấu trúc data field chuẩn hóa và giảm sai lệch dữ liệu trong xử lý liên ngân hàng.

- Middleware/ESB phục vụ điều phối message đến NAPAS: Trong nhiều ngân hàng, lớp tích hợp ESB hoặc API Gateway đóng vai trò routing, transformation và load balancing nhằm giảm áp lực xử lý trực tiếp lên core banking và tránh tình trạng nghẽn giao dịch.

- Hệ thống reconciliation đối soát với NAPAS: Phục vụ đối chiếu file settlement, xử lý tra soát và bù trừ giao dịch, đảm bảo dữ liệu khớp chính xác giữa số cái core và clearing report từ NAPAS. Điều này giúp ngân hàng hạn chế rủi ro kế toán và sai lệch số dư khách hàng.

Câu 2:

- Tối ưu hóa hiệu năng xử lý giao dịch (transaction throughput & latency):

+ Luồng giao dịch kết nối trực tiếp giữa core banking và NAPAS giúp giảm độ trễ (latency) so với mô hình qua nhiều tầng middleware.

+ Message chuẩn ISO 8583 giúp giảm overhead data, tăng tốc độ truyền.

+ Khi kết hợp Gateway middleware, có thể thực hiện load balancing, queue management, giúp hệ thống duy trì throughput ổn định trong giờ cao điểm giao dịch 24/7.

- Chuẩn hóa giao thức tích hợp và nâng cao tính tương thích hệ thống

At the ExamsReviews, we guarantee that our customers will receive the best possible Tableau Certified Data Analyst (TDA-C01) study material to pass the Tableau TDA-C01 certification exam with confidence. Joining this site for the TDA-C01 Exam Preparation would be the greatest solution to the problem of outdated material.

Tableau TDA-C01 exam is designed to test the knowledge and skills of individuals who want to become certified Tableau data analysts. Tableau Certified Data Analyst certification demonstrates the ability to use Tableau software to analyze data and create visualizations that aid decision-making processes. TDA-C01 exam is ideal for individuals who work with data on a regular basis and want to showcase their proficiency in using Tableau to derive insights from it.

Tableau TDA-C01 Exam covers a wide range of topics that are essential for a data analyst. TDA-C01 exam tests an individual's ability to connect to and prepare data, create and publish dashboards, and conduct data analysis using statistical methods. Additionally, the exam evaluates an individual's understanding of Tableau's data visualization principles and best practices.

Pass Guaranteed Quiz Tableau - TDA-C01 Perfect Exam Dumps

Everyone wants to have a good job and decent income. But if they don't have excellent abilities and good major knowledge they are hard to find a decent job. Passing the test TDA-C01 certification can make you realize your dream and find a satisfied job. Our TDA-C01 study materials are a good tool that can help you pass the TDA-C01 Exam easily. You needn't spend too much time to

learn it. Our TDA-C01 exam guide is of high quality and if you use our product the possibility for you to pass the TDA-C01 exam is very high as 99% to 100%.

Tableau TDA-C01 certification is a valuable credential for individuals who want to enhance their skills and knowledge in data analytics. Tableau Certified Data Analyst certification is globally recognized and provides individuals with a competitive edge in the job market. Preparing for the exam requires a combination of practical experience and theoretical knowledge, and Tableau provides various resources to help individuals prepare for the exam. Passing the TDA-C01 Exam demonstrates an individual's ability to use Tableau to connect to various data sources, perform data analysis, create and share visualizations, and design dashboards.

Tableau Certified Data Analyst Sample Questions (Q47-Q52):

NEW QUESTION # 47

You publish a dashboard that uses an extract. The extract refreshes every Monday at 10:00.

You need to ensure that the extract also refreshes on the last day of the month at 18:00.

What should you do?

- A. From Tableau Server, select Schedules find the schedule of the extract, and change the frequency to the Last day of the month
- B. From Tableau Server, select Schedules and change the priority of the existing schedule
- **C. From Tableau Server select the workbook select Refresh Extracts and then add a new extract refresh**
- D. From Tableau Desktop, open the Publish Workbook dialog box and configure the schedule.

Answer: C

Explanation:

To refresh an extract on Tableau Server, you need to select the workbook, select Refresh Extracts, and then add a new extract refresh. You can specify the frequency and time of the refresh, as well as any custom options. You can have multiple extract refreshes for the same workbook with different schedules. References:

https://help.tableau.com/current/server/en-us/refresh_extracts.htm

https://help.tableau.com/current/server/en-us/refresh_extracts_add.htm

On Tableau Server, you can manage the scheduling of extract refreshes by selecting the specific workbook and configuring additional refresh schedules as needed. This allows for multiple refresh triggers, such as the regular Monday at 10:00 AM schedule, as well as an additional trigger for the last day of the month at 18:00.

NEW QUESTION # 48

Refer to the exhibit.

You need the top 10 values to appear in a different color. The top 10 values must be colored dynamically.

What should you do?

- A. Select the top 10 bars, create a set, and then drag the set to Color on the Marks card.
- B. Create a group field that groups the top 10 values into one group and the rest of the values into another group. Drag the group field to Color on the Marks card.
- **C. Create a set that has a top 10 condition, and then drag the set to Color on the Marks card.**
- D. Select the top 10 bars, and then change the color by selecting Color on the Marks card.

Answer: C

NEW QUESTION # 49

You have a dataset that has four fields named Category, Profit, Sales, and Customer Name. You need to create the following visualization.

Answer:

Explanation:

NEW QUESTION # 50

You have the following Map.

□ You need the map to appear as shown in the following visualization.

□ What should you do?

- A. Change the opacity to 75%.
- **B. Change the mark type to Density.**
- C. Change the mark type to Map.
- D. Drag Location to Size on the Marks card.
- E. Drag Population to Size on the Marks card.

Answer: B

Explanation:

To create a map visualization that shows the concentration of data points in different locations, you need to change the mark type to Density. This will create a heatmap that uses color and size to indicate the density of the data points. You can also adjust the intensity and transparency of the density marks to suit your needs. Reference: The information is based on the following sources:

Create Heatmaps that Show Trends or Density in Tableau

Build a Simple Map - Tableau

NEW QUESTION # 51

You have a dashboard that contains confidential information about patients health. The data needs to always be up to date for a team of healthcare workers. How should you share the dashboard with the healthcare workers?

- A. Export the dashboard as a .twbx
- B. Publish the dashboard to Tableau Public
- C. Print the dashboard to PDF
- **D. Publish the dashboard to Tableau Server**

Answer: D

Explanation:

To share a dashboard that contains confidential information about patients health and needs to always be up to date for a team of healthcare workers, you should publish it to Tableau Server. This will allow you to control who can access and interact with your dashboard, as well as schedule automatic refreshes of your data source or extract. Publishing to Tableau Public would expose your data to anyone on the internet, printing to PDF would not update your data, and exporting as a .twbx would require sending a large file that might not be compatible with other versions of Tableau. References: https://help.tableau.com/current/pro/desktop/en-us/publish_workbooks_share.htm https://help.tableau.com/current/pro/desktop/en-us/publish_workbooks_tableauserver.htm

When sharing sensitive and confidential information that needs to be kept up-to-date, such as patient health data for a team of healthcare workers, the best practice is to publish the dashboard to Tableau Server. Tableau Server is designed for secure, controlled access and can be configured to ensure that data is refreshed as needed. Publishing to Tableau Public is not secure for confidential data, printing to PDF or exporting as a .twbx does not allow for live data updates.
